ABOUT US

Established in 1958.

Leading graphical company in Slovenia with regional visibility in the area of printed matter production for pharmaceutical, cosmetics and other industries.

State-of-the-art equipment, cutting-edge technology, high productivity, quality products and qualified workforce.

Reliable business partner with high capital adequacy, creditworthiness and permanent investments in employee development and technology.

In the 2017, the company's annual sales amounted to EUR 12 M, with shareholders' equity at EUR 33 M.

The normalised level of investment is EUR 1.5 M per year.

The company has been profitable throughout the years and is not indebted.

The company has 130 employees and is a member of the Perspektiva Group.

VISION, MISSION, VALUES

VISION

To retain leading position in the country, and among the leaders in the region in the manufacturing of printed matter for pharmaceutical, cosmetics and other industries.

MISSION

To create cutting-edge packaging solutions for the most demanding clients, while strengthening client partnership.

VALUES

Creativity, effectiveness, quality, flexibility, and responsibility towards employees as well as to social environment and nature.

HIGH QUALITY PRODUCTS AND SERVICES

We produce folding boxes and leaflets for pharmaceutical, cosmetics and other industries.

We are a certified and trusted supplier striving for the unification of controls, which consequently results in lowering of the scope of client control and their expenses.

The overall production process is organized according to strict GMP guidelines (Good Manufacturing Practice) for pharmaceutical industry.

The company is ISO 9001:2015 certified and is in the process of obtaining ISO 14001:2015.

The fully automated production process is supported by the most modern information technology, and is conducted in climate-controlled conditions.

The complete tracking of input material and products is ensured. Access to production facilities is restricted to specialized personnel.

The computerized support of production and optimization of business processes ensures responsiveness, flexibility and the timely fulfillment of delivery times also in circumstances of higher order book.

The climate-controlled warehouse with automated transport line provides the appropriate warehousing of material and products as well as timely and fast delivery in line with client requirements.

PRODUCTS AND CAPACITIES

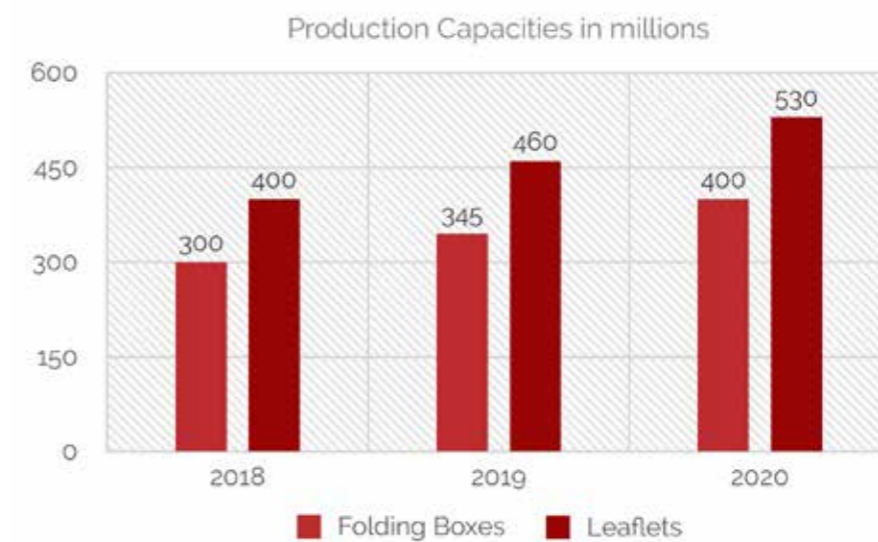

Folding boxes are produced in various formats, numerous world's fonts and languages in different combinations (the Braille font, embossing, gloss varnish, mat varnish, perforation).

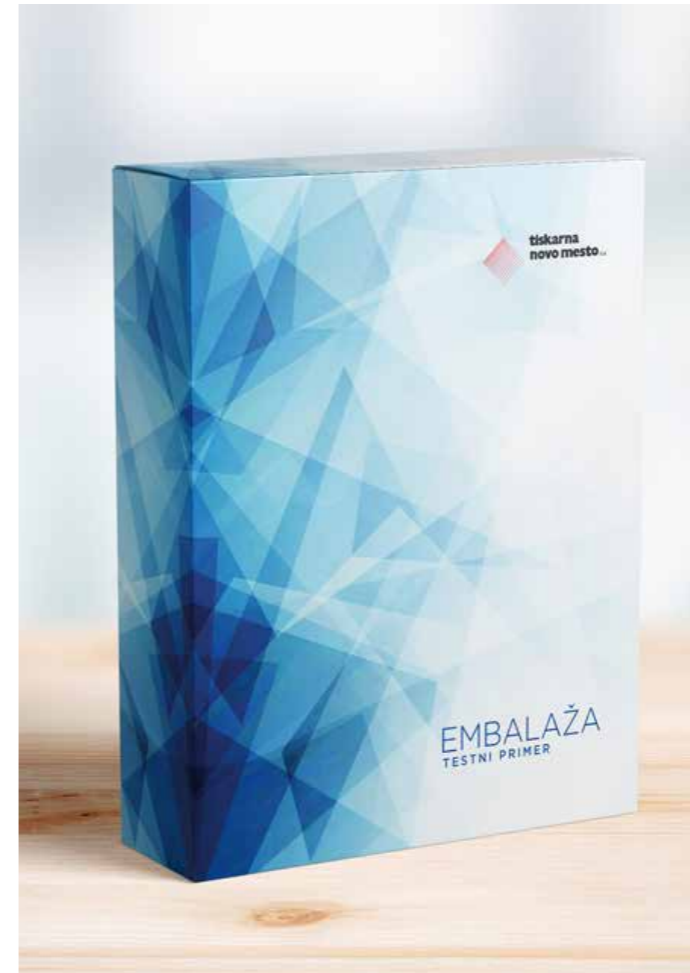

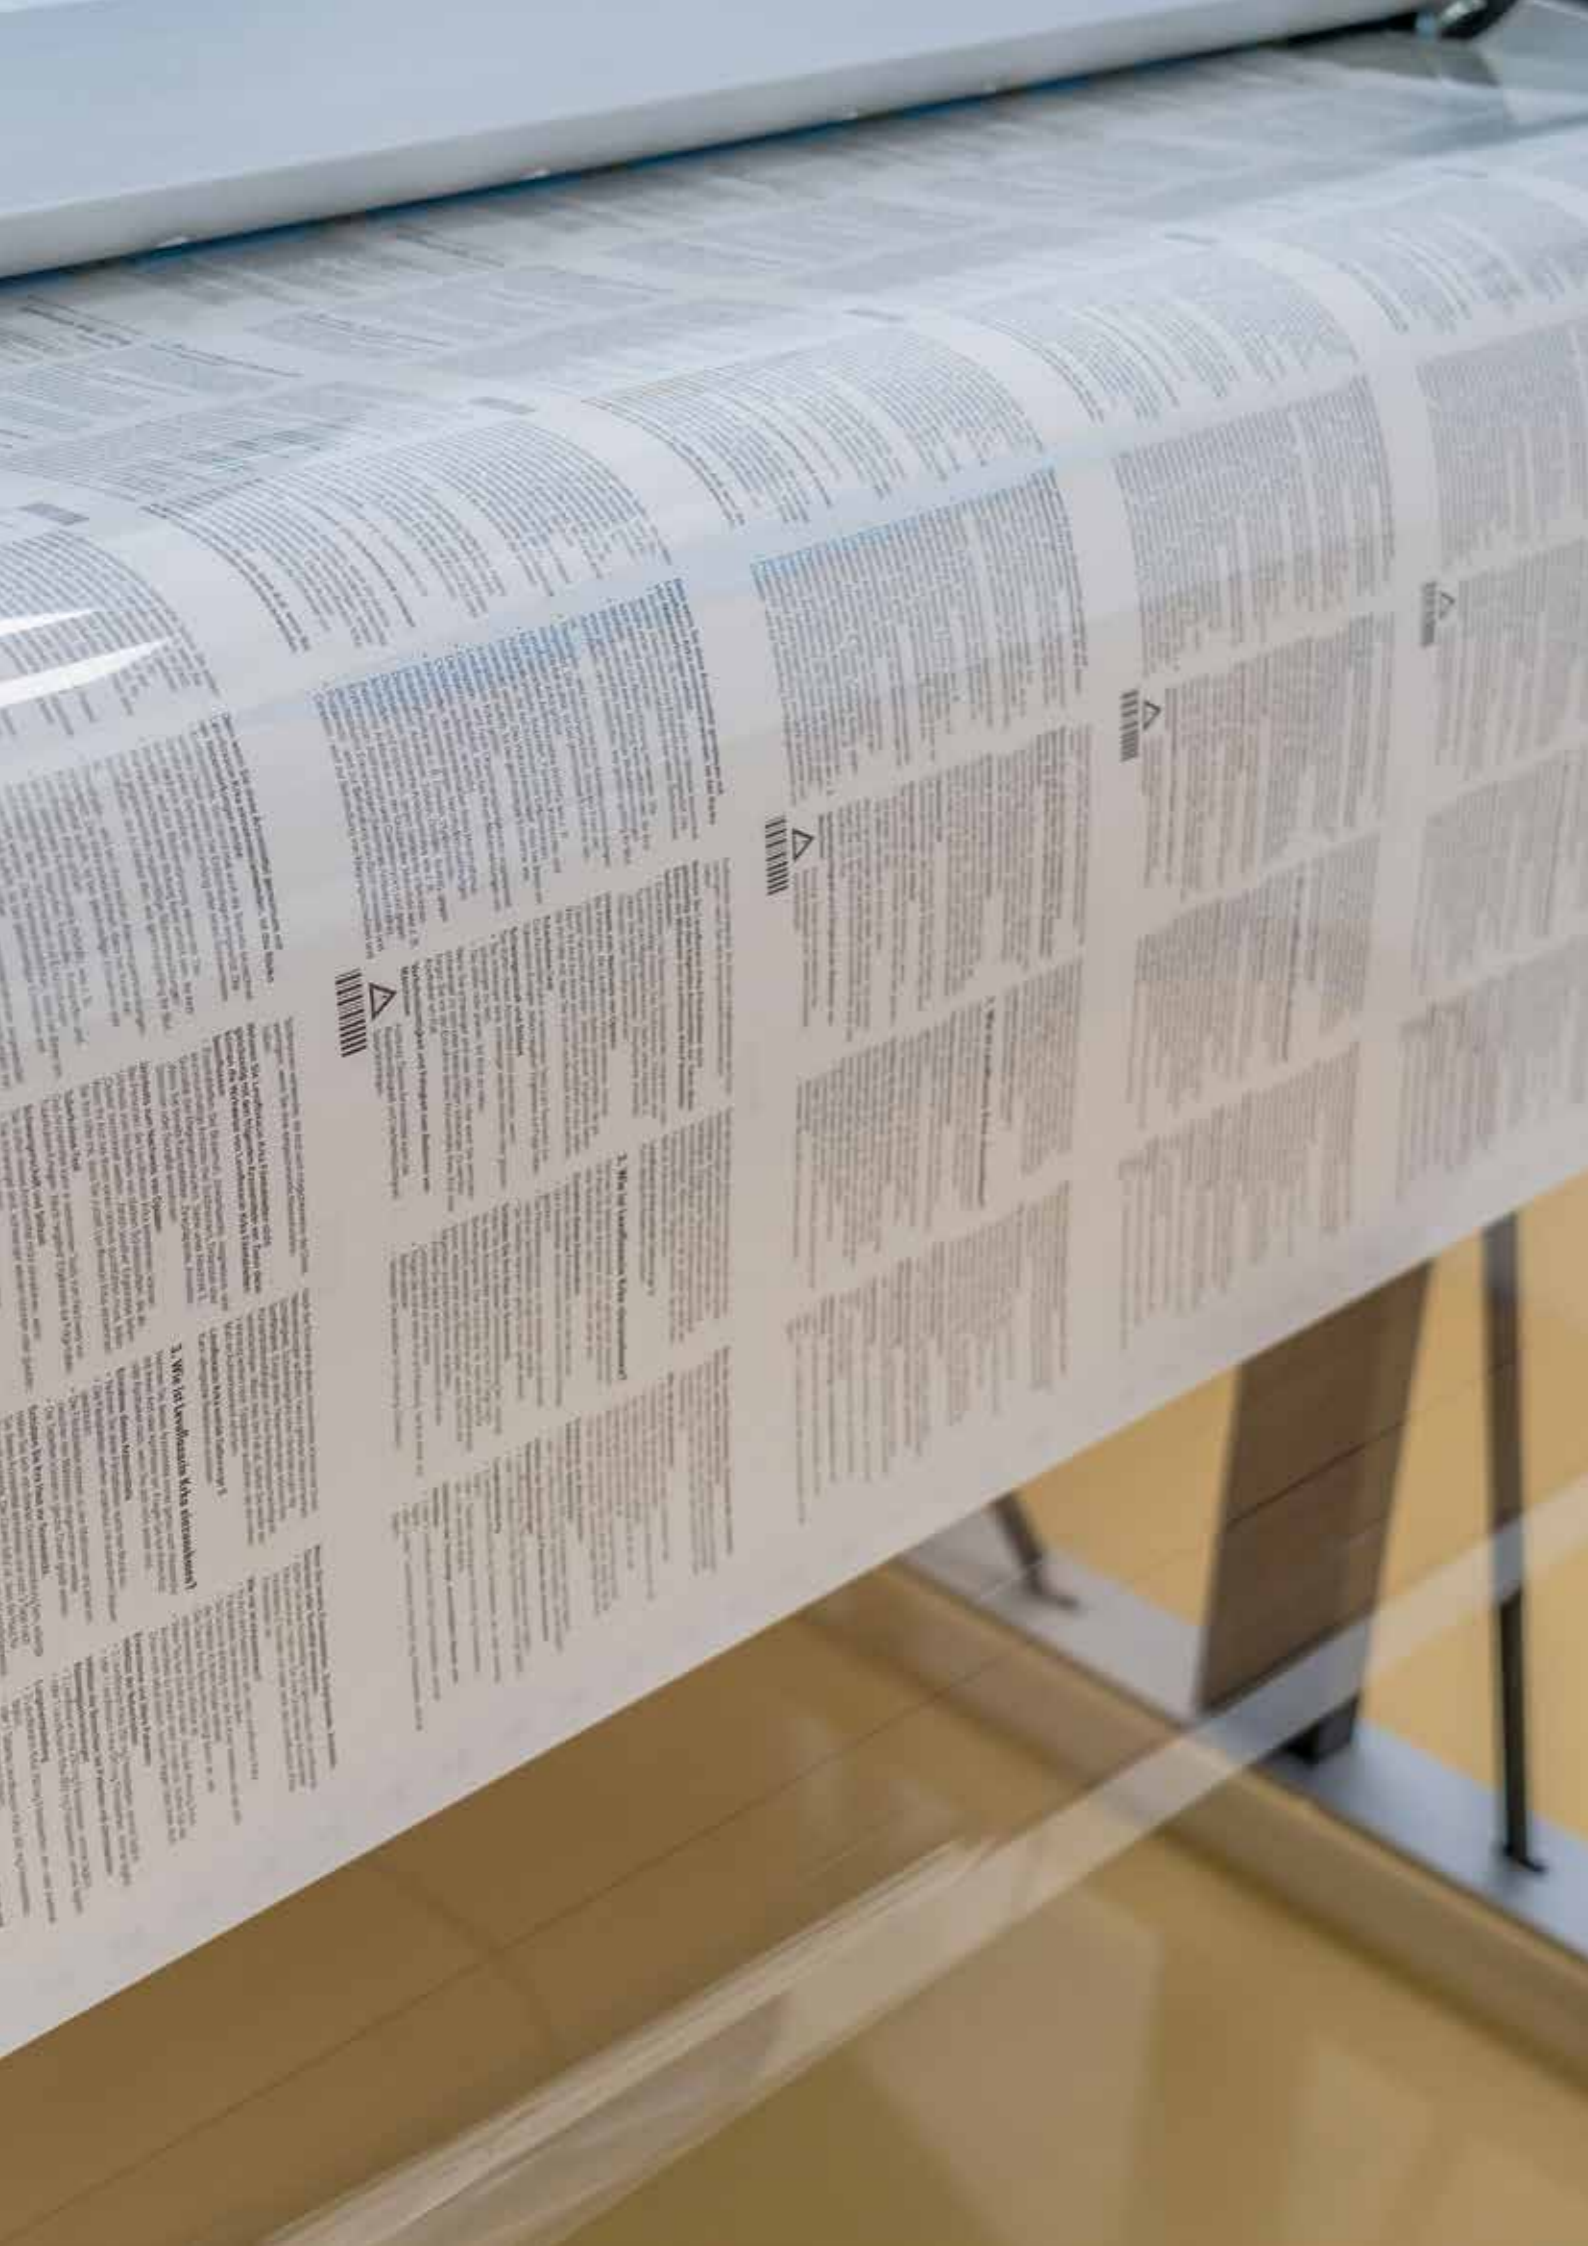

Our products are used in European, Asian, North and South American, and African markets.

We adapt to market conditions, we are innovative and strive to increase productivity and investment in know-how and development.

Yearly capacity is 300 M folding boxes and 400 M leaflets.

Production capacities are increased by 15% annually, whereby growth is facilitated by using our own resources.

FOLDING BOXES

Folding boxes are produced in various formats, shapes and colors, and can be protected with gloss or mat water dispersion varnish or the combination of both.

Paperboard of weight up to 500 g/m² is used for production of boxes.

LEAFLETS

- UNFOLDED LEAFLETS are manufactured in various formats on paper weights of 37 g/m² and higher.
- FOLDED LEAFLETS are manufactured in various formats and can be once- or multi-folded on paper weights of 37 g/m² and higher.
- FOLDED-GLUED leaflets of various dimensions up to maximum 510 mm x 1010 mm can be folded and glued several times on paper weights of 37 g/m² and higher.

MODERN TECHNOLOGY AND EQUIPMENT

PRE-PRESS is conducted by using the latest graphical applications and CTP (Computer-to-Plate) non-chemical system in order to ensure perfect match of product with client requirements.

PRINTING is conducted on cutting-edge and highly productive printing machines of globally renowned producers, which enable large format and low paper weight printing.

CUTTING and FOLDING of leaflets is done longitudinally and transversely with several parallel and cross folds with gluing.

CUTTING of folding boxes is performed on modern cutting machines, which support formats up to B1.

State-of-the-art GLUING lines with implemented controls for recognition and rejection of defective products are used for gluing of folding boxes. These production lines ensure the highest quality levels.

We facilitate an efficient consumption of all input materials and energy resources, whereby an ongoing awareness and education of employees and strict adherence to high ecological standards is conducted.

RISK MANAGEMENT

Our clients value us as consultants, developers and producers, committed to highest quality standards. Therefore, we dedicate great attention to risk identification, measurement and management.

By establishing the quality and compliance controls starting from input material, across all production phases up to final products inspection, we control the key production risks.

With the appropriate human resources policy and ongoing training we educate our employees and hence ensure continuous production process and quality of products.

We are a reliable business partner. With our customers we create and nurture long-term partner relationships.

We cooperate with certified suppliers of strategic resources and we evaluate them on a regular basis.

The company is financially stable, independent and is not exposed to financial risks.

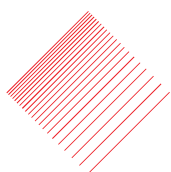

We have a long tradition, stable ownership structure and guaranteed operational continuity.

CORPORATE AND SOCIAL RESPONSIBILITY

We regularly fulfil all our contractual and legal obligations. We improve working conditions for our employees and we take care of the environment. We provide assistance to the social environment, in which we operate, by means of supporting cultural, sports, and humanitarian activities.

We have clear goals, we follow our strategy, and we are future oriented.
