

PRODICON

KEEP DIABETES AT BAY WITH PROBIOTICS

Unique blend of probiotics for controlling blood glucose levels

- The global prevalence of diabetes is estimated to be 9.3% rising to 10.2% by 2030
- Globally, 1 in 10 people are affected with diabetes

PRODICON is a well-proven and studied combination of probiotic strains and Fructo Oligosaccharide (FOS). The combination was chosen based on the ability of the probiotic strains to inhibit α -glucosidase which delays the absorption of glucose after meals.

INDICATIONS & CAUSES

Diabetes mellitus is a non-communicable metabolic disease characterized by

- High blood glucose levels
- Impaired insulin secretion
- Insulin resistance or a combination of both

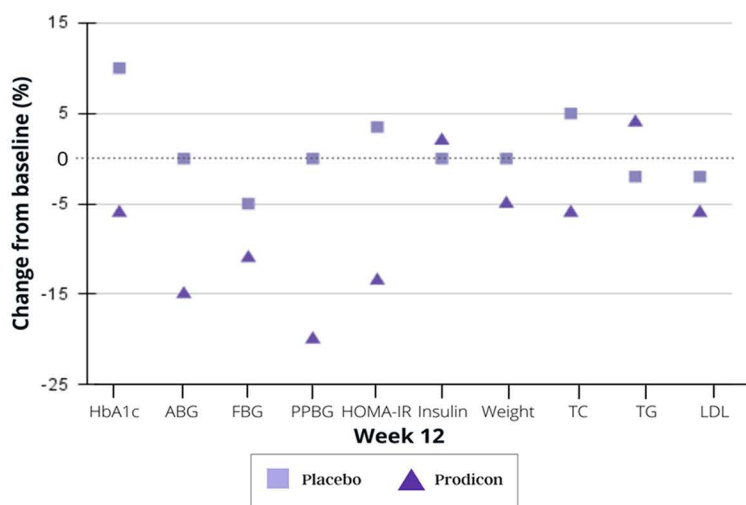

It might arise from

- High fat & cholesterol levels
- Sedentary lifestyle
