

Working alongside women at every stage of their lives

Procare Health is a multinational pharmaceutical laboratory which was founded in 2012 and is focussed on women's health and well-being. We are a 100% privately owned company with an ambitious innovation model allocating 40% of our budget to R+D projects.

Our vision is to establish ourselves as one of the leading laboratories for women's health based on a streamlined and innovative development plan for new projects in order to satisfy the health and life quality during the important stages of women's lives.

Our products are based on natural treatments, patented formulas with scientific backing from the country's top experts and demonstrated clinical evidence.

We are proud of new products such as PAPILOCARE®, the first treatment for preventing and treating the cervical lesions caused by the Human Papillomavirus, and OVOSICARE®, which contributes to the normalization of women fertility.

PAPILOCARE[®]

An alternative for your patients
Now, stand up to HPV

CLINICAL
SUPERIORITY
vs wait and see¹

Don't wait. Take action

Proven efficacy in randomised, controlled trial in women
with HPV-dependent cervical lesions¹

Available in
51 countries

Over **half a million** women
treated with Papilocare[®]

PAPILOCARE®

PAPILOCARE® VAGINAL GEL IS THE FIRST TREATMENT TO **PREVENT AND TREAT CERVICAL LESIONS**◊ CAUSED BY THE HUMAN PAPILLOMAVIRUS

**EFFICIENT
ECONOMIC**
From **0,50€** per day

Efficacy of Papiocare® at 6 months vs. control group

NORMALIZATION OF HPV-DEPENDENT CERVICAL LESIONS IN

88%*

of High-Risk HPV+ patients at 6 months vs 56% in the control group

**FINAL RESULTS^{1,2}
HR-HPV**

HPV CLEARANCE

63%

of High-Risk HPV+ patients at 6 months vs 40% in the control group
