

Drug Product Services

Development & Manufacturing

Oral Solid Dose (OSD) & Non-Sterile Specialty Dosage Forms

CordenPharma offers drug product development & manufacturing services for Oral Solid Dose (OSD) and other non-sterile specialty dosage forms for all phases from clinical development through commercialization.

All of our sites are equipped with automated primary & secondary packaging lines (bottles, blisters, sachets, rectal) with full labeling & serialization.

Our capabilities include:

- Conventional processing technologies (wet & dry granulation, fluid bed)
- Tablets (standard, mini-tablets)
- Capsules (powders, pellets, mini-tablets)
- Aesthetic & enteric coating
- Compounding (mixing, homogenizing)
- Equipment for non-sterile liquids, emulsions & rectal dosage forms

Sterile Dosage Forms

CordenPharma provides development & manufacturing of injectable dosage forms for all phases from clinical development through commercialization using Aseptic & Terminal Sterilization technologies and an extensive range of packaging services.

Our capabilities include:

- Solutions
- Emulsions
- Lyophilized powders

The injectable manufacturing site CordenPharma Caponago (IT) consists of 2 large facilities, equipped with multiple filling lines, and integrated with automated inspection & packaging systems, including serialization.

Additionally, we offer full R&D support for formulation and analytical development, ranging from early clinical to commercial registration of injectable liquid & lyophilized drug products, including state-of-the-art Lipid NanoParticle (LNP) formulation capabilities.
