

Caroclear™ MDL 60

High quality PET G film for medical packaging

- Excellent clarity and impact strength
- Full biocompatibility : EN 10.993 and EN 11.607 – USP VI
- Designed for sterilisation: ETO, gamma, electron beam, gas plasma.
- Easy to process (thermoforming and welding)
- No risk of crystallisation
- Low particle generation on cutting for cleanroom processing
- Excellent regularity of anti-block (Internal or surface coating)
- High level of traceability and process control
- Produced in BRC IOP protected environment
- Available natural and blue tinted
- Gauge from 200 microns up to 1,50 mm

A Glycol Polyethylene Terephthalate (PETG) film specially developed for the packaging of medical devices, catheters, implants & prothesis.

This material is extruded from **100% PETG Medical resin** providing full biocompatibility and meeting FDA and European Medical standards.

Caroclear MDL 60 films are manufactured in a protected environment under **BRC IOP** standards with **strict quality controls and full traceability**.

Areas of application:

Caroclear MDL 60 films are optimum for the manufacturing of **rigid medical blisters and clear trays for implants and medical devices such as:**

- Blisters for implants (Orthopedic, dental implants...)
- Trays for diagnostic and interventional surgery kits
- Blisters for medical devices...

Key product benefits:

- Full biocompatibility and traceability on raw material - USP VI
- Excellent transparency & High impact resistance
- Manufactured under BRC IOP standards
- Technical reliability during all process stages (converting & sealing)
- Low particle generation during cutting for cleanroom converting
- Available in custom made rolls from 0,2 mm up to 1,5 mm

**Close to our
Customers in Europe**
