About us

INTERMED S.A.

Value for people, responsibility towards Society

InterMed was founded in 1996 with the vision of creating a pioneering manufacturing industry in the medical field, to contribute to the care and treatment of everyday needs, as well as specific health and wellbeing issues that affect modern humans.

During the years of its operation, InterMed has demonstrated a continuing upward course, focusing on exploring future prospects with regard to international scientific developments and constantly expanding its product portfolio, which is prominent for innovation and quality. The result of this course has been the establishment of InterMed in the Greek and international markets with brands such as Algofren, Unisept, Chlorhexil, Eva, Reval, Luxurious, and others. The firm now exports to as many as 36 countries around the world, within the Group's international network which covers over 66 countries.

The firm's corporate strategy and contribution to the community are supported by its continued efforts for development, and the commitment and expertise of its experienced and well-trained personnel.

InterMed stands out not only for its dynamic brands and financial results, but also for its Social Responsibility policy.

Our mission, vision and values

Our Vision: The contribution in healthcare and improvement in the quality of life of modern humans, through the development and production of innovative products.

Our Mission: The development, production and distribution of innovative pharmaceutical and para-pharmaceutical products, covering the daily, general and specific needs of modern humans.

Facilities

The firm's headquarters are located in the northern Athens suburb of Kifissia, in a modern building complex of a total floor space of 17,000sqm. The premises comprise of:

- Headquarters and Laboratories: 8,000sqm
- Industrial Facilities: 4,000sqm
- Finished Product Warehouse: 2,000sqm
- Other Storage Facilities: 3,000sqm

Research & Development Cutting- edge Technology

We are committed to research, since innovation is our daily concern, in order to offer solutions of high added-value and quality. The R&D Department collaborates directly with both the Quality Control Department and the Production Department. In addition, this department monitors new legislation related to InterMed activities, as well as innovations in pharmaceutical and cosmetic technology, thus ensuring that InterMed is in the forefront of industrial development.

Department of Pharmacology and Cosmetic Technology

The Department of Pharmacology and Cosmetic Technology is responsible for developing new products and technologies. It is staffed with highly-trained scientists who, through collaboration with research teams and Academic Institutions all over the world, apply the latest knowledge which it transforms into new innovative products consistent with the needs of modern humans, aiming at improving their quality of life.

Regulatory Affairs Department

The RA Department is responsible for the creation of the necessary files for the scientific documentation of products developed by InterMed pharmaceutical laboratories. It is also responsible for planning, organizing and supervising clinical studies, in collaboration with universities, research centres and independent institutions in Europe.

Commitment to Quality

InterMed's basic commitment is to identify and meet the needs of modern people by applying the current legislation and continuously improving customer satisfaction, product quality, social and environmental contribution.

InterMed manufactures its products in accordance with applicable Good Manufacturing Practice (GMP) using pure, pharmaceutical grade materials.

To ensure excellence in its way towards quality, InterMed has been certified according to:

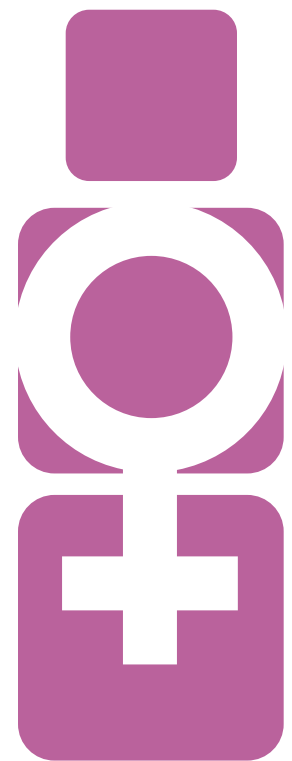

- EN ISO 9001:2008, for applying a quality management system in all processes;
- EN ISO 13485:2012, for applying a quality management system in development, production and distribution of medical devices;
- EN ISO 14001:2004, for applying an environmental management system.

FEMININE CARE

Daily Intimate Protection

Eva Intima® Wash Original Dermocosmetic Herbs + Vitamins

USES Feminine intimate area cleansing and deodorizing solution, for all skin types and in any season, which does not contain soap. With its special dermocosmetic herbs and vitamins it is suitable for the daily hygienic care of the sensitive intimate area, because it gently cleans and relieves the area from unpleasant odor, without drying or irritating the skin, as it has a natural pH 3.5.

FORMS & PACKAGING | BOTTLE
250ml

Eva Intima® Wash Special Dermocosmetic Herbs + Vitamins

USES Female intimate area cleansing and deodorizing solution, especially for warm months, for women who engage in sports and during menses, which does not contain soap. With its special dermocosmetic herbs and vitamins it is suitable for the daily hygienic care of the sensitive intimate area, because it gently cleans and relieves the area from unpleasant odor, without drying or irritating the skin, as it has a natural pH 3.5.

FORMS & PACKAGING | BOTTLE
250ml

Eva Intima® Wash Herbosept Dermocosmetic Herbs + Vitamins

USES Female intimate area cleansing and deodorizing solution, for use during menses, after labor, in cases with rubor or light incontinence and generally for women who attend gyms, swimming pools and other areas with an increased risk of infection. With its special dermocosmetic herbs and vitamins it is suitable for the daily hygienic care of the sensitive intimate area, because it gently cleans and relieves the area from unpleasant odor, without drying or irritating the skin, as it has a natural pH 3.5.

FORMS & PACKAGING | BOTTLE
250ml

Eva Intima® Wash Extrasept Dermocosmetic Herbs + Vitamins

USES Gentle, natural cleansing and deodorizing solution with mild antiseptic and anti-itch properties. It effectively fights microorganisms and does not contain soap. Due to the dermocosmetic herbs and vitamins it contains, it protects the intimate area from irritations while providing increased antiseptic protection, without disturbing the area's natural balance. It is recommended by the Medical Field for the hygiene of the sensitive area and also for relief from irritations and inflammations, because it cleans gently and relieves the area from unpleasant odors, without drying and irritating the skin (due to its specially designed formulation and natural pH 3.5).

FORMS & PACKAGING | BOTTLE

Eva Intima® Wash Diabetel

Unique combination of Cranberry extract, α-Glucan & Hyaluronic acid

Dermocosmetic Herbs + Vitamins

USES

EVA INTIMA® WASH DIABETEL appeals to girls and women that suffer from diabetes and aim to cover their special needs when cleansing the intimate area. Due to increased concentration of sugar in the vagina, a favorable environment for the development of microorganisms is created, both intravaginally and in the perinatal area, which often leads to irritations and infections. At the same time, problems often occur such as dyspareunia, vaginal dryness and burning sensation. EVA INTIMA® WASH DIABETEL is developed based on the special needs of diabetic women and offers gentle cleansing and mild antiseptic action, as it contains:

Combination of α-Glucan & Natural Extracts of Cranberry & other herbs

Enhances the natural flora, with respect to the sensitive balance of the area.

Helps to protect from burning & itching sensations, vulvovaginitis and ascending urinary tract infections.

Lactic Acid Naturally maintains the pH to normal levels.

Hyaluronic Acid It seals the natural moisture of the area, protecting against dryness and irritations.

Unisept® Implants Mouthwash (Medical Device)

Hydrogen Peroxide - Sodium Hyaluronate

USES Unisept® Implants Mouthwash comes to contact with saliva and disintegrates, releasing “active oxygen”. Its constant release creates a rich oxygen microfoam that effectively breaks down and removes food remains and muco-bacterial plaques from the space between teeth and contact points of implants and gums.

- Complete cleansing and multiple protection of the oral cavity thanks to hydrogen peroxide
- Strengthening the soft tissues of the oral mucosa thanks to hyaluronic acid

 FORMS & PACKAGING | BOTTLE
250ml

Unisept® Implants Toothpaste

Calcium Peroxide - Hydroxyapatite - Enzyme system

USES UNISEPT® Implants Toothpaste is an innovative toothpaste specifically designed for everyday use. It is intended for use by people with dental implants and helps to clean the area around the implants, while at the same time it protects them thanks to calcium peroxide and the enzyme system. It helps to the strengthening of enamel thanks to hydroxyapatite crystals, and the low concentration of fluoride contributes to the protection of implants from oxidation.

- Complete cleansing and protection of the oral cavity thanks to calcium peroxide and enzyme system
- Enhancement of enamel thanks to hydroxyapatite crystals
- With low fluoride concentration for the protection of dental implants from oxidation

Unident® Dental Conditioner

With bioactive hydroxyapatite nanocrystals & herbal extracts

UNIDENT® Dental Conditioner is an innovative product that aims in reconstructing the enamel as its action is based in bioactive hydroxyapatite nanocrystals. Those high purity hydroxyapatite nanocrystals are of similar structure with the inorganic part of the dental tissue and due to their strong adhesion on it they help in effectively correcting any structural imperfections. The action of UNIDENT® Dental Conditioner is completed by effectively fighting against dental plaque and improving gum health, offering a bright smile.

Contributes to:

- Mineralization of dental carries
- Sealing of dental tubulens and reduction of dental sensitivity
- Tightening and strengthening gums
- Fighting dental plaque

For Professional Use

Eudent® ED-Prep (Medical Device)

Urea peroxide 10% & EDTA 15%

Cream for the chemical-mechanical preparation of root canals, with Urea peroxide & EDTA

- Helps clean and open the root canals, due to the EDTA it contains which removes calcium salts while enhancing the penetration of pharmaceutical substances.
- Helps control bacteria, especially anaerobic ones existing in the root canal.
- Helps remove dead tissue and dentin debris from the root canal due the oxygenated microfoam which it produces locally when it comes in contact with the walls of the root canal.
- Helps in the internal whitening of the tooth.

Indications Cleaning and preparation of root canals in combination with Eudent ED-Chlor (3% sodium hypochlorite solution).

FORMS &
PACKAGING

3 syringes x 2,5ml & 3 nozzles. **For Professional Use**

Eudent® ED-Clean (Medical Device)

Chlorhexidine Digluconate 2%

Aqueous 3% sodium hypochlorite solution for the irrigation and disinfection of root canals

- EUDENT ED-clean is used prior to dental sealing (temporary or/and permanent) and in dental restoration.
- EUDENT ED-clean is recommended for interdental disinfection, for use as a final interdental rinsing solution prior to root canal sealing and for use as a disinfectant prior to covering dental pulp.
- EUDENT ED-clean helps prevent the inflow of microorganisms in the dental microtubules. The possibility of consequential pulpitis and sensitivity is decreased by thorough cleaning and disinfection using Eudent ED-clean before sealing and restoring the tooth.

Indications Cleaning and chemical opening of root canals.

FORMS &
PACKAGING

Bottle of 200ml
For Professional Use

Eudent® Eugenol

Pure eugenol (≥ 99%)

EUDENT® Eugenol is a product widely known for the preparation of formulations for dental fillings. Eugenol, a natural component of clove oil, is supplied in chemically pure form with increased activity. It is used in cases of severe pain in the teeth, due to decay which can be penetrated up to the tooth nerve. Mixing it with zinc oxide provides a material with excellent sealing properties. It acts as a temporary restorative material both for dental fillings and as a lining material when correcting an unrestored resin.

FORMS &
PACKAGING

Bottle of 30ml
For Professional Use

Eudent® Caries Indicator (Medical Device)

The product pigments and reveals carries in areas hard to locate. This way excessive drilling of tooth decay can be avoided. The product can also be used for the fast and easy localization of the root canal opening. When the product is used for the localization of root canals at the early stage of an interdental procedure, a small red spot will remain on the root canal opening.- To remove carries, use a low speed drill. Repeat as many times as necessary until all tooth decay is removed.

Indications Carries indicator that colors decayed dentin

For Professional Use

Sun Care Products

Luxurious® Sun Care Silk Cover

with Hyaluronic Acid

USES Luxurious® Sun Care Silk Cover (Beige, Bronze & Beige) is a very high protection sunscreen for the face, which offers light coverage and silky skin, with a matte result. Its special composition, enriched with Hyaluronic Acid, seals the moisture of the skin, promoting its natural regenerating ability. In the meantime, due to the Vitamin E it contains, it protects against free radicals and moisturizes deeply, blocking any dehydration and photoaging caused by solar radiation.

- Water-resistant composition
- Natural, fine coverage
- Silky texture
- Matte finish
- No white finish during application
- Suitable for all skin types
- Paraben free
- Fragrance free

Luxurious® Sun Care Anti-Pollution Protective Face Cream

with Vitamin C & E, Panthenol, Hyaluronic acid & Polysaccharide Matrix

USES Luxurious® Sun Care Anti-Pollution Cream protects the skin from premature ageing, caused by solar radiation and air pollution. It moisturizes and revives tired skin, offering a radiant and youthful appearance. Contains a clinically tested polysaccharide that creates a protective film on the skin, which allows it to breathe while shielding it against pollutants, such as particulate matter, heavy metals and UVA & UVB radiation. It has a non-oily texture and it is the ideal base for flawless, long-lasting make up application.

- Advanced protection from harmful UVA & UVB radiation, pollutants & free radicals
- Refined skin texture

Diabetel[®] MD 10% (Medical Device) Hyper - Moisturizing & Repairing Foot Cream

USES Diabetel[®] MD 10% is a scientifically designed cream for the care, treatment and protection of diabetic foot skin. It contains 10% urea, which in combination with its specially selected ingredients provides intensive moisturization to dry skin, aiding in the active bonding of moisture on the skin. With the omega 6 and omega 3 essential fatty acids it contains it restores the skin's natural hydrolipid balance. Diabetel[®] MD 10% helps reduce hyperkeratosis of the skin and calluses, smoothing and softening rigid and cracked foot skin.

Diabetel[®] MD Lotion Moisturizing & Softening Hand - Body Lotion

USES Diabetel[®] MD Lotion is a moisturizing and softening hand and body lotion for the fast relief from dry skin symptoms and the protection of diabetic skin. With its formulation rich in moisturizing, softening, nourishing and dermoprotective ingredients it helps the skin maintain its valuable moisture and repairs dry skin problems such as peeling, cracking and redness. Diabetel[®] MD Lotion covers the skin with a thick homogenous protective film that softens the skin and helps in the restoration of its essential hydrolipid balance. It is 100% lanolin, vaseline, fragrance and color free and suitable for even the most sensitive skin. With its fine texture it spreads easily and is quickly adsorbed without leaving a greasy feeling on the skin.

GASTROINTESTINAL Laxative Products

Medilax[®]-N For Children & For Adults

Rectal Suppositories with Chamomile and Mallow extracts

USES Medilax-N[®] is a product in the form of suppositories for the treatment of constipation caused by partial stool blockage, in a natural way. It has been specially designed to facilitate bowel movement in cases of constipation, while reducing rectal sphincter tenesmus and soothing rectal irritation and burning. Medilax-N[®] suppositories have no pharmacological effect and do not cause tolerance. After being inserted in the rectum, the Medilax-N[®] suppository is dissolved within a few minutes, creating microbubbles (effervescent action), which apply pressure to the walls of the intestine, pushing stool out from the large intestine.

FORMS & PACKAGING

SUPPOSITORIES FOR CHILDREN:
12 x 1,5 g suppositories in blister packaging
SUPPOSITORIES FOR ADULTS:
12 x 3,0 g suppositories in blister packaging

Eva Lax[®]

Suppositories with effervescent laxative action

USES EVA LAX[®] is special designed rectal suppositories with effervescent action which facilitate the removal of impacted feces with the easiest and painless way due to gradually release microbubbles. At the same time, with the chamomile extract containing relieve irritated intestinal lumen and reduce the burning sensation and pain in the anal sphincter. Effective non pharmacological activity, without the risk of tolerance.
