# Our Vision

“ To leave a positive footprint on human health by creating an institution that transcends the mortal being!

मानव स्वास्थ्य पर सकारात्मक पदचिन्ह छोड़ने के लिए एक ऐसी संस्था का निर्माण करना जो प्राणीमात्र के अस्तित्व से परे, शाश्वत हो। ”

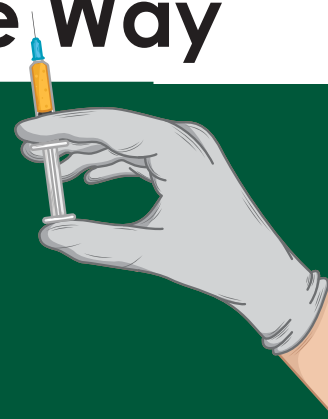

## Company Overview

**Venus Pharma GmbH**, a renowned Contract Development and Manufacturing Organization (CDMO) based in Germany, has emerged as a key player driving export growth and market leadership in the pharmaceutical industry. As a wholly owned subsidiary of **VENUS REMEDIES LIMITED**, the company actively supports the Make in India initiative, while achieving remarkable milestones in the global market.

## Breaking Barriers, Leading the Way

It all began with the efforts of one dynamic entrepreneur, Mr. Pawan Chaudhary, when he ventured on his own to create history in the Indian pharmaceutical industry. His journey, characterized by ups and downs, reached a milestone in 2006, with acquisition of a manufacturing plant at Werne in Germany-Venus Pharma GmbH, our first step towards becoming a multinational company. With a focused approach on Carbapenem & Cephalosporin antibiotics and oncology segments, Venus Pharma GmbH has established itself as a pharmaceutical hub in the EU region, showcasing excellence and expertise in these specialized product segments. Venus Pharma GmbH has become the largest importer and market segment leader in sales of Meropenem injections within the EMEA markets. This remarkable feat includes countries such as Germany, Italy, Cyprus, Portugal, Israel, Bahrain, Iraq, and the UK, where Venus Pharma GmbH has firmly established its market dominance.

The Prestigious international Award QC-100 TQM (Total Quality Management) in Gold Category, at the Century Internal Quality ERA convention held in Geneva 2011

Great Place to Work 2023-2024 Award

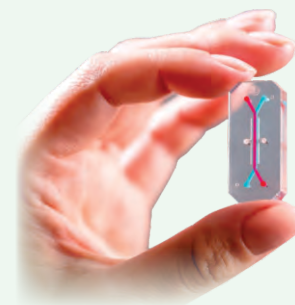

Responsible Export Organization certification

# R & D and Other Initiatives

Venus India has now onboarded prestigious AMR Industry Alliance (AMRIA) as a member. **AMR**

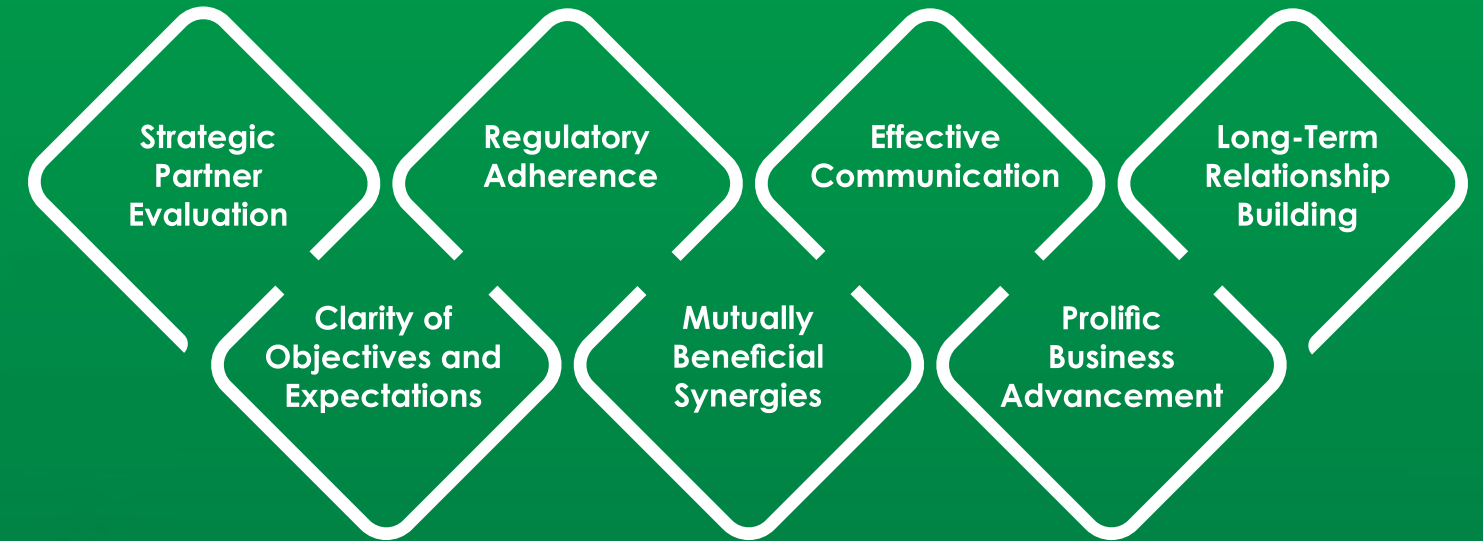

**Industry Alliance** is a group of more than 100 global biotechnology, diagnostics, generics, and research based pharmaceutical companies and associations established to provide sustainable solutions to combat AMR, including by facilitating collaboration between public and private sectors across the world.

## Adapting Contemporary Technologies

Venus Medicine Research Centre has added the Organ-on-a-chip lab. This installation of kidney-in-a-chip model will radically change the way pharmaceutical industry traditionally screen the drug innovation and related toxicity.

At Venus Pharma GmbH, we approach business partnerships with a strategic mindset, fostering collaborations that are not only successful in the short term but also sustainable and mutually beneficial in the long run.

**Let's Unite to Craft a Sustainable Story of Growth!!**
