

RecyForm MA

A-PET blister films for Nutraceuticals

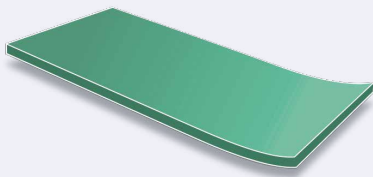

Liveo Research's A-PET films solution is a Plug&Play solution and runs efficiently on all standard PVC thermoforming lines without changes. By incorporating 30% or 50% PCR, we contribute to the circular economy, reducing carbon footprint and complying with new sustainability regulations such as EU-PPWR.

AVAILABLE STRUCTURES

RecyForm MA

Extruded A-PET films with PCR

FIELDS OF APPLICATION

- Vitamins
- Minerals
- Probiotics
- Fish Oil
- Gummies
- Botanicals
- eHerbals
- Dietary
- more upon request

QUALITY & REGULATORY

- EC 1935/2004, (EU) No. 10/2011
- REACH – Regulation (EC) No. 1907/2006
- Directive 94/62/EC regarding heavy metals
- ISO 15378
- FSSC 22000

PROPERTIES & BENEFITS

HALOGEN FREE

film solution without halogens included

SEALABILITY

perfect basefilm for combination with lidding made of aluminium or PET, both peelable or push-through (BlisLid MA)

RECYCLABILITY

film recyclable in RIC1
depending on regulations per country

EFFICIENCY

machine speed comparable to PVC/Alu-blister production

Innovation meets experience – development meets customer’s demands: Benefit from our latest developed PET films with further improved properties! Contact us for further information!
