

REUSOL

HAPPY TUMMY, HAPPY BABY

Lactobacillus reuteri UBLRu-87 drops- the safe and effective probiotic for infant colic pain

Colic affects 5%-40% of infants worldwide and is the cause for 10% to 20% of pediatrician visits during the early weeks of an infant's life

Babies with colic are reported to have a smaller number of good bacteria and high amounts of harmful bacteria that cause inflammation and digestive disorders. Probiotics help add good bacteria to an infant's stomach more quickly. REUSOL, a probiotic supplement contains Lactobacillus reuteri that is found to be safe and effective for the management of colic pain in both infants and children.

INDICATIONS & CAUSES

Colic is frequent, prolonged and intense crying or fussiness in a healthy infant with no known cause. It is defined as crying for three or more hours a day, three or more days a week, for three or more weeks. Colic usually affects babies in the first few weeks of their lives and persists for about 4 months.

The cause of colic is multifactorial and not fully understood, contributing factors include

- Digestive system that isn't fully developed
- Imbalance of healthy bacteria in the digestive tract
- Overfeeding, underfeeding, or infrequent burping
- Allergy to cow's milk proteins (or lactose intolerance) in formula-fed babies

USAGES AND BENEFITS

- Relieves colic pain
- Reduces regurgitation
- Relieves bloating and flatulence
- Restores gut flora
- Safe for consumption
- Supports healthy immune system
