

Material Science: Solid Form Matters!

Enhance the quality of your API and Drug Product with a complete understanding of the solid state

Why Choose Evotec?

- **Integrated Expertise:** Comprehensive facilities for Solid State Chemistry and Physical Properties
- **Advanced Instrumentation:** Cutting-edge tools for physical properties characterization, from API to Drug Product
- **Comprehensive Analysis:** Crystalline and amorphous material characterization using XRPD, Thermal Analysis, Microscopy, and more
- **Regulatory Compliance:** Method development and cGMP validation according to ICH guidelines
- **Optimized Drug Performance:** API Version and Form Screening & Selection to enhance drug properties and meet regulatory standards
- **Pre-Formulation Expertise:** Solubility, stability, and phototoxicity assessments to ensure robust development

Proven Track Record

100+

Projects annually requiring physical properties support

50+

Polymorph/Salt screenings performed each year

10,000+

Analyses (XRPD, DSC, TGA, PSD) conducted annually
