

Adeste

Leadership in Bovine Heparin API Production

Heparin: Proven Clinical Excellence Since 1935

Heparin, a cornerstone in anticoagulation therapy, has been widely used in clinical practices since 1935. Adeste's commitment to produce high-quality heparin APIs positions us as one of the global leaders in this essential therapeutic area, providing both bovine and porcine heparin and heparinoids.

Key Features & Benefits:

• Unmatched Purity and Quality:

Our heparin API meets the most rigorous international standards, ensuring the highest levels of safety, efficacy, and traceability. Adeste guarantees full product traceability throughout the supply chain, from raw material sourcing to finished product distribution.

• Halal-Certified for Global Markets:

Adeste's bovine heparin plant is Halal-certified, making it accessible for Muslim-majority countries, while also meeting stringent regulatory standards worldwide.

• Proven Clinical Applications:

Heparin's anticoagulant properties make it essential for preventing and treating thrombosis, deep vein thrombosis (DVT), pulmonary embolism, dialyses and during cardiac surgeries. Its versatility extends across multiple therapeutic settings.

Why Choose Adeste's Heparin API?

Decades of Expertise:

Adeste is the world's largest bovine heparin producer, leveraging over 40 years of industry leadership. Our experience guarantees reliable supply and exceptional product quality, addressing the specific needs of global healthcare markets.

Research & Development:

With dedicated R&D team we work closely with our clients to co-develop solutions, addressing unique market needs while maintaining the highest standards of innovation.

Global Reach:

Exporting to over 40 countries, Adeste ensures reliable and uninterrupted supply chains, meeting the demands of pharmaceutical companies and healthcare providers worldwide.

Regulatory Compliance:

Adeste adheres to the strictest regulatory requirements, meeting global standards and ensuring the safety and efficacy of our heparin products.

Commitment to Sustainability:

At Adeste, we prioritize sustainability throughout our operations, maintaining a circular economy approach in every step of our production process. Our heparin APIs are produced using ethically sourced raw materials, minimizing waste and maximizing resource efficiency.

Certifications and Quality Assurance:
