

Think Almac...

cGMP peptide manufacture

- Expertise in long peptides, radiopharmaceutical precursors & peptide cocktails
- Solid phase & liquid phase synthesis
- Experience in conjugation to a wide range of chemical entities
- Strong project management culture
- Full support from in-house analytical & QA teams,
& for CMC section preparation

cGMP peptide manufacture

Services & technology platform

Development & manufacturing capabilities

- Experience-based process definition allows rapid development for early phase projects
- Integrated development team ensures smooth transition of projects from pre-clinical research to development
- In-house PREDICTIDE™ algorithm based on manufacturing history to guide process development
- Process validation roadmap to ensure Quality by Design for commercial products
- Kg scale liquid phase capability ranging from 5 L to 1000 L

Purification and isolation

- Biotage, preparative HPLC SEC & ion exchange purification expertise
- Proprietary purification methodology for long peptides
- Class 10,000 final product processing area
- Containment for purification & isolation of cytotoxics

Analytical support

- Analytical release testing
- Full suite of ICH stability chambers
- Drug substance & drug product testing
