

Looking for (im)perfection

PRODUCT RANGE

We are the leader of turnkey vision inspection systems for the industrial, pharmaceutical and cosmetic sectors.

With long experience in a wide variety of industries, **we can develop tailored solutions for any application.**

We operate all over the world: we have a subsidiaries in North America and one in China, and we have over 1500 machines installed in 45 countries.

headquarter and subsidiaries 
macchines installed worldwide

MiniMatliX

VERY SMALL GENERIC PARTS

version	type	field of view (mm)	thickness (mm)	material
-	7	1.2 - 7	0.26 - 1	rubber plastic PTFE metal
	12	1.8 - 12	0.26 - 1	
	20	2.5 - 20	0.5 - 5	

MatliX

SMALL GENERIC PARTS

version	type	field of view (mm)	thickness (mm)	material
DS	35	3 - 35	0.9 - 9/25	rubber plastic PTFE metal
	50	3 - 50	0.9 - 9/25	
OS	35	3 - 35	0.9 - 9/25	
	70	3 - 70	0.9 - 9/25	

SmartMatliX

GENERIC SMALL PIECES

version	type	field of view (mm)	thickness (mm)	material
-	35	3 - 35	0.9 - 5	rubber plastic PTFE metal
	50	3 - 50	0.9 - 5	

OPTIONAL

PhoeniX

SMALL AND MID-SIZED GENERIC PARTS

version	type	field of view (mm)	thickness (mm)	material
-	50	4 - 50	0.9 - 9/25	rubber plastic PTFE metal

MiniMatliX, MatliX, PhoeniX and ScrappiX are automatic visual inspection machines for high precision control of small and mid-sized gaskets, seals and generic parts made of rubber, plastic, PTFE and other materials. SmartMatliX is the basic version of the MatliX machine, it offers great value for money and it can be remotely upgraded with the new Artificial Intelligence option at any time. StretchX can control the presence of cuts or tears thanks the elongation and deformation of through the traction unit, while BigX is specifically designed to inspect large O-rings.

ScrappiX

SMALL AND MID-SIZED GENERIC PARTS

version	type	field of view (mm)	thickness (mm)	material
-	35	4 - 35	0.9 - 9	rubber
	70	4 - 70	0.9 - 9	plastic
	90	20 - 90	0.9 - 9	PTFE metal

StretchX

SMALL AND MEDIUM-SIZED O-RINGS

version	type	field of view (mm)	thickness (mm)	material
-	72	25 - 72	1,50 - 3,53	rubber

BigX

LARGE-SIZED O-RINGS

version	type	field of view (mm)	thickness (mm)	material
-	150	70 - 150	1.50 - 5.33	rubber
	200	70 - 200	1.50 - 5.33	

SPECIAL DIVISION

GasketX controls frames of various shapes, while SqueezeX can detect nearly invisible closed cuts in O-rings and generic rubber parts. LoringX, RollinX, ProfiliX and BlynX are tailor-made for very specific vision inspection tasks.

GasketX

FRAMES

version	type	field of view (mm)	thickness (mm)	material
-	240	240x240	15	rubber plastic
-	500	240x500	15	PTFE

SqueezeX

TO DETECT CLOSED CUTS

version	type	field of view (mm)	thickness (mm)	material
-	20	3 - 20	1 - 5	rubber

LoringX

EXTRA-LARGE O-RINGS

version	type	field of view (mm)	cross section (mm)	material
-	-	250 - ∞	1.78* - 12	rubber

*as a function of diameter

RollinX

SPHERES

version	type	sphere diameter (mm)	material
-	-	2 - 10	any kind of material

UTPVISION LAT 313 ACCREDIA

UTP Vision's **LAT 313** Center is **the first metrological laboratory accredited** by the independent accreditation body Accredia, for the diametrical optical measuring system.

ACCREDIA guarantees the **competence, independence, and impartiality** of the LAT 313 Centre. In this way, UTP Vision helps to stimulate the circulation on the market of reliable inspection instruments, issuing internationally recognized calibration certificates (EA, ILAC).

UTP Vision operates in compliance with **UNI CEI EN ISO/IEC 17025:2018**, a decisive factor for customers who must guarantee the quality of their products in highly demanding sectors, such as automotive certification (IATF 16949). Compliance of products and services is guaranteed in full compliance with current technical regulations.

UTP Vision considers the application of a Quality Management System compliant with the requirements of **UNI EN ISO 9001:2015** as a tool for constant growth.

What makes UTPVision's inspection machines unique is the innovative **Artificial Intelligence software (AIs)**, which twists the traditional image processing methods based on manually set thresholds. With AIs, the operator just needs to collect a series of significant samples that well represent the range of defects to be found. Thanks to the SVL (SuperVised Learning) procedure, the machine can be quickly trained to discriminate and classify defects according to the user's needs.

UTPVision's patented **Color Vision** technology is the result of years of constant innovation in machine vision solutions. Our automated inspection systems leverage multiangle and **multicolor** illumination to detect even the most critical surface defects, delivering cutting-edge performance and unmatched flexibility for the inspection of different color parts.

MaviX is the dedicated software for monitoring and managing automatic and manual visual inspection systems, specifically designed for use in the rubber-goods sector. The MaviX suite consists of two independent modules: **MaviX-A** for automatic sorting operations and **MaviX-M** for those of manual nature. MaviX-A is a perfect solution to streamline automatic visual inspection machines in order to benefit from the advantages brought about by **Industry 4.0**
