

DecFill®
Aseptic Filling Solutions
Modular production lines
adapted to your needs

DecFill® Aseptic Filling Line: True End-to-End Solutions From Molecules to Final Dosage Forms

DecFill® aseptic filling lines are designed to offer easy to operate systems optimizing production and minimizing change over time. From manual to fully automated lines, Dec offers comprehensive solutions for small and laboratory to highly flexible production scale filling lines suited for a wide range of primary packaging including double-chamber syringes.

By using standard modules, DecFill® solutions are configured to meet a wide range of product and customer requirements. These include de-bagging, de-lidding and de-nesting units and various other options to accurately fill liquids, powders and gels into the various containers.

To ensure highest process performance within a controlled environment, DecFill® equipment can be integrated into the required containment systems such as an o-RABS or an aseptic isolator.

Dec Experience

From standard to custom-tailored equipment solutions, Dec provides end-to-end solutions including aseptic filling for both liquids and powders.

Dec's engineered microdosing, filling and containment system technologies are designed to meet your particular needs for sterile primary packaging. Our filling solutions are cGMP compliant, perfectly adapted to each specific process requirements and accurately designed to comply with the most recent revisions of the EU GMP Annex 1: Manufacture of Sterile Medicinal Products guidelines.

DecFill® products can be easily combined and supplied with up- & downstream processing solutions from the raw material handling to the final dosage form, including continuous reaction, crystallization, filtration, drying, blending, micronizing and sampling.

Controls

Production lines can be supplied with various control options such as FDA 21 CFR Part 11, Audit Trail, batch recording and reporting.

Documentation & Support

Dec has years of experience in providing qualification documentation and support during projects: Therefore, we can support you with creating design, verification, qualification and validation documentation and provide support during the execution of documents.

Filling Lines

Product Container Dosing Range

Vials¹ (2–100 ml), Syringes¹ (0.5–20 ml), Cartridges¹ 0.5–20 ml, Dual Chamber Syringes¹, Sachets / Pouches, Special Packaging

DecFill® LAB

Ideal for Laboratory Use on a Workbench for Liquids and/or Powders

DecFill® LAB for liquids

DecFill® LAB (Laboratory)

DecFill® LAB is ideal for workbenches or the integration into existing containment systems (o/cRABS).

The product containers are placed manually by an operator. This tabletop unit is capable of handling a variety of container types such as Ready-to-Use (RTU) systems, vials, cartridges, and syringes.

Features & Options

- Manual container placement
- Various containers filling - syringes, cartridges, vials etc.
- Tabletop unit ideal for workbench or in containment
- Recipe control via HMI, data collection by USB download
- Highly accurate, patented filling technologies for powders and liquids
- Automatic check weighing and stoppering
- Various aseptic Dec containment systems (oRABS, Isolators)

DecFill® LAB for powders

DecFill® MB

Robotic solutions for handling and transporting various container types

Fully robotized solution for product container handling

DecFill® MB (Micro Batch)

DecFill® MB integrated into Dec's engineered containment system is capable of processing aseptic and high potent micro-batches suitable for R&D, clinical trials and laboratories.

The product containers are handled between the modules by a state-of-the-art robotic system. Due to Dec's patented liquid filling and powder dosing technologies, DecFill® MB performs filling with high accuracy.

Features & Options

- Robotic moving the product between the modules
- Capable of handling multi-containers in one platform – RTU systems, vials, cartridges, syringes, etc.
- Flexible, modular and compact
- Highly accurate patented liquid filling and powder dosing technologies
- Various aseptic Dec containment systems (oRABS, Isolators)

DecFill® SB

Highly accurate, patented filling technology for powders, liquids and gels

- 1 **Fast Gassing**
Decontamination of RTU products de-bagging
- 2 **Tray-offloading**
- 3 **Buffer Turntable**
- 4 **Main Transport**
- 5 **Liquid Filling & Check Weighing**
- 6 **Rubber Stopper**
- 7 **Capping**
- 8 **Outfeed & Reject**

DecFill® SB (Small Batch)

DecFill® SB aseptic filling line is designed for small batches and ideal for small scale aseptic production. Its modular, simple and compact design is suitable for limited cleanroom space while maximizing the filling efficiency.

With implementation of index intermittent transport system, the walking beam moves containers to the next position. Due to Dec's patented liquid filling and powder dosing technology, DecFill® SB performs filling with high accuracy.

Features & Options

- Small scale aseptic production
- Various solutions for the supply of packaging materials
- Integrated environmental monitoring
- Highly accurate, patented filling technologies for powders, liquids and gels
- Various aseptic Dec containment systems (oRABS, Isolators)
- Highly integrable, reflecting Dec's continuous manufacturing single source solutions

VHP decontamination: Fast Gassing Airlock integrated design for tray offloading

DecFill® PS

Fully automatic and modular production scale

- 1 **De-Bagging**
Removing outer bag of Ready-To-Use products
- 2 **De-Lidding**
Removing lid of Ready-To-Use products
- 3 **De-Nesting**
- 4 **Individual Product Holder**
Moving the container with variable speed to any programmable position
- 5 **Gross Weighing**
- 6 **Filling**
- 7 **Net Weighing**
- 8 **End-Stoppering**
- 9 **Outfeed**

DecFill® PS (Production Scale)

DecFill® PS aseptic filling line is designed for improved accessibility and reduced cleanroom space while maximizing the efficiency in the filler.

With implementation of flexible magnetic linear transport system, DecFill® PS is capable of handling multi-containers in an isolator such as Ready-to-Use (RTU) systems, vials, cartridges, syringes, sachets/pouches, and special packaging with flexible speed and motion.

Features & Options

Flexible Main Transport

Maximize filling efficiency by handling multi-container in one filling line

Slim machine design for improved accessibility and reduced cleanroom space

Suitable for all RTU systems, vials, cartridges, syringes, sachets/pouches and special packaging

Fully automatic and modular production scale enables a wide variety of configuration options

Highly accurate, patented filling technologies for powders, liquids & gels

Dec R&D Center of Excellence and In-House Testing

Understanding the importance of operational and regulatory challenges our customers face, Dec has always been committed to improve process efficiency, productivity and safety. Our R&D Center of Excellence with a size of over 2,000 sqm includes state-of-the-art testing equipment to ensure innovation, high performance as well as regulatory compliance.

Technical support, Maintenance, Training & Workshops

At Dec, customer service is an important part of every project. We accompany our customers over the entire life cycle of their project. Dec's support team will provide professional support to any problem worldwide.

All Dec equipment is designed for optimal performance and durability. However, parts of every machine are subject to wear and tear. We offer spare parts and various maintenance models to enhance production efficiency and productivity.

Dec provides various training sessions from workshops on existing workplace equipment to teach operators how to effectively do their job to inhouse seminars or convenient webinars.

The depth of Dec's knowledge and their ability to develop innovative new technologies make them an invaluable partner for both multinationals and specialist organizations. With true worldwide coverage through subsidiaries in Switzerland, Germany, Great Britain, Ireland, Netherlands, Poland, USA, India, China, its recent acquisitions of advanced containment and aseptic solution provider Extract Technology and AWL, specializing in continous manufacturing solutions as well as agents covering more than 60 countries, the Dec Group provides its customers with global expertise in process containment technologies and a reliable network for local support.
