

Muttenz, Switzerland – July 24th, 2023

INOFEA, a pioneering biotech company providing cutting-edge enzyme technology, today announces the launch of its newly redesigned website. This marks a significant milestone in the company's commitment to enhancing visibility, boosting user engagement, and effectively communicating its remarkable technology and products. The new website reflects INOFEA's ambitious marketing strategy, aiming to broaden awareness about its unique capabilities that can revolutionize the manufacturing of biologic drugs such as mRNA-based vaccines and therapeutics, antibody-drug-conjugates, small molecule APIs as well as other enzymatic transformations in the Life Science industry.

INOFEA's new website offers a clear and comprehensive overview of the company's innovative enzyme shielding technology, that enables routes for the manufacturing of biologic drugs previously unfeasible using traditional biocatalysts. The proprietary technology that INOFEA offers, by protecting enzymes and enhancing their resilience and features, paves the way for more efficient and sustainable productions, contributing to the green chemistry revolution in the pharma industry.

"We're excited to unveil our new website and truly believe it will serve as a valuable resource for our partners, customers, and stakeholders," said Anne Timm, CEO of INOFEA. "Our website's fresh look and intuitive navigation allow visitors to access detailed information about our ground-breaking technology and the transformational impact it can have on the biopharmaceutical industry. Furthermore we are launching in parallel a Newsletter to make sure our loyal customers and partners are constantly updated about the achievement of our constant research and development activities, as well as the new applications for their deployment"

Further showcasing its marketing initiatives, INOFEA is thrilled to announce its participation as an exhibitor at CPHI 2023, Europe's leading pharmaceutical event, taking place in Barcelona this October. This will be a prime opportunity for the company to connect with industry leaders, potential partners, and customers, further establishing its influence and presence in the global pharma landscape.

"With our participation at CPHI 2023 and the launch of our new website and newsletter, we are strategically positioning INOFEA at the forefront of the pharmaceutical industry," added Anne Timm. "We look forward to showcasing our innovative technologies and discussing the far-reaching benefits they bring to the manufacture of biologic drugs."

About INOFEA

INOFEA is a Swiss biotech company specializing in the development and commercialization of patented enzyme shielding technology. By enhancing the robustness and versatility of enzymes, INOFEA's technology unlocks new possibilities in the biopharmaceutical industry, enabling more sustainable and efficient production processes.
