

THE BEST INVESTMENT FOR YOUR HEALTH!

Experience, Expertise and Passion as a guarantee of Innovative, functional and high-quality products

Medibase Group is one of the first Italian companies operating within the nutraceutical, phytotherapy and medical nutrition sector since 1995 and from 2004 operates also in ophthalmic field under brand **Oftal Pharma**.

The passion for the well-being and health combined with pharmaceutical expertise of CEO and the company founder graduated in Chemistry and Pharmaceutical technologies at University of Florence are the guarantee of innovative, functional and high-quality products.

Medibase products are dedicated to General Practitioners and Specialist medical doctors, and they are distributed in Italy through pharmacies and sold to private and public hospitals.

The close collaboration of R&D with professional team of external consultants, Medical and Regulatory Affairs specialists, hospitals and universities are the guarantee of compliance with regulatory and quality standards. Many of our products and active ingredients are supported by scientific publications and our formulations are covered by patent and one of them an European level.

The manufacturing sites complies with
EN ISO 13485:2016 UNI EN ISO 9001:2015, GMP and FDA standards.

PRODUCT CHARACTERISTICS

Our formulations are the result of an accurate scientific research and assessment of the raw materials starting from the choice of highly standardized extracts, with thorough attention to the development of complete and balanced formulations, combined with the choice of the most suitable pharmaceutical form by using the latest pharmaceutical technologies.

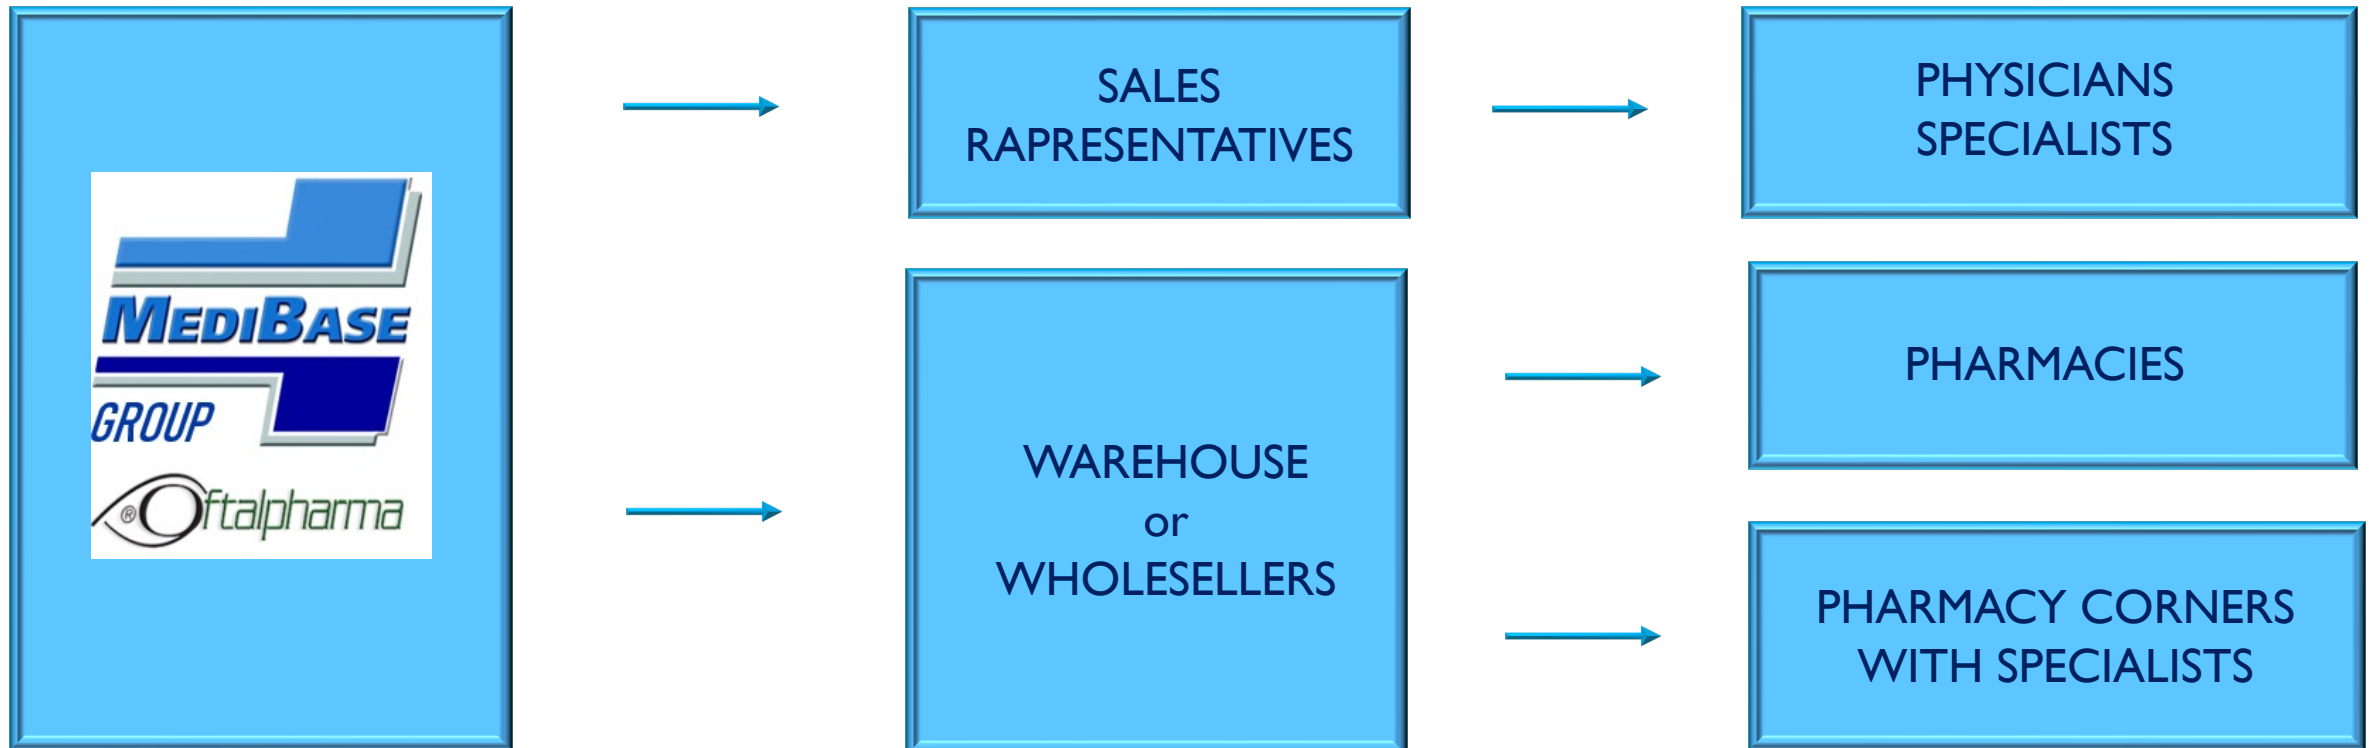

- Extracts with the highest allowed available titrations
- Standardized extracts are guarantee of well defined and stable pharmacological activity for each batch
- Limited daily doses (compliance)
- Clear product composition
- Original packaging is in double language (Italian/English) and contains patient information leaflet
- Product name on the box in Braille language

OUR BUSINESS MODEL

Our products has been developed on base of scientific research and the dosage of the active ingredients is high enough to be effective. Our products are high quality products with innovative composition and the active ingredients in synergistic action between them.

For this reason in Italy and in many foreign countries, our business model is the promotion of our products exclusively through the network of representatives directly to the physicians and specialists, and the products are available above all (not only) under prescription.

Because we believe that in this way the high functionality and quality can be appreciated.

Emosid® is an iron Fe⁺⁺ and Vitamin C dietary supplement conveyed within a patent Phytosoma® structure

Vitamin C, Folic acid, Vitamin B6, Vitamin B12 and Copper.

Adjuvant in the various hemoragic treatments

Food Supplement

Shelf life: 36 months

P.P. Italy 23,50€

Emosid®

Emosid® is a supplement based on Phytosomal Iron®. The use of Phytosomal Iron® helps the patient to completely eliminate the typical disorders associated to the use of oral iron. Phytosomal Iron® is registered trademark of Medibase srl. The bioavailability of Fe⁺⁺ present in Emosid® is particularly high due to the innovative use of the double layered form of active Phytosoma, due to a particular and patented technology Phytobilayer®

Phytosomal Iron® crosses the gastric barrier intact and is absorbed in the intestine without causing the typical disturbances of martial treatment such as gastritis, feeling nauseous, the darkening of mucous membranes and faeces or a metallic aftertaste. Iron Fe⁺⁺ contributes to the formation of red blood cells and the function of the immune system, to the normal transport of oxygen in the body and helps to reduce tiredness and fatigue. It contributes to normal cognitive function, to help children with learning difficulties, it protects cells from oxidative stress and helps prevent the loss of bone mass. Copper and Vitamin C contribute to the normal transport and absorption of oral iron in the body. Folic acid contributes normal haematopoiesis.

Ingredients

Capsule contents: Ferrous sulphate and phytosomal Vitamin C (zinc sulphate, ascorbic acid, sunflower lecithin), Vitamin C, bulking agent: dibasic calcium phosphate, copper gluconate, anticaking agents: Magnesium salt of fatty acids, Silicon dioxide (silica); Vitamin B12 tit. 0.1% (cyanocobalamin, maltodextrin, acidifiers: citric acid, trisodium citrate), Pyridoxine hydrochloride, Folic acid (Pteroylmonoglutamic acid). External casing: hydroxypropylmethyl cellulose, Colouring: Titanium dioxide.

How to use

Take one capsule per day. Do not exceed the recommended dosage.

Warnings

Keep in a cool and dry place. The minimum conservation period refers to when the packaging is intact and correctly preserved. Keep out of reach of children under 3 years old. Dietary supplements are not to be considered as a substitution of a varied diet and a healthy life style.

Prebiotic®

Prebiotic® is a dietary supplement composed by a balanced culture of live microorganisms (probiotics) and fructo-oligosaccharides (prebiotics); it is therefore a Synbiotic. The living active microorganisms of Prebiotic® when administered in the required dosage, are able to reproduce themselves in the gut thereby giving a beneficial effect to the body. The fructooligosaccharides used in Prebiotic® are short chain glucides which have a bifidogenic activity already at the daily dosage level of 2,5 g especially towards bifidobacteria and lactobacilli. Prebiotic® contains genetically identified strains. Prebiotic® is effective in any gastrointestinal disorders of different origins.

Composition

Fructo-oligosaccharides, Maltodextrins, Strawberry flavor, Vanilla flavor, Lactobacillus salivarius Ls-33, Streptococcus thermophilus SP4 (Streptococcus thermophilus, maltodextrin), Bifidobacterium bifidum/Bifidobacterium lactis Bb-02, Lactobacillus acidophilus LA3 (Lactobacillus acidophilus, maltodextrin), Lactobacillus bulgaricus SP5 (Lactobacillus bulgaricus, maltodextrin), natural Lemon flavor, Lactobacillus casei BGP 93 (Lactobacillus casei, maltodextrin).

Posology

Adults and boys 1-2 sachets daily. Dissolve the contents of one packet in a glass of water; mix until completely dissolved, then take orally.

Warnings

Store in a cool and dry place. The expiry date refers to the product in the integer container, properly stored. Keep out of children's reach (less than 3 years old). Supplements cannot be considered as a substitute of a balanced diet and a healthy life style.

**Very high dosage probiotic
(10 Bln Lactobacillus Reuteri)**

Food Supplement

Shelf life: 24 months

P.P. Italy 16,00€

Reuten®

Reuten® is a probiotic containing Lactobacillus reuteri. L. Reuteri is considered one of the few native species of lactobacilli and is widely used for its probiotic properties, as a treatment for rebalancing the gastro intestinal bacterial flora. Lactobacillus Reuteri is highly effective in bacterial and fungal vaginal infections, as well as in infections of the lower urinary tract. The security of L. reuteri has been repeatedly demonstrated in healthy adults, immunocompromised patients, in children, documenting that L. reuteri is a probiotic effective and safe in all age groups. Clinical data show that L. reuteri colonizes the gastric and intestinal epithelium in humans and modulates the immune response particularly through the CD4 and T-helper cells in the ileum.

Composition

Maltodextrin, Lactobacillus reuteri LR92 (Lactobacillus reuteri, maltodextrin), Aroma red orange, Sweetener: Sucralose.

Posology

One sachet a day. Do not exceed the recommended daily dose. Dissolve the contents of one sachet into a glass of water at room temperature, stir and drink immediately after preparation.

Warnings

Store in a cool and dry place. The expiry date refers to the product in the integer container, properly stored. Keep out of children's reach (less than 3 years old). Supplements cannot be considered as a substitute of a balanced diet and a healthy life style.

- **Zinc: immunostimulating and antiviral**

Echitus®

It is a food supplement of Vitamin B6, Iron, Zinc, with Propolis and extracts of Altea, Horehound, Echinacea and Thyme. Horehound and Thyme are useful for the fluidity of bronchial secretions, while Echinacea for the functionality of the upper respiratory tract.

Composition

Water, Fructose, Honey, Bilberry (*Vaccinum myrtillus L.*), fruits, dry concentrate, bi-hydrate Iron gluconate, Acidifying agent: Sodium lactate sol 60%, Zinc gluconate; Marshmallow (*Altea officinalis L*) root, dry extract E/D:1/4 (Marshmallow, maltodextrin); Horehound (*Marrubium vulgare L.*), aerial parts, dry extract E/D:1/4 (Horehound, maltodextrin); Echinacea (*Echinacea angustifolia DC*) root, dry extract, tit. 0,6% in echinacoside (*Echinacea*, maltodextrin); Preservative: Potassium sorbate. Wild Thyme (*Thymus vulgaris L.*) leaves, dry extract E/D:1/4 (wild thyme, maltodextrin). Flavouring agent: berry fruits.

Propolis: cryo ground dust tit. min 2,5% in total flavonoids as galangin (propolis, maltodextrin, anticaking agent: silicium dioxide). Pyridoxine hydrochloride, acidifying agent: citric acid

Posology

Take 10 ml per day. Do not exceed the recommended dosage.

Warnings

Do not use in pregnancy time. Store in a cool and dry place. The expiry date refers to the product in the integer packaging properly stored. Keep out of the children's reach (less than 3 years old). Supplements do not replace the need for a varied diet and a healthy life style

ORAL SALINE REHYDRATING PRODUCT FOR PEDIATRIC USE with Sodium Chloride and Potassium citrate, glucose and sacharose
Diarrhea and Vomiting
High fever and Excessive sweating
Prevention and Therapy of dehydration and loss of Electrolytes of any origin and severity

WHO compliant osmolality according to the guidelines of ESPGHAN and AAP

Food for special medical purposes

Shelf life: 36 months

Neoidra[®] sachets

Neoidra[®] is an oral saline rehydrating agent for the prevention and therapy of dehydration and electrolytes loss of any origin and severity.

Composition

Glucose, Sacharose, Sodium Chloride, Potassium citrate tribasic monohydrate, Orange flavour, Citric acid, Sweetener: Acesuphame K

Posology

Dissolve one sachet in 250 ml of still water at room temperature. Administration one or more times a day according to the pediatrician advice. In particular, following ESPGHAN and AAP guidelines (American Academy of Pediatrics), the right usage of Neoidra ought to be: one packet dissolved in 250 ml of water and to administer slowly at small doses (example 10 ml every 5 minutes). The administration should be repeated frequently especially in the first 24 hours. Do not exceed the recommended dosage.

Warnings

Store in a cool and dry place below 25°C, away from direct source of light. The expiry date refers to the sealed pack, correctly stored. Keep out of the children's reach (less than 3 years old). Supplement cannot be considered as a substitute of a balanced diet and a healthy life style.

Standardized dual-action (Vascular and draining) plant extracts for the treatment of haemorrhage and the protection of capillaries in Ophthalmology

Vascular, anti-inflammatory, draining and anti-oedemigenous activity

Food supplement with titrated extracts of: *Vitis vinifera*, *Centella*, *Ginkgo*, *Orthosiphon*, *Lespedeza* and *Ruscus*

Food supplement

Shelf life: 36 months

OcuVase®

Ocuvase® is a product based on standardized herbal extracts. It contains dry extracts of Red Grapevine, Ginkgo Biloba and Blueberry performing an antioxidant action; Butcher's Broom, Horse Chestnut and Centella that keep the good function of the microcirculation. Orthosiphon, Equisetum and Lespedeza drain the body fluids and support the regular functioning of the urinary tract. Vitamin C plays a high antioxidant action and is necessary for the formation of the collagen of the vascular connective tissue.

Composition

Blue tablet: Common grape vine (*Vitis vinifera* L.) seed d.e. with 95% proanthocyanidin, Bulking agent: Microcrystalline cellulose, Ruscus (*Ruscus aculeatus* L.) root d.e. with 10% ruscogenin, Orthosiphon (*Orthosiphon stamineus* Bent) leaf d.e. with 0.1% sinensetin, Equisetum (*Equisetum arvense* L.) aerial part d.e. with 7% silica, Lespedeza (*Lespedeza capitata* Mich.) herb d.e. with 4% rutin, Anti-caking agents: silicon dioxide, vegetable magnesium stearate. Coating agents: Acetylated pregelatinized and corn starch, Talc, Glycerol, Dyes: Titanium dioxide, Indigotin. Red tablet: Bulking agent: Microcrystalline cellulose; Vitamin C, Horse chestnut (*Aesculus hippocastanum* L.) bark d.e. with 20% escin, Ginkgo (*Ginkgo biloba* L.) leaf d.e. with 24% ginkgo flavonoids, European blueberry (*Vaccinium myrtillus* L.) fruit d.e. with 25% anthocyanidin, Centella (*Centella asiatica* L.) herb d.e. with 40% asiaticoside, Anti-caking agents: silicon dioxide, vegetable magnesium stearate. Coating agents: Acetylated pregelatinized corn starch, Talc, Shellac, Glycerol, Dyes: Titanium dioxide, Red iron oxide, Black iron oxide.

Posology

Take a blue tablet after breakfast and a red tablet after the evening meal with plenty of water.

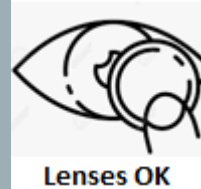

Warnings

Keep out of the reach of children under 3 years of age. Do not exceed the recommended daily dose. Food supplements should not be used as substitutes for a varied, balanced diet and a healthy lifestyle. If you are taking anticoagulant or anti-platelet drugs, consult your doctor before taking the product. The product should not be administered to pregnant or breastfeeding women.

Solidra® STERILE monodose vials

30 vials of 0,6 ml – RESEALABLE VIALS

**Moisturing and lubrication of the eye surface
in the case of:**

Dry eyes, burning, redness, itching and eye fatigue caused by various factors such as stress, dust, smoke, dry air, smog, wind, harsh or artificial light, prolonged use of VDUs, use of stiff or soft contact lenses, exposure to sun, lack of sleep, long hours of driving.

Solidra[®] STERILE

monodose vials

resealable

Solidra is a monodose sterile tear substitute with pre-dosed drops for corneal protection. The product is transparent and viscoelastic. Solidra can be used to moisten and lubricate the eye surface, especially in the case of: dry eyes or minor non-pathological ailments such as burning, redness, itching and eye fatigue caused by various factors such as stress, dust, smoke, dry air, smog, wind, harsh or artificial light, prolonged use of VDUs, use of stiff or soft contact lenses, exposure to sun, lack of sleep, long hours of driving.

Composition Each multidose vial contains: 0.6 ml of solution. 100 ml of solution contains: 0.16 g hyaluronic acid, 0.8 g sodium chloride, 0.06 g mono-Sodium orthophosphate, 0.47 g di-Sodium hydrogen phosphate dodecahydrate, water as needed for 100 ml.

How to use Before use, make sure that the multidose vial is intact. Remove the vial from the strip, open the cap and make sure that you put it down with the base raised. Instill one or more drops in each eye. Close the vial with the upper part of the cap. **Solidra** can be used for 2-3 daily applications. Use within 12 hours of opening. After applying, vision returns normal after a few minutes. The droplets produced by gravity are accurately pre-dosed by the shape of the vial.

Warnings Do not use damaged or pierced containers. Avoid that the end of the container comes into contact with the eye. Make sure once the container is opened that it does not come into contact with contaminating substances or surfaces. Do not use in case of specific hypersensitivity to the components or other chemically related substances. Do not use together with other drugs for external ophthalmic use. Do not use in case of infectious ocular diseases. Keep out of reach of children. Do not use after the expiry date. Store at temperatures between 2° C and 25° C. In case of problems while using the product, stop treatment and consult a physician. Do not use after the expiry date indicated on each vial.

Solidra plus [®]Eye drops

SOLIDRA PLUS is a Medical Device for ophthalmic application consisting of a sterile, slightly hypotonic saline solution with high biocompatibility, low viscosity and physiological pH, preservative-free, with combination of cross-linked Sodium Hyaluronate and medium molecular weight Sodium Hyaluronate, packed in 10 ml bottle. The cross-linked Sodium Hyaluronate has a reticular molecular structure which, in combination with linear medium molecular weight Sodium Hyaluronate, enhances lubrication, hydration and permanency on the ocular surface, to alleviate the symptoms associated with dry eye syndrome.

SOLIDRA PLUS is recommended to relieve from ocular redness, dryness and tiredness caused by dry eye syndrome, by environmental stress (dust, allergens, smoke, smog, air conditioned) and by ocular stress due to prolonged use of the computer, television and video display terminal. The product can be use even by contact lenses wearers, without having to remove them, to improve eye lubrication and comfort.

Composition Cross-linked Sodium Hyaluronate 0,1%, Sodium Hyaluronate 0,1%, Mannitol, Sodium Chloride, Sodium citrate tribasic dihydrate, Citric Acid monohydrate, purified water up to 100 mL.

How to use instill 1 or 2 times a day, or according to the doctor's opinion.

Can be used on the closed eyelids

Medical Device class II b
sterile

Shelf life: 36 months

Nebulip[®] spray

Nebulip ophthalmic spray is a Medical Device consisting of a sterile, slightly hypotonic saline solution with high biocompatibility, and physiological pH, preservative-free, based on Liposomes and Acqua Madre Salina, in a spray bottle of 10mL. Thanks to its components, **Nebulip** is able to regulate, moisturize and refresh the eye mucosa and give functional support to the eye surface. Thus, the lipid layer used to contain and control the evaporation of the tear film is re-established. The use of **Nebulip** gives relief to the most common eye discomforts such as burning, foreign body sensation, dryness, redness and fatigue, which can be caused by:

- cases of dry eye syndrome, in particular caused by the qualitative inadequacy of the lipid layer of the eye surface,
- unfavorable weather and environmental conditions (air conditioning, dry or very hot climate, heating systems, wind, pollution, dust, smoke, allergens),
- visual stress due to a long period of driving or study, prolonged use of contact lenses or electronic devices (computer, television, display screen equipment, smartphone).

Composition Liposomes (Phospholipid 90G) 1%, Acqua Madre Salina 1%, Sodium Chloride, Sodium citrate tribasic dihydrate, Citric Acid monohydrate, Purified water.

Possology We recommend use for adults and children from 3 years, 3 or 4 times a day, or according to the doctor's opinion. Nebulip ophthalmic spray can also be administered during the use of contact lenses to improve eye lubrication and comfort. Use the product within 3 months from the first dispensing.

How to use:

CAREFULLY CLEAN HANDS BEFORE OPENING THE BOTTLE
GENTLY SHAKE THE SPRAY BOTTLE BEFORE USE
PERFORM TWO EMPTY DISPENSES AT FIRST USE
DURING DISPENSING, KEEP THE BOTTLE IN VERTICAL POSITION
GENTLY PRESS ON THE SPRAY PUMP AND DELIVER 1-2 SPRAYS ON THE CLOSED EYELIDS. KEEP A DISTANCE OF 10CM
THE PRODUCT IS FOR SINGLE-PATIENT USE
THE PRODUCT IS COMPATIBLE WITH CONTACT LENSES

Zixol® STERILE

Pluridose drops

Zixol® is an isotonic, buffered tear substitute. Its transparency and viscosity ensure maximum comfort of use. It is indicated for corneal protection. In addition to containing hyaluronic acid as a physiological substance and lubricant, Zixol® also contains zinc sulphate, which is already present in ocular tissue at high concentrations. The combined hydrating action of hyaluronic acid and zinc sulfate is beneficial in moistening and lubricating the eye surface in case of:

Dry eyes caused by several factors, such as: stress, wind, smog, harsh artificial light, use of VDU s, use of contact lenses, long hours of driving, non-pathological traumatic alterations, period following procedures with excimer laser and other situations of changes in normal tear function.

Composition 100ml solution contains: Sodium chloride 0.80 g, sodium citrate tribasic dihydrate 0.20 g, Hyaluronic Acid 0.15 g, Zinc Sulfate Heptahydrate 0,035 g, Citric Acid 0,003 g Purified Water as needed for 100 ml

How to use remove the safety seal, remove the protective cap. Tilting the head back, instill 1 drop in the eye, taking care to keep down the lower eyelid. After instillation the product will be distributed evenly within the eye, producing a protective moisturizing film on the surface of the eye. After instillation of the eye drops, the eyesight will return to normality after a few minutes. The drops produced by gravity are accurately predosed by the shape of the device orifice. Zixol® can be used for multiple daily administrations.

Contraindications proven hypersensitivity to the solution's components. Unknown incompatibility with other devices or drugs.

Adverse effects in some cases, intolerance (stinging or irritation) may occur without having though any consequences. Nonetheless inform your physician or pharmacist about any side effects not mentioned in these instructions for use.

Warnings avoid touching the eye with the dropper. Close the bottle with the cap after use. The product must be used within 3 months after opening. Do not use in the case the bottle is damaged or opened. Do not use after the expiration date. Store at temperatures between 2° and 25 oc. In case of problems while using the product, discontinue the treatment and consult a doctor. Keep out of reach of children.

Miodesol ®

Miodesol is a dietary supplement containing Magnesium, Lipoic Acid and Potassium, Bromelain with dry extract of Curcuma. The connective tissue degeneration causes a progressive alteration of the normal transparency of the vitreous body through oxidative and/or enzymatic degradation. Miodesol maintains a regular state of hydration through the administration of salts (potassium and magnesium) in physiological amounts. Also counteracts the oxidative degenerative processes through the administration of Lipoic Acid. Miodesol also performs anti-inflammatory action by means of the dry extract of Curcuma and proteolytic activity, anti-inflammatory and anti-edema through Bromelain.

Composition

Lipoic acid, Turmeric rhizome dry extract tit. min. 95% in total curcuminoids such as curcumin, Magnesium Oxide, Bulking agent: microcrystalline cellulose, Potassium Chloride (potassium chloride, anti-caking agent: magnesium carbonate), Stabilizer: Hydroxypropylcellulose, Bulking agent: Dibasic calcium phosphate, Bromelain min. 1600 GDU/g (bromelain, Maltodextrin), Anti-caking agent: magnesium stearate, stabilizer: Cross-linked sodium carboxymethylcellulose, Black pepper fruit dry extract tit. min. in 95% piperine, Anti-caking agents: Silicon dioxide, talc. Overcoating tablet: Coating agents: Hydroxypropylmethyl cellulose, Polyvinyl alcohol, Polyethylene glycol, Colouring agent: Titanium dioxide, Stabilizer: Glycerol; Talc.

Indications

1 tablet per day or according to medical advice in the morning, take regularly for at least 3-4 months. The administration can be repeated even for very long periods of time.

Warnings

If you are being treated with hypoglycemic drugs, prior to any use of the product consult your doctor. Store in a cool, dry place. The expiry date refers to the product in whole package, properly stored. Keep out of reach of children under three years of age. Dietary supplements are not intended as a substitute for a varied and balanced diet and a healthy lifestyle.
