

# Open Innovation Zentiva

With a direct link to submit innovative projects, we are **widening the pool from which our future value-added medicines can be selected from.**

Are you thinking on how to improve current medicines? Do you see any unmet patient need? Or a possibility to simplify administration pathways and increase patient compliance? These are a few of the **many areas where we can work together to create medicines with added values for our patients.**

We are working on new dosage forms, drug delivery systems, technologies, drug substance combinations, and many more, that can help patients and **meet currently unmet needs.**

We leverage on our **long-term experience** in preformulation area, API and formulation design, analytical techniques, clinical studies and regulatory strategies design to **offer opportunities to industrialize innovative proposals.**

**Share your idea with us,  
we'll make it happen together!**

**Submit your idea at:**
