

The last 12 months have been very busy at Accord Animal Health.

This year we will see our first product launches in EMENA. Our canine dental chew is already in Didcot and ready to distribute across UK and Ireland, with two further products launching at The London Vet Show at the Excel in November. We continue to grow our product range by working with partners on In-licensing agreements, with three partners already signed up and another three contracts to be agreed by the end of the year. We are looking forward to growing our portfolio by expanding our range of nutraceuticals and VMPs during 2025.

### Vivinicord Chews®

Bacterial infections, plaque, tartar accumulation, a compromised immune system, and lack of routine dental care are the major causes of poor oral health in dogs. However, dental health issues are largely preventable. Vivinicord canine dental chews offer anti-inflammatory, antimicrobial and antibacterial qualities. They aim to support plaque, tartar and halitosis control in a low-calorie daily chew.

## PerNic® Cox - Launching November 2024

Much like with humans, osteoarthritis can affect entire joints. Osteoarthritis is progressive and cannot be cured. We will be launching PerNic Cox, an advanced type of joint supplement for dogs delivered via a novel syringe dispenser.

## Multi-cord Vet® - Launching November 2024

A supplement for companion animals with eleven vitamins and nineteen essential amino acids for dogs, cats, rodents, rabbits and birds. It is ideally suited for: older pets, highly active pets, weak or convalescent pets, pets in recovery and new mums.
