Your CDMO Partner Advancing Medicines to Patients

End-to-end services designed for patient safety and centrality while offering contracting convenience, cost efficiencies and time savings

Our globally integrated drug product (DP) and finished goods (FG) services offer agile and flexible solutions for clinical to commercial products. Our DP capabilities include aseptic filling in vials, pre-filled syringes or cartridges using state-of-the-art isolator technologies, phase appropriate process development, formulation, stability and release testing of clinical and commercial products. Our FG capabilities include assembly, packaging and labeling lines in addition to storage capacity.

Connecting the dots to support the complete Biopharmaceutical Value Chain

150,000
Up to 150K units for commercial batches

10,000
Up to 10K units for early & late clinical batches

4
Technologies: microbial, cell culture (mammalian and insect), cell and viral gene therapies, viral vaccines

4+
Flexible DP primary containers: vials 2R-50R, PFS 0.5-10 mL, Cartridges 1-10 mL, plus auto-injector during assembly

4-6
Month timelines for Fast Track Tech Transfer (existing programs)

12-24
Month timelines for Innovative Track Tech Transfer (new programs)

65+
countries benefit from our DP & FG network

Our Global DP & FG Facility Network offers accessibility and flexibility in choice of locations and manufacturing scales.
