

# PROVIBO D3

THE SUNSHINE VITAMIN

Probiotic and Vitamin D oral solution for optimal bone health and restoration of normal Vitamin D levels

Globally, about 1 billion people have low vitamin D levels

Vitamin D, often called the “sunshine vitamin” is produced in the skin in response to sunlight. It is a fat-soluble vitamin with several important functions. It helps the body absorb calcium and phosphorus. Having the right amount of vitamin D is essential for healthy bones, teeth and muscles and for the normal functioning of the immune system.. With changes in lifestyles and limited exposure to sun, Vitamin D deficiency is very rampant and supplementation is often recommended.

PROVIBO D3, a combination of our flagship proprietary strain, *Bacillus coagulans* Unique IS-2 and nano Vitamin D3 is in the form of a liquid syrup which is easy to consume with absorption into the bloodstream being faster as compared to pills. *Bacillus coagulans* Unique IS-2, apart from contributing to gut health enhances the intestinal absorption of calcium giving PROVIBO D3 the competitive edge as compared to other supplements in the market . Its portable packaging just like pills makes it convenient to carry everywhere.

As vitamin D3 is fat-soluble, it is highly sensitive to oxidation and poorly soluble in water. Therefore, Vitamin D3 in PROVIBO D3 oral syrup is encapsulated in nanoliposomes which prevent oxidative damage and ensure its maximum absorption by the body.

## INDICATIONS & CAUSES

Vitamin D levels vary from person to person depending on

- Exposure to sunlight
- Skin pigmentation
- Pollution
- Usage of sunscreens
- Intake of Vitamin D rich foods

Its deficiency causes

- Fatigue
- Bone pain

## USAGES AND BENEFITS

Helps build strong immunity

Promotes bone health

Helps in optimum absorption of calcium

Helps build muscle health

Helps prevent osteoporosis

Helps prevent Vit D3 in adults and in children

### COMPOSITION

Each dose of 5 ml contains:

Bacillus coagulans Unique IS-2 -2 bn cfu

Nano Vitamin D3 - 400 IU

### DOSAGE

Adults & children above 10 yrs: 5 ml twice daily

Children between 5-10 yrs: 5 ml once daily
