

Marking your product in a simple and safe way? Why not?

A ready-to-use printing ink for nutritional and pharmaceutical products.

 **BIOGRUND**

Product Information BonuPrint®

BIOGRUND's ready-to-use printing ink **BonuPrint®** is a fine, homogeneous, liquid pigment dispersion for solid oral dosage forms, available as an organic or aqueous solution.

Protect your product against counterfeiting by printing your logo, brand name or barcode onto the tablet. Furthermore it increases the safety of patients by making it easier to distinguish between different tablets and capsules.

Labels with security features are required by law increasingly in order to ensure the traceability and anti-counterfeiting of medicines. Using **BonuPrint®** as a reliable printing ink for tablets, capsules and sugar-coated tablets has a positive effect to your quality assurance. A reproducible high-quality color can be guaranteed for all **BonuPrint®** products. White, black or colored dispersions can be individually created for different products and tailor-made according to customer requirements.

Regulatory and quality aspects: All **BonuPrint®** formulations can be used for pharmaceutical products and for nutritional or dietary supplements.

Product Performance

	Identification
	Safeness
	Aesthetic value

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been the specialist for the homogeneous mixing of excipients and carriers. With locations in Germany, Switzerland, America and Russia, we support the food supplement and pharmaceutical industry in the development, formulation and production of solid oral dosage forms. The tailor-made and ready-to-use special powder mixtures for film coating, sugar-coating, coloring and tableting enable optimum results in a short time. Easy, fast and reliable!
