

Candida antarctica lipase B enzyme, Recombinant

LIQUID

BIOCATALYST CALB

10 L

TECHNICAL DATA SHEET

BIOCATALYST CALB 10 L is a recombinant *Candida antarctica* lipase B enzyme expressed in yeast cells.

Product type

BIOCATALYST CALB 10 L is supplied as formulated; enzyme concentrate equilibrated with buffer and permitted preservatives.

Application

Resolution of chiral alcohols and amines; Synthesis of fatty-acid esters; Versatile applications in organic synthesis; Exhibit good to excellent stereo selectivity.

Description

Yellowish green to green solution. Colour may vary from batch to batch and the colour intensity is not an indication of the product quality.

Enzyme activity

NLT 10000 TBU/mL (Tributyryn hydrolysis).

TBU Unit definition

Amount of enzyme catalyzing the formation of 1 μ mole of butyric acid at 40°C, pH 7.5 at 10% (v/v) Tributyryn concentration per minute per mL enzyme in the milieu of 100 mM sodium phosphate buffer.

Reaction schematics

Candida antarctica lipase B enzyme, Recombinant

BIOCATALYST CALB 10 L Profile

pH stability of BIOCATALYST CALB 10 L

Temperature stability of BIOCATALYST CALB 10 L

Storage stability (at 5°C) of
BIOCATALYST CALB 10 L

Advantages

- Higher activity
- Higher stability

Storage & Product stability

Cool and dry conditions are recommended for storage. The recommended temperature for storing is between 5°C to 8°C. When stored under these conditions, the product will maintain its declared activity for at least 12 months.

Safety

BIOCATALYST CALB 10 L is very safe to handle, as it does not generate any aerosols. Avoid direct contact with skin and eyes. Avoid forming aerosols, wash contaminated clothing and ensure sufficient ventilation.

Material support data

- Technical data sheet
- Certificate of analysis
- Material safety data sheet
- Protocol for assay method

Packing size

- Minimum pack size : 1kg
- Bulk pack size : 25kg

Manufactured by :

Fermenta Biotech Limited

DIL Complex, Ghodbunder Road, Thane (West) - 400 610, Maharashtra, India.
