

FLORAFIX

PROBIOTIC YEAST FOR DIARRHEA

Globally, 44% of people experience digestive health problems.

Saccharomyces boulardii Unique-28 is a non pathogenic probiotic yeast.

FLORAFIX is resistant to stomach acids and antibiotics. *Saccharomyces boulardii* Unique-28 effectively restores the intestinal microbiota.

INDICATIONS & CAUSES

Diarrhea is a common manifestation of many gastrointestinal diseases. It means

- Loose, watery stools that occur more frequently than usual.

The severity of diarrhea is unpredictable and is associated with

- *Clostridium difficile* infection
- Enteral nutrition-related diarrhea
- Traveler's diarrhea
- Antibiotic-associated diarrhea

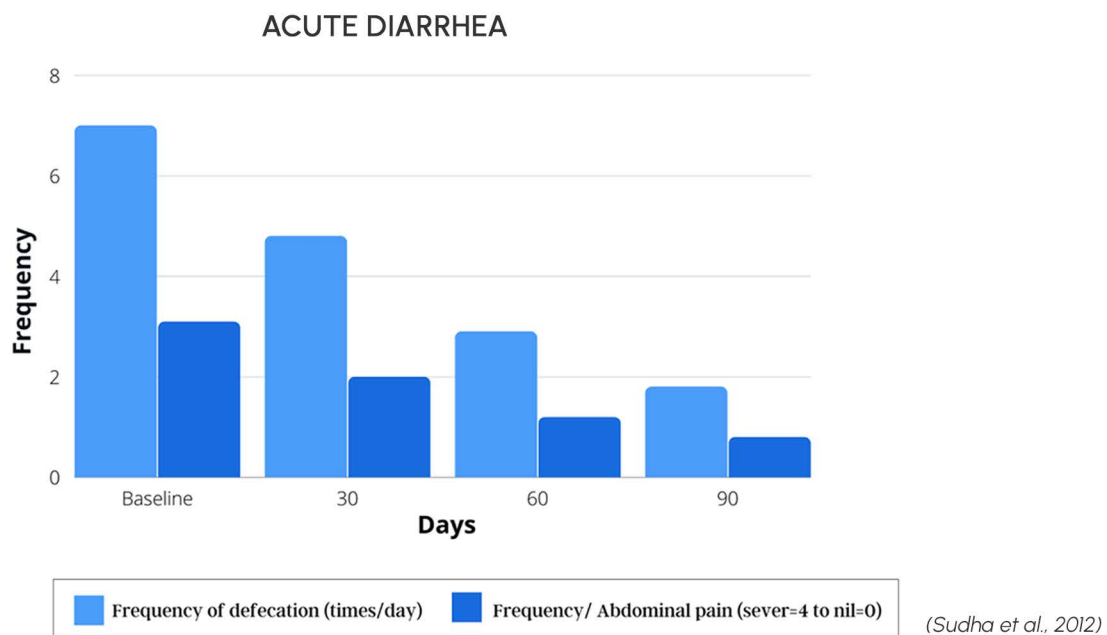

BENEFITS

Saccharomyces boulardii Unique-28 has several advantages over other antidiarrheal probiotic strains as it is resistant to all antibiotics.

FLORAFIX helps in the effective management of

- Diarrhea of all types (viral, bacterial, antibiotic-associated and traveler's diarrhea)
- Helps reduce symptom of irritable bowel syndrome and colitis
- Reduces bloating and gas
- Restores normal bowel function
- Regulates immunity

CLINICAL STUDIES

FLORAFIX significantly reduced the defecation frequency and abdominal pain.
