The Prescription for a Perfect Product

International Business

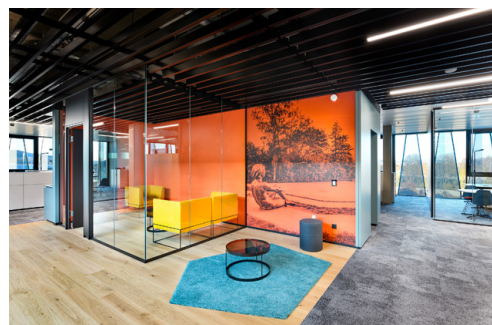

Dr. Pflieger Arzneimittel

A company that's like a big family

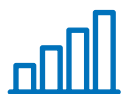

Dr. Pflieger Arzneimittel GmbH is a mid-sized producer of pharmaceuticals and medical products, with 400 employees and annual sales of € 110 million.

Founded by Professor Dr. Robert Pflieger in 1945, today the company sells more than 60 over-the-counter products and prescription drugs in Germany and other selected countries worldwide. In addition to meeting needs in the fields of urology, dermatology, and gynecology, they also include products for improving hair health and self-medicating pain and hoarseness.

The company is wholly owned by the Robert Pflieger Foundation, which receives the company's profits.

Core Competencies

We develop and manufacture products and provide advice

A formula for perfect products.

Our recipe for making perfect products involves three main ingredients: advanced production systems, production in Germany, and a strong commitment to quality.

We'll convince you with our competence.

We offer you contract manufacturing as an all-round worry-free package. You benefit from our deep expertise, our many years of experience developing and producing medical products, and full support for dealing with all regulatory matters.

Our activities are based on a strong customer focus and trust.

We're committed to treating our customers, business partners, and employees appreciatively and transparently. Which is why we go out of our way to provide reliable, comprehensive advice, cultivate open, trust-based customer relationships, and always communicate with our business partners as equals that we appreciate and take seriously.

SPASMEX[®] 15 30 45

Dr. Pflieger's Breakthrough for Treating Overactive Bladder

Dr. Pflieger drove a major improvement in the treatment of overactive bladder (OAB) by introducing a unique quaternary ammonium compound.

Available in flexible doses of 15, 30, and 45 mg, the treatment can be flexibly adjusted to meet each patient's needs. After being launched it quickly gained international recognition for its effectiveness and has already been approved in 38 countries across Europe, Asia, and Latin America.

Our in-house development team led the entire development process from formulation all the way to extensive clinical studies. These efforts resulted in the highest level of clinical proof, with Level 1 evidence and Grade A recommendations from expert groups internationally. This has confirmed its value as one of the world's foremost treatments for OAB.

**THE ONLY
QUATERNARY
AMMONIUM
COMPOUND IN
THE MARKET**

Unlike competing products that rely on tertiary compounds, this innovative solution stands out as the “four-leaf clover” in the field of OAB therapies. It is a novel and highly effective approach for managing this condition.

Spasmex[®] 15, 30, 45 mg

Active ingredient: tropium chloride

Available as: film-coated and uncoated tablets
