International Presence

From North America to Asia, from Europe to Australia, from Latin America to Africa, pharma customers of all continents have approved our azelaic acid. Deliveries take place worldwide, either by airfreight, container or by road transport.

Azelaic Products has been nominated at the short list of CPHI for the development of the API azelaic acid.

Sustainability

- We have developed a very sustainable route of synthesis. The starting material is high oleic sunflower oil
- The production process is in compliance with GMP and with lowest possible impact on CO₂ emission
- Advanced logistic route of shipment to shorten the supply chain and delivery time
