

PERLALUX[®] - Tristar

PERLALUX® - Tristar

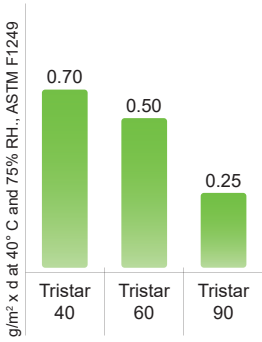

PERLALUX® - Tristar is a composite film with PE intermediate layer for improved thermoforming. Especially suited for hygroscopic products requiring high barrier packaging.

Benefits and Properties

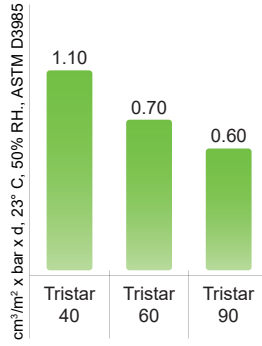

- produced according to GMP and ISO 15378 standards
- polyethylene (PE) intermediate layer provides higher flexibility
- suitable for hygroscopic products for use in demanding climate zones
- excellent processing properties
- suitable for standard and complex blister design
- wide range of specifications
- available in transparent and white, colours on request
- optional UV light protection

Water Vapour Transmission Rate

Oxygen Transmission Rate

Cross-Section

Range of Tristar Blister Films

40 g/m² PVdC

60 g/m² PVdC

90 g/m² PVdC
