

## Curcumin is more than spicy component.

Curcumin is a natural polyphenolic compound isolated from rhizomes, leaves, and roots of Turmeric (*Curcuma Longa*). In Indian and Chinese ancient medicines, it has been widely used as an anti-inflammatory agent to treat gas, colic, toothaches and other pains, menstrual difficulties, and skin diseases.

Pharmacological studies revealed that turmeric retains the potential activity of an anti-depressant and anti-diabetic cataract and helps with stomach and liver problems. The healing properties are mainly due to its curcumin content. Numerous in vitro and in vivo studies of the last decades suggest that curcumin has properties supporting the treatment of many diseases, e.g., anti-viral, anti-fungal, anti-arthritic, or anti-thrombotic. As the curcumin treatment is devoided of side effects, the interest in curcumin's health benefits is still growing.

## Unique curcumin capsules prepared by TCI

- Up to 50 mg/capsule of natural curcumin extract
  - Self-invented unique formula
  - Well soluble in water and fats
  - Crystal and clear dissolution
  - Fast release
  - Very good absorption
  - Supports the nervous system
  - Improves functioning of the digestive system
  - Supports the cardiovascular system
  - For maintaining normal cholesterol levels
  - Improves the condition of the joints
  - Efficacy confirmed by numerous studies and clinical trials
  - **Vegetarian**
  - **Kosher, Halal**
- Manufactured in accordance with GMP**
