# VACCINE SERVICES

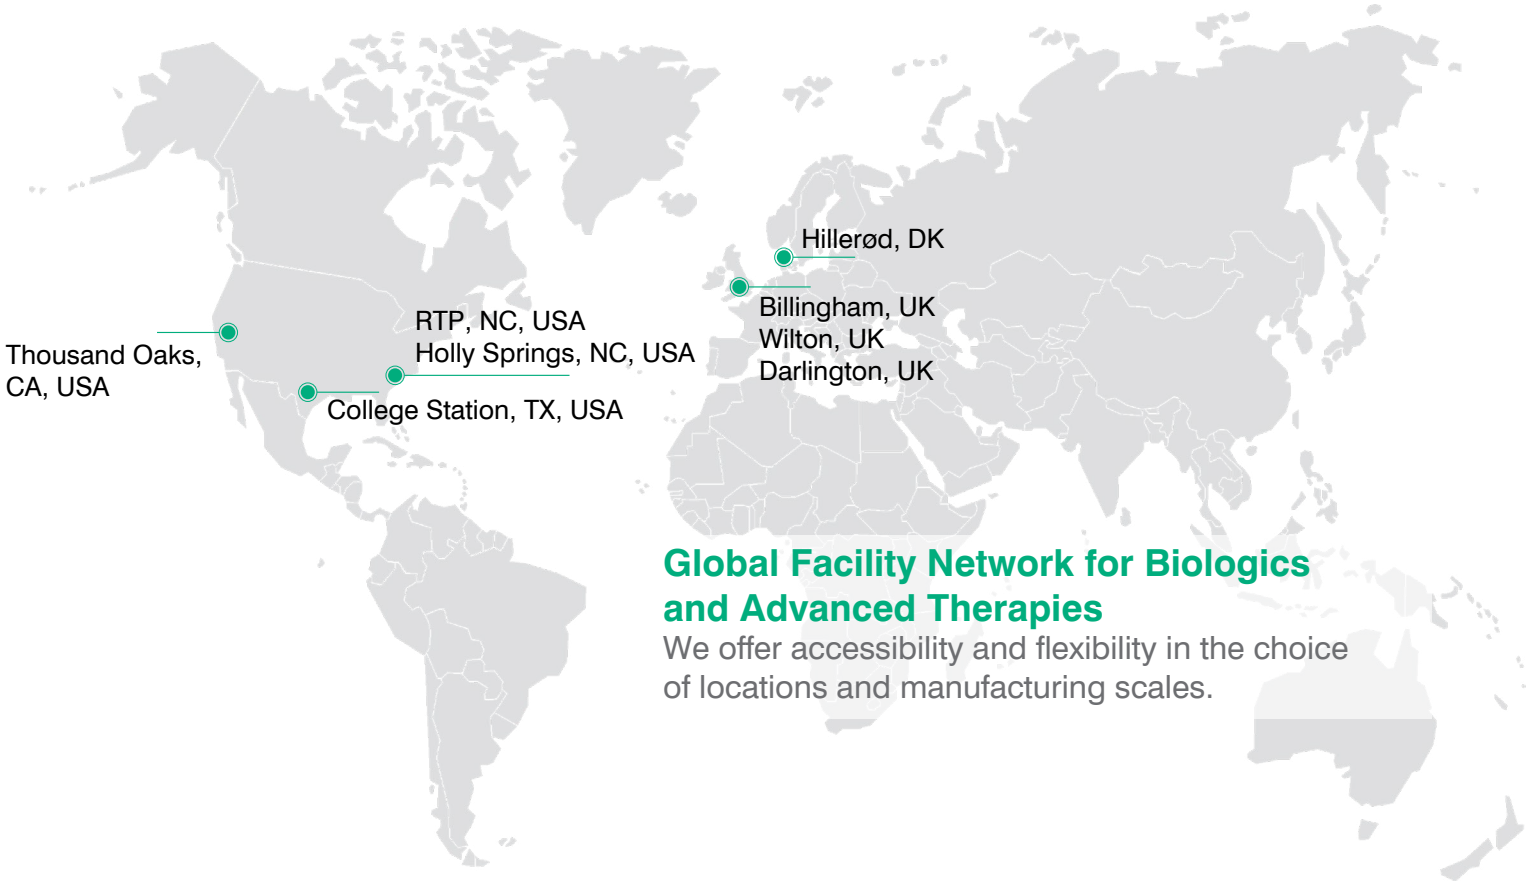

# Your CDMO Partner Advancing Vaccines to Patients

## Viral / Bacterial Vaccines

We are an established leader in advancing vaccines from preclinical development to commercial supply across multiple modalities.

## Global Facility Network for Biologics and Advanced Therapies

We offer accessibility and flexibility in the choice of locations and manufacturing scales.

## End-to-end Vaccines Development and Commercialization

	Preclinical	Clinical	Commercial
cGMP cell banking and storage	<div><div></div></div>	<div><div></div></div>	<div><div></div></div>

## Vaccine Drug Product and Finished Goods Services

Development and manufacturing capabilities designed with patient safety and centricity in mind.

We use robotic systems with single use product path to meet your program needs, providing pre-clinical batches up to 10,000 units and commercial batches up to 150,000 units using RTU nested components in vial, syringe or cartridge format.

- Formulation development
- Device / format development
- Stability testing
- Clinical and commercial DP manufacturing of vial, syringe and cartridge filling with state-of-the-art isolator technology
- Prefilled syringe (PFS) and vial labeling
- Primary packaging in single or multi-pack formats
- Secondary packaging and clinical labeling
- Assembly into auto-injectors and PFS components

Contact us to discuss your science.
