EAR NOSE THROAT

ISOTONIC SEA WATER NASAL SPRAY

Index: ENT02

Status: Medical device, class IIa

Indications:

- Daily hygiene and cleaning of the nose and sinuses.
- Supportive during rhinitis, sinusitis and hay fever.
- Soothing effect in case of irritation of the nasal mucosa caused by the common cold and hay fever.
- Helps after laryngological treatment.
- In cases of recurrent nasal and sinus infections.

Main ingredients:

- Sea water from the depths of the Atlantic Ocean dilutes dense secretions and brings relief to the mucosa, e.g. in case of cold, by washing dust and allergens out of the nose to facilitate free breathing. Cleanses the nasal cavity and sinuses, moisturises, provides a suitable environment for mucous membranes.

Usage: Infants from 1 month of age, children and adults.

Packaging: APF plastic bottle 30/50 ml with atomiser. BOV aluminium spray can 50/100/150 ml with overprint + colourful applicator.

HYPERTONIC SEA WATER NASAL SPRAY

Index: ENT09

Status: Medical device, class IIa

Indications:

- Cleansing the nasal cavity and sinuses from nasal mucus, germs, dust and allergens.
- Moisturising nasal and sinus mucosa.
- Support during hay fever, sinusitis and infections.
- Nasal mucosa irritations caused by various factors.

Main ingredients:

- Sea water from the depths of the Atlantic Ocean effectively clears the nose and sinuses, brings relief in breathing and gives a feeling of freshness.

Usage: Children over 3 years of age and adults.

Packaging: APF plastic bottle 30/50 ml with atomiser. BOV aluminium spray can 50/100/150 ml with overprint + colourful applicator.

ISOTONIC SEA WATER WITH HYALURONIC ACID AND ALOE EXTRACT

Index: ENT03

Status: Medical device, class IIa

Indications:

- Nasal and sinuses mucosa dryness caused by various factors.
- Irritation of the nasal and sinus mucosa caused by the common cold and allergies.
- For people spending time in a dusty environment, air-conditioned and low humidity rooms.

Main ingredients:

- Sea water from the depths of the Atlantic Ocean cleanses the nasal cavity and sinuses, moisturises, provides a suitable environment for mucous membranes, brings relief from irritation and congestion of the mucosa.
- Hyaluronic acid intensively moisturises nasal and sinus mucosa.
- Aloe extract has soothing and moisturising effects.

Usage: Infants over 6 months of age, children and adults.

Packaging: APF plastic bottle 30 ml or 50 ml with atomiser.

HYPERTONIC SEA WATER WITH EUCALYPTUS OIL AND ALOE EXTRACT

Index: ENT04

Status: Medical device, class IIa

Indications:

- Helps in reducing swelling and congestion of the nasal and sinus mucous membranes caused by infections and allergies.
- During sinusitis, rhinitis and hay fever.
- Nasal and sinus mucosa irritations caused by various factors.

Main ingredients:

- Sea water from the depths of the Atlantic Ocean clears the nose and sinuses during hay fever and allergies, cleanses, soothes irritations.
- Aloe extract soothes and moisturises.
- Eucalyptus oil brings a feeling of relief and freshness.

Usage: Children over 6 years of age and adults.

Packaging: APF plastic or glass bottle 30 ml or 50 ml with atomiser.

SALINE NASAL RINSE KIT (ISOTONIC/HYPERTONIC)

Index: ENT25

Status: Medical device, class IIa

Indications:

- Nasal and sinus symptoms of infections.
- Nasal and sinus allergies, dryness and irritations.
- Post nasal drip, nasal and sinus congestion.

Main ingredients:

- Solution of sodium chloride cleanses the nasal cavity and sinuses, moisturises, provides a suitable environment for mucous membranes.

Usage: Children over 4 years of age, adults.

Packaging: Basic kit: Easy-to-use reusable applicator bottle 240 ml with 10, 12 or 30 pcs of saline sticks. Extension kit: 30 or 60 pcs of saline sticks.

ISOTONIC NaCl AMPOULES

Index: ENT30

HYPERTONIC NaCl AMPOULES 3% / 6%

Index: ENT34/3, ENT34/6

Status: Medical device, class IIa

Indications:

- For hygiene of dry or congested nose, eyes and ears.
- For washing wounds.
- For inhalation during aerosol therapy.

Main ingredients:

- Sodium chloride solution cleanses the mucous membranes of the nose, eyes and ears.

Indications:

- Removal of secretions of the lower respiratory tract in cases of cystic fibrosis, bronchiectasis and bronchiolitis.
- Prevent drying of bronchial mucosa.
- Can be used with pneumatic or ultrasonic nebulizers.

Main ingredients:

- Hypertonic solution of NaCl osmotically stimulates the removal of secretions and prevents drying of bronchial mucus.

Usage: Children from 1st day of life and adults.

Packaging: Isotonic NaCl - 50 ampoules 5ml each.

Usage: Children from 1st day of life and adults

Packaging: Hypertonic NaCl - 30 or 48 ampoules 4ml each.

LACTATED RINGER'S SOLUTION RINSE KIT

Index: ENT33

LACTATED RINGER'S SOLUTION NASAL SPRAY

Index: ENT41

Status: Medical device, class I

Indications:

- Support during rhinitis, sinusitis and hay fever.
- Nasal allergies, dryness and irritations.
- Post nasal drip and nasal congestion.
- Helps after laryngological treatment.

Main ingredients:

- Lactated Ringer's solution is a precisely selected composition of salts including sodium chloride, potassium chloride, calcium chloride, and sodium lactate, making the solution similar to physiological fluids. When applied to the nasal mucose, it moisturises and cleans it.

RINSE KIT:

Usage: Children over 4 years of age, adults.

Packaging: Basic kit: Easy-to-use reusable applicator bottle 240 ml with 6 or 10 pcs of saline solution sticks. Extension kit: 30 pcs of saline sticks.

SPRAY:

Usage: Children over 1 month of age, adults.

Packaging: APF plastic bottle 30 ml with atomiser.

NASAL SPRAY WITH SESAME, BERGAMOT AND MARJORAM OILS

Index: ENT31

NASAL SPRAY WITH SESAME OIL AND ALOE EXTRACT

Index: ENT08

BERGAMOT
AND
MARJORAM
OILS

ALOE

Status: Medical device, class IIa

Indications:

- Dryness of nasal mucosa caused by cold, infections or allergies.
- For people staying in a dusty environment, air-conditioned and low humidity rooms.
- To strengthen nasal mucosa weakened by heavy nose blowing.
- Discomfort after use of oxygen during medical treatment.
- Dry and cracked skin around the nose due to e.g. frequent nose blowing.

Main ingredients (bergamot and marjoram oils):

- The use of bergamot and marjoram oils, due to their characteristic fragrance, increase the comfort of product use.

Main ingredients (aloe extract):

- Sesame oil, aloe extract are oily substances which create a barrier to protect the nose and skin from dehydration caused by external factors (dry air, air-conditioned room). The solution provides proper moisture, maintains the optimal level of oiling and brings relief to irritated mucous membranes and skin around the nose.

Usage: Children over 6 years of age and adults.

Packaging: Plastic bottle 15 ml, 20 ml or 30 ml with atomiser.

MOISTURISING NASAL OINTMENT

Index: ENT10_

Status: Medical device, class IIa

Indications:

- Dryness of nasal mucosa caused by cold, infections or allergies.
- Strengthening of nasal mucosa weakened by heavy nose blowing.
- Protection from harmful impact of external factors.
- Dry and cracked skin around the nose due to e.g. frequent nose blowing.

Main ingredients:

- Borage oil, rich in GLA, moisturises and soothes.
- Olive oil nourishes, soothes irritated mucous membranes and skin around the nose.
- Prebiotic Biolin P promotes the growth of beneficial bacteria, inhibiting the growth of pathogenic bacteria.

Usage: Children over 1 year of age and adults.

Packaging: Plastic tube 15 g.

SINUS HOT-REM POWDER FOR ORAL SOLUTIONS

ENT47 – raspberry and mint flavour (with sugar)

ENT48 – raspberry and mint (sugar free)

ENT49 – raspberry (sugar free) – Junior

Status: Dietary supplement

Indications:

- Supports function of upper respiratory tract (throat, pharynx and vocal cords).
- Recommended for diet supplementation, including vitamin C in autumn-winter and winter-spring times.
- Support for immune system and physiological resistance of organism.

Main ingredients (Junior):

- Vitamin C supports proper functioning of the immune system.
- Mullein contributes to the natural defences, maintenance of immune system.
- Elder flower extract helps in the proper functioning of the immune system.
- Linden blossom relieves in case of irritation of throat and pharynx.

Main ingredients:

- Vitamin C supports proper functioning of the immune system.
- Verbena extract increases the physiological resistance of the body and has a beneficial effect on the throat, larynx and vocal cords.
- Mullein contributes to the natural defences, maintenance of immune system.
- Elder flower extract helps in the proper functioning of the immune system.
- Eucalyptus soothes mouth and throat, relieves in case of tickle in the throat and pharynx, soothes the throat, larynx and vocal cords.

Usage: Children over 6 years of age, adults.
(Junior): Children over 3 years of age, adults.

Packaging: 10 or 20 sachets with powder.

GEL WITH ESSENTIAL OILS FOR GENTLY MASSAGE

Index: CH01

TEETHING GEL

Raspberry flavour

Index: CH27

Status: Pharmaceutical cosmetic

Status: Medical device, class I

Indications:

- Supportive for unblocking clogged upper respiratory tracts in children.
- For delicate massage of chest and back.
- Moisturising and care of skin without feeling of stickiness.

Main ingredients:

- Lavender oil helps to fall asleep, relieves muscle pain.
- Mint oil helps to unblock nasal passages and sinuses.
- Pine oil facilitates breathing freely.

Indications:

- Relieves symptoms associated with teething, including pain, swelling, redness and itching.
- Increasing the comfort of the infant during tooth eruption.
- Facilitates gentle massage of swollen gums providing relief.

Main ingredients:

- High-molecular sodium hyaluronate creates a protective film on the surface of the gums.
- Aloe vera moisturises and soothes redness.
- Xylitol provides a sweet taste and at the same time provides effective protection against caries.

Usage: Children over 6 months of age and adults.

Packaging: Laminated tube 30 ml.

Usage: Children over 2 months.

Packaging: Plastic tube 15 ml. Plastic tube 10 ml with silicone applicator.

EAR WAX REMOVER WITH SODIUM DOCUSATE

- spray
- drops

Index: ENT05/spray, Index: ENT05

Status: Medical device, class IIa

Indications:

- Regular ear hygiene in order to prevent accumulation of ear wax.
- Tendency to accumulate excessive amounts dose of ear wax.
- Prevention of ear inflammation.
- Frequent use of cotton buds for ear cleaning. Constant use of headphones or hearing aids.
- Moisturising mucous membranes in the ear canal.
- Adjunct to clear the ear of secretions resulting from otitis externa.

Main ingredients:

- Sodium docusate is an ear wax softener, to facilitate ear wax removal.
- Aloe extract is known for its soothing and moisturising effects.
- Hyaluronic acid blends with moist secretions of mucous membranes in the ear, deeply moisturises.
- Glycerin softens and loosens the wax in the ear canal.

Usage: Children over 1 year of age and adults.

Packaging: Ear spray: plastic bottle 20 or 30 ml with atomiser. Ear drops: plastic bottle 15 g with dropper.

EAR WAX REMOVER SPRAY WITH OLIVE AND MINT

Index: ENT07

Status: Medical device, class IIa

Indications:

- Regular ear hygiene in order to prevent accumulation of ear wax.
- Tendency to accumulate excessive amounts dose of ear wax.
- Prevention of ear inflammation.
- Frequent use of cotton buds for ear cleaning. Constant use of headphones or hearing aids.
- Moisturising mucous membranes in the ear canal.
- Adjunct to clear the ear of secretions resulting from otitis externa.

Main ingredients:

- Olive oil helps to soften and to remove excess ear wax, can reduce the risk of infection. Acts as a moisturizer and emollient agent. It is a useful substance to maintain proper ear hygiene.
- Mint oil, thanks to its fresh smell, provides comfort for the patient.

Usage: Infants from 3 months of age, children and adults.

Packaging: Plastic bottle 15 or 30 ml with atomiser.

THROAT SPRAY WITH TYNDALLISED *LACTOBACILLUS RHAMNOSUS* BACTERIA

Index: ENT43 RASPBERRY AND MINT FLAVOUR

NEW
PRODUCT

Status: Medical device, class I

Indications:

- Supportive in inflammation of the mouth and throat associated with bacterial or fungal infection.
- To provide the relief of symptoms, such as dry mouth, dry cough, itchy throat, difficulties with swallowing.
- In dryness of the mucous membranes, as a result of medication (e.g. antidepressants, antihistamines).
- Supportive in inflammation of the gums.
- Prevention of dental caries and plaque formation.
- As a prevention after dental procedures.
- For people exposed to irritating external conditions e.g. air-conditioning, polluted air, tobacco smoke.

Main ingredients:

- Tyndallised (non-viable) *Lactobacillus rhamnosus* HA-111 bacteria coat the mucous membrane of the mouth and throat, forming a protective film; they provide better conditions for the regeneration of the mucous membrane and accelerate the restoration of the physiological flora of the mouth and throat.
- Xylitol has an anticariogenic effect.

Usage: Children over 3 years of age and adults.

Packing: Plastic bottle 30 ml with short or long atomiser.

THROAT SPRAY WITH ICELAND LICHEN

Lemon flavour

Index: ENT14

MALLOW LEAF,
HYALURONIC
ACID

Status: Medical device, class IIa

Indications:

- Moisturises oral cavity, throat, vocal cords and larynx in cases of over-use of vocal cords.
- Use during pharyngitis, hoarseness and dryness in the throat, swelling and sore throat.
- Helps to reduce irritation and soothes dry and sore mouth and throat.
- For people at particular risk from danger of external factors impact like dry, air - conditioned, cold, contaminated air.

Main ingredients:

- Iceland lichen extract soothes and moisturises mucosa of the upper respiratory tract.
- Mallow leaf and linden flower extracts moisturise and have coating properties.
- Hyaluronic acid coats and hydrates mucous membranes of the oral cavity, throat, vocal cords and larynx.

Usage: Children over 1 year of age and adults.

Packaging: Plastic bottle 30 ml with long or short atomiser.

COATING LOZENGES WITH ICELAND LICHEN

Index: ENT12

Status: Medical device, class IIa

Indications:

- Moisturises the oral cavity, throat, vocal cords and larynx in cases of over-use of the vocal cords.
- Use during pharyngitis, hoarseness and dryness in the throat, swelling and sore throat.
- Helps to reduce irritation and soothes dry and sore mouth and throat.
- For people at particular risk from danger of external factors impact like dry, air-conditioned, cold, contaminated air.

Main ingredients:

- Iceland lichen extract soothes and moisturises the mucosa of the upper respiratory tract.
- Mallow leaf and linden flower extracts moisturise and have coating properties.
- Hyaluronic acid coats and hydrates mucous membranes of the oral cavity, throat, vocal cords and larynx.

Usage: Children over 4 years of age and adults.

Packaging: 1, 2 or 3 blisters with 12 lozenges.

COATING SIRUP WITH ICELAND LICHEN

Index: ENT15 plastic bottle – mildly sweet taste

Index: ENT40 glass bottle – sweet and sour taste

Status: Medical device, class IIa (plastic bottle); Medical device, class I (glass bottle)

Indications:

- Moisturises oral cavity, throat, vocal cords and larynx in cases of over-use of vocal cords.
- Use during pharyngitis, hoarseness and dryness in the throat, swelling and sore throat.
- Helps to reduce irritation and soothes dry and sore mouth and throat.
- For people at particular risk from danger of external factors impact like dry, air-conditioned, cold, contaminated air.

Main ingredients:

- Iceland lichen extract soothes and moisturises mucosa of the upper respiratory tract.
- Mallow leaf and linden flower extracts moisturise and have coating properties.
- Hyaluronic acid coats and hydrates mucous membranes of the oral cavity, throat, vocal cords and larynx.

Usage: Children over 1 year of age and adults.

Packaging: Plastic or glass bottle 125/200 ml.

ORAL CAVITY COATING GEL

Index: OM03

NEW
PRODUCT

Status: Medical device, class I

Indications:

- Oral cavity dryness (xerostomia) caused by various factors: oncological treatment, salivary gland diseases, use of certain medications.
- In case of saliva gland dysfunction in the elderly.
- Dryness caused by various external factors like smoking or using dentures.

Main ingredients:

- Mucosave® (extract of *Opuntia ficus-indica* and extract of *Olea Europea*) has strong mucoadhesive properties thanks to the *Opuntia* polysaccharides and olive biophenols.
- Hydroxyethylcellulose creates a protective film, helps to maintain proper hydration of oral mucosa.

Usage: Adults.

Packaging: Plastic tube 30 ml.

MOUTH ULCER GEL

Index: ENT37

NEW
PRODUCT

Status: Medical device, class I

**Indications:**

- Indications for use are small aphthae (Mikulicz's aphthae), herpes-like aphthae, and aphthae that are part of Behçet's disease.
- Recommended also in case of minor injuries and abrasions of the oral mucosa caused by dentures and orthodontic appliances.
- Creates a layer on oral cavity mucosa, which protects erosion or ulceration from irritating factors.
- Relieves symptoms of burning and soreness.
- Supports physiological renewal process of the oral epithelium.

**Main ingredients:**

- Sodium hyaluronate intensively moisturises and soothes mucous membranes of oral cavity.

Usage: Children over 1 year of age and adults.

Packaging: Plastic tube 15 ml.

WOMEN'S HEALTHCARE

VAGINAL GEL

Index: WH01

Status: Medical device, class IIa

**Indications:**

- Vaginal dryness associated with hormonal changes in all stages of a woman's life, especially during menopause, after childbirth, lactation and caused by chemo and radiotherapy.
- Abrasions or other factors related to superinfection.
- Restoration of natural physiological condition of vaginal mucosa after gynecological intervention.
- Symptoms of vaginal atrophy, i.e. itching, burning, swelling, redness, abnormal discharge, feeling of tightness of tissues, or discomfort during sexual intercourse.
- For diabetic women as prevention of vaginal infections.

**Main ingredients:**

- Hyaluronic acid is a natural component of the human body. Associated with moist secretions of vaginal mucosa, it forms a gel protective film on mucosa surface.
- Lactic acid, by providing an acidic environment in the vagina, maintains the microbial balance and prevents spread of pathogenic bacteria.

Usage: For women.

Packaging: 5 disposable, plastic applicators 5 ml each. Plastic tube 50 ml, reusable applicator.

INTIMATE CARE GEL WITH HYALURONIC ACID AND PREBIOTIC BIOLIN P

Index: WH02

92%

soothes
the feeling
of itching

Status: Pharmaceutical cosmetic

Indications:

- During and after antibiotic treatment (both oral and vaginal).
- For women with increased susceptibility to inflammations and during inflammation therapy.
- To protect intimate areas against bacterial and fungal infections.
- In case of feeling of burning, itching and irritation.
- For external use only.

Main ingredients:

- Hyaluronic acid is a natural component of the human body. Associated with moist secretions of vaginal mucosa, it forms a gel protective film on mucosa surface.
- Lactic acid, by providing an acidic environment in the vagina, maintains the microbial balance and prevents the spread of pathogenic bacteria.
- Prebiotic Biolin P protects the lining of the intimate surroundings by stimulating the growth of beneficial bacteria.
- Oat proteins soothe inflammation of intimate surroundings.

Usage: For women, suitable also for pregnant women and after childbirth.

Packaging: Plastic tube 50 ml.

INTIMATE CARE GEL WITH OAK BARK AND LACTOBACILLUS FERMENT

Index: WH08

100%

reduces
dryness

Status: Pharmaceutical cosmetic

Indications:

- Supports moisturisation and soothing of intimate areas.
- During and after antibiotic treatment (both oral and vaginal).
- For women with increased susceptibility to inflammations and during inflammation therapy.
- To protect intimate areas against bacterial and fungal infections.
- In case of feeling of burning, itching and irritation.
- For external use only.

Main ingredients:

- *Lactobacillus* ferment is a probiotic-based ingredient created by the fermentation of *Lactobacillus*. It helps to maintain proper pH, protects intimate areas from infections and supports the growth of healthful bacterial flora.
- Prebiotic Biolin P protects the lining of the intimate surroundings by stimulating the growth of beneficial bacteria. Provides the right balance of microbiological flora.
- *Quercus petraea* bark extract is a natural component rich in tannins. It soothes delicate and irritated skin, strengthens the natural skin barrier.
- *Salvia officinalis* extract is a plant-based ingredient which helps to reduce irritation and redness of intimate areas. Supports protection from bacterial and fungal infections.

Usage: For women, suitable also for pregnant women and after childbirth.

Packaging: Plastic tube 50 ml.

INTIMATE HYGIENE GEL WITH OAK BARK

Index: WH09

provides
a long-lasting
feeling of
freshness

Status: Pharmaceutical cosmetic

Indications:

- Gentle washing of intimate areas
- Securing microbiological balance of the intimate areas by maintaining appropriate acidic pH.
- Protection of intimate area against bothersome symptoms of infections.

Main ingredients:

- *Salvia officinalis* extract is a plant-based ingredient which helps to reduce irritation and redness of intimate areas. Supports protection from bacterial and fungal infections.
- *Glycyrrhiza glabra* root extract deeply moisturises and cares the skin. Helps to reduce irritations, itching and redness.
- Prebiotic Biolin P protects the lining of the intimate surroundings by stimulating the growth of beneficial bacteria. Provides the right balance of microbiological flora.
- *Quercus petraea* bark extract is a natural component rich in tannins. It soothes delicate and irritated skin, strengthens the natural skin barrier.

Usage: For women.

Packaging: Plastic bottle 125/250 ml with pump or flip-top.

INTIMATE HYGIENE GEL WITH CRANBERRY EXTRACT

Index: WH05

INTIMATE WET WIPES

Index: WH07

87%
soothes
the feeling
of itching

86%
reduces
the feeling
of burning

100%
ensures
refreshing
effect

Status: Pharmaceutical cosmetic

Indications:

- Securing microbiological balance of the intimate areas by maintaining appropriate acidic pH.
- Protection of intimate area against bothersome symptoms of infections.

Main ingredients (intimate hygiene gel):

- Cranberry extract moisturises and improves the appearance of skin.
- Witch hazel leaf extract acts as an astringent, soothes, restores comfort.
- Lactic acid helps to maintain proper pH level, and thereby reduces the risk of infection.

Main ingredients (intimate wet wipes):

- Lactic acid guarantees appropriate pH of intimate places.
- Prebiotic Biolin P protects the lining of the intimate surroundings by stimulating the growth of beneficial bacteria and inhibiting the growth of pathogenic microorganisms.

Usage: For women, suitable also for pregnant women and after childbirth.

Packaging: Plastic bottle 125/250 ml with pump or disc-top. 10 or 20 intimate wet wipes.

**PROCTO
CARE**

MICRO-ENEMA:

- hemorrhoidal conditions
- bowel-movement

Index: WH11

NEW
PRODUCT

Status: Medical device, class I.

**Indications:**

- Supporting defecation, especially in people struggling with problem of hemorrhoids, anal fissure and constipation.
- In case of discomfort when passing stools in the case of pathological hemorrhoidal conditions and anal fissures.
- Moisturizing the anal mucosa and soothing its irritation;
- Difficulty passing stools during constipation.

**Main ingredients:**

- 4 oils: coconut, linseed, sunflower and olive oil, moisturise and coat the rectal mucosa and soothe its irritation.
- Hyaluronic acid moisturises and soothes irritated skin, forming the right environment for natural regeneration processes.
- Lactic acid helps to maintain the correct pH of the skin.

Usage: Infants from 1st day of life and adults.

Packaging: 5 or 8 micro-enemas, 4 g each.

MEDICAL HEMORRHOIDS GEL

Index: WH10

NEW
PRODUCT

Status: Medical device, class I

Indications:

- For people suffering from hemorrhoids.
- In case of discomfort, itching, burning, pain and irritation which can occur in case of both internal and external hemorrhoids.
- For people exposed to risk of pathological hemorrhoidal conditions, especially those who perform long-term work in a sitting position (drivers, office workers), professional athletes (weightlifters, cyclists, motorcyclists) and obese people.
- Recommended for pregnant and breastfeeding women.
- For external use only.

Main ingredients:

- Hyaluronic acid moisturises and soothes irritated skin around the anus, creates proper environment for natural regeneration processes.
- Aloe vera gel contains mucopolysaccharides that bind water particles, improves skin hydration and integrity. It soothes irritation of the skin around the anus.
- Prebiotic Biolin P protects against the development of pathogenic bacteria and promotes the development of physiological bacterial flora.

Usage: For adults, suitable for pregnant and breastfeeding women. For external use.

Packaging: Plastic tube 50 ml.

GEL FOR RECTUM CARE

Index: WH04

PERINEAL HYGIENE GEL

Index: WH06

Status: Pharmaceutical cosmetic

Indications (both: hygiene gel and care gel):

- For people susceptible to hemorrhoids, for prevention for women during pregnancy and puerperium.
- In case of discomfort like itching and burning after defecation.
- Protection of perineal microbial balance.

Main ingredients (care gel):

- Hyaluronic acid intensely moisturise and soothes.
- L-arginine raises the level of hydration, thereby increasing the skin's protective barrier.
- Aloe vera gel has moisturising properties, nourishes the skin and mucous membranes.
- Vitamin E maintains the skin in good condition.
- Prebiotic Biolin P protects against the growth of pathogenic bacteria and fungi.
- Benzyl alcohol exhibits cooling properties.

Main ingredients (hygiene gel):

- Hyaluronic acid intensely moisturises, soothes mucous membranes surrounding the anus.
- L-arginine raises the level of hydration, thereby increasing the skin's protective barrier.
- Prebiotic Biolin P protects the lining of the intimate surroundings by stimulating the growth of beneficial bacteria.
- SyriCalm™ CRL relieves itching, reduces redness and improves the quality of the skin's barrier function.
- Ectoin® surrounds the mucous membranes or the skin with a protective coating composed of water molecules (hydrofilm). Due to this protective coating, the treated areas are protected from irritations caused by allergens or other particles.

Usage: For adults, suitable for pregnant women. For external use.

Packaging: Plastic tube 50 ml.

Usage: Adults.

Packaging: Plastic bottle 125/200 ml with pump or disc – top.

SKIN CARE

MEDICAL HAND CREAM FOR THE TREATMENT OF DRY SKIN SYMPTOMS

Index: OM02

Status: Medical device, class IIa

Indications:

- Intended for people with problems of excessive dryness of the skin (xerosis).
- Especially recommended for protecting and treating the symptoms of dry skin of hands, subjected to frequent disinfection, washing with strong washing preparations and irritated by wearing of protective gloves.

Main ingredients:

- Urea in the form of hydroxyethyl urea, a stable form of urea, attracts and retains water.
- Omega Plus is a complex of vegetable oils which increases the barrier of the epidermis (protects against water loss).
- Soybean oil increases the skin barrier function.
- Shea Butter moisturises and oils the skin.
- Silk proteins contain fibroin and sericin proteins. Fibroin prevents dry skin without irritating side effects. Sericin improves the epidermal barrier, reducing water loss through the skin.
- SyriCalm™ CLR soothes and restores the skin's protective function.

Usage: Children over 3 years of age and adults.

Packaging: Plastic tube 100 ml.

LIQUID PLASTER SPRAY

Waterproof

Index: SC09

SILICONE ADHESIVE REMOVER

Index: SC10

Status: Medical device, class I

Indications:

- Dressing of small, dry abrasions, also arising in the course of work in damp or dust, where other bandages will not function properly. The preparation is water resistant.

Main ingredients:

- Acrylates Copolymer creates a mechanical barrier which protects from the action of external factors.

Indications:

- Removal of plasters e.g.: ostomy pouches or patches or warming plasters.
- Removal of adhesive residues.
- Especially for irritated skin.

Main ingredients:

- Silicone is a clinically tested substance which forms a non-greasy film on the skin, resistant to moisture and temperature.

Usage: Adults.

Packaging: Aluminium spray can 70 ml.

Usage: Adults.

Packaging: Aluminium spray can 50 ml.

PANTHENOL LOTION 10%

Index: SC03

PANTHENOL FOAM 5.7%/10%

Index: SC01, SC02

Status: Pharmaceutical cosmetic

**Indications:**

- Cooling and relief for the skin after excessive exposure to the sun and irritations caused by other factors.
- Moisturises and eases the feeling of dry and irritated skin, and skin prone to allergies.
- Reduces the feeling of tension.

**Main ingredients:**

- D-Panthenol is a provitamin of vitamin B5. Soothes irritated and reddened skin.
- Allantoin moisturises and ensures a protective film on the skin.
- Aloe – moisturizes the skin and soothes irritation.
- Hyaluronic acid increases the elasticity and hydration of the skin.
- Vitamin E is known as the “vitamin of youth”, protects against harmful UV rays.

Usage: Adults and children over 1 year of age.

Packaging: Lotion: plastic bottle 125/200 ml.
Foam: aluminium spray can 68 or 130 g.

COOLING ICE SPRAY

Index: SC06

Status: Medical device, class IIa

Indications:

- Use to relieve painful bruises, muscle and joint pain, after a contusion or fall or in other sports injuries.
- Quick mitigation of the effects of injuries.
- Fast cooling effect and relief.
- Easy and convenient to use.

Main ingredients:

- Mixture of hydrocarbons – rapid evaporation of gases from the surface of the skin causes a decrease in temperature and thus alleviation of pain symptoms.

Usage: Children over 2 years of age, adults.

Packaging: Steel spray can 150/400 ml.

SCAR GEL

Index: SC37

SCAR AND STRETCH MARK OIL

Index: SC08

100%
softens
and improves
skin elasticity

Status: Medical device, class I

Status: Pharmaceutical cosmetic

Indications:

- Professional skin care of scars resulting from surgeries, burns, injuries, ulcers, acne. The gel lightens and smooths the scars.

Indications:

- Professional skin care of: scars, stretch marks, discolorations, aging and dehydrated skin.

Main ingredients:

- Polysiloxane is a clinically tested substance which forms a surface on the skin, with a thin, water resistant and invisible film. It maintains adequate scar moisture and reduces, brightens and smooths hardened scar tissue.

Main ingredients:

- Emollients are skin-oiling preparations that create a surface layer to allow moisture retention.
- Vitamin A helps to improve the structure and colour of the skin.
- Vitamin E is known as the "vitamin of youth", and protects against harmful UV rays.

 **Usage:** Infants, children and adults.

 **Packaging:** Plastic tube 10/15/20 g.

 **Usage:** Adults and children over 10 years of age.

 **Packaging:** Glass bottle 30/50 ml with pipette.

NAPPY RASH SPRAY

Index: CH04

NAPPY RASH CREAM

Index: CH05

Status: Pharmaceutical cosmetic

Indications:

- Regular children's and infants' skin care, to prevent chafing and diaper rash and to relieve redness, particularly in the area where diapers adhere to the body.

Main ingredients (SPRAY):

- Zinc oxide 5% is a compound used in cosmetics as a substance soothing skin irritations.
- D-Panthenol is a naturally soothing and moisturising component.
- Prebiotic Biolin P provides the right balance of skin flora, supporting the skin's protective barrier prone to damage.

Main ingredients (CREAM):

- Zinc oxide 10% is a compound used in cosmetics as a substance soothing skin irritations.
- D-Panthenol is a naturally soothing and moisturising component.
- Omega Plus is a complex of vegetable oils, which increases the barrier of the epidermis (protects against water loss), improves skin elasticity.

Usage: Infants from 1st day of life.

Packaging: Plastic bottle 100/200 ml with atomiser. Plastic jar 75/125/250 ml.

INTIMATE HYGIENE GEL FOR GIRLS

Index: CH02

INTIMATE HYGIENE GEL FOR BOYS

Index: CH03

Status: Pharmaceutical cosmetic

Indications:

- Protection of microbiological balance of the intimate areas by maintaining appropriate pH.

Main ingredients:

- SyriCalm™ CRL – soothes and protects the skin.
- Cranberry extract helps in urinary tract diseases and supports intimate care.
- Prebiotic Biolin P stimulates the growth of beneficial bacteria.

Indications:

- Protection of microbiological balance of the intimate areas by maintaining appropriate pH.

Main ingredients:

- SyriCalm™ CRL soothes and protects the skin.
- Burdock root, nettle leaf have soothing and emollient properties.
- Allantoin soothes and protects.

Usage: For girls.

Packaging: Plastic bottle 125 or 250 ml with pump or disc-top.

Usage: For boys.

Packaging: Plastic bottle 125 or 250 ml with pump or disc-top.

VITAMINS & MINERALS

MAGNESIUM SOLUTION

Cherry flavour

Index: VM03

NEW
PRODUCT

Status: Dietary supplement

**Indications:**

- Food supplement in the form of stick with cherry-flavored suspension for supplementation of daily diet in magnesium.
- Liquid form and highly absorbable form of magnesium guarantee effective absorption of nutrients into the body.
- Support for:
 - electrolyte balance
 - muscles and heart
 - nervous system
 - memory and concentration
 - energetic metabolism.

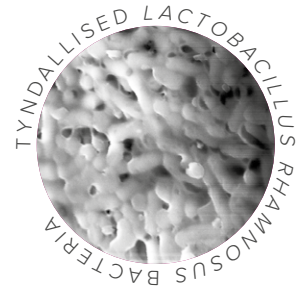

**Main ingredients:**

- Magnesium in the form of magnesium citrate reduces the tiredness and fatigue, maintains proper energy metabolism and contributes to proper functioning of the nervous system and muscles. It helps to maintain teeth and bones in good health. Magnesium has a role in the process of cell division and protein synthesis, it contributes to electrolyte balance.
- Vitamin B6 supports the immune and nervous system, reduces the tiredness and fatigue, contributes to normal energy-yielding metabolism and regulation of hormonal activity. Vitamin B6 maintain proper metabolism of protein, glycogen and homocysteine, helps in formation of red blood cells and synthesis of cysteine.

**Usage:** Adults.**Packaging:** 20 sticks, 18 ml each.

NEUROBIOTIC

Index: VM04

NEW
PRODUCT

Status: Dietary supplement

Indications:

- Support for the nervous system.
- For people being under stress, in state of fatigue.
- In case of increased demand for ingredients contained in the supplement.

Main ingredients:

- *Lactobacillus rhamnosus* HA-111 - tyndallized (heat-killed) strains of lactic acid bacteria which helps to maintain the proper intestinal microflora that play an important role in the proper functioning of the body and the nervous system.
- Thiamin, vitamin B6 and vitamin B12 support the proper functioning of the nervous system and help to maintain normal psychological functions.
- Vitamin B6 and vitamin B12 contribute to the reduction of tiredness and fatigue and maintain the normal function of the immune system.
- Magnesium reduces the tiredness and fatigue, supports the proper functioning of the nervous system and cognitive function.

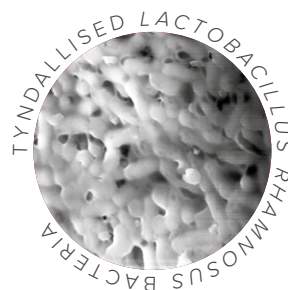

Usage: Adults.

Packaging: 30 capsules.

IMMUNOBIOTIC

Index: VM05

VITAMINS & MINERALS

NEW
PRODUCT

Status: Dietary supplement

Indications:

- Support for the immune system and physiological resistance of organism, especially in the spring and autumn-winter period.
- For active people and being under stress.
- To strengthen the body.
- In case of increased demand for ingredients contained in the supplement.

Main ingredients:

- *Lactobacillus rhamnosus* HA-111 - tyndallized (heat-killed) strains of lactic acid bacteria which helps to maintain the proper intestinal microflora that play an important role in the proper functioning of the body and the immune system.
- Elderberry and vitamin D supports the immune system.
- Zinc and Selenium maintain the normal function of the immune system and contribute to the protection of cells from oxidative stress.

Usage: Adults.

Packaging: 30 capsules.

ONCOMED®

ONCOMED®

HAND-FOOT SYNDROME CREAM

Index: OM02

Status: Medical device, class IIa

Indications:

- Complications of chemotherapy (HFSR – hand-foot skin reaction).
- Moisturising and softening of irritated skin.
- Creating proper environment for natural regenerating processes.
- Decreasing symptoms of itching, burning and tightness.

Main ingredients:

- Urea in the form of hydroxyethyl urea attracts and retains water.
- Omega Plus is a complex of vegetable oils, which supports the regeneration and increases the barrier of the epidermis (protects against water loss), improves skin elasticity.
- Soybean oil increases the skin barrier function.
- Shea Butter moisturises and oils the skin.
- Silk proteins contain fibroin and sericin proteins. Fibroin prevents dry skin without irritating side effects. Sericin improves the epidermal barrier, reducing water loss through the skin.
- SyriCalm™ CLR soothes and restores the skin's protective function.

Usage: Adults, before and during oncological treatment.

Packaging: Plastic tube 100 ml.

POST – RADIOTHERAPY BURNS SPRAY

Index: OM01

POST – RADIOTHERAPY BURNS GEL

Index: SM03

Status: Medical device, class IIa

Indications:

- Supports the treatment of skin burns of the first degree.
- Relieves feeling of tension and itching skin.
- Ensures adequate environment for physiological bacterial flora development.

Main ingredients:

- Hyaluronic acid binds water, ensures proper environment for natural regeneration process.
- Prebiotic Biolin P provides the right balance of microbiological flora, supporting the skin's protective barrier prone to damage.
- SyriCalm™ CLR is a soothing active ingredient used to treat skin exposed to external factors.
- L-arginine is a natural amino acid, used in the treatment of invasive skin actions, increases skin hydration and strengthens the lipid barrier.

Usage: Adults, after radiation therapy.

Packaging: Microdiffusion spray 50 ml (spray) / Airless bottle 50 ml (gel).

VAGINAL GEL

Index: WH01

Status: Medical device, class IIa

Indications:

- Vaginal dryness associated with hormonal changes in all stages of a woman's life, especially during menopause, after childbirth, lactation and caused by chemo and radiotherapy.
- Abrasions or other factors related to superinfection.
- Restoration of natural physiological condition of vaginal mucosa after gynecological intervention.
- Symptoms of vaginal atrophy, i.e. itching, burning, swelling, redness, abnormal discharge, feeling of tightness of tissues or discomfort during sexual intercourse.

Main ingredients:

- Hyaluronic acid is a natural component of the human body. Associated with moist secretions of vaginal mucosa, it forms a gel protective film on the mucosa surface.
- Lactic acid, by providing an acidic environment in the vagina, maintains the microbial balance and prevents the spread of pathogenic bacteria.

Usage: For women.

Packaging: 5 disposable, plastic applicators 5 ml each. Plastic tube 50 ml, reusable applicator.

ORAL CAVITY COATING GEL

Index: OM03

NEW
PRODUCT

Status: Medical device, class I

Indications:

- Severe dryness and inflammation of the oral cavity mucous membrane during and after chemotherapy/radiation.
- Recommended for people suffering from xerostomia.
- Helps to increase and maintain the moisture level of the mucous membranes.
- Relief for oncological patients.

Main ingredients:

- Mucosave CG has strong mucoadhesive activity, due to Opuntia polysaccharides and a lenitive effect of olive biophenols.
- Hydroxyethylcellulose creates a protective film, helps to maintain proper hydration of oral mucosa.
- The synergistic activity of Opuntia and Olea Europea leaf extracts provides a physical protection of the mucosal surface and creates proper conditions for recovery of the physiological mucosal barrier.

Usage: Adults – oncological patients, during and after chemotherapy/radiation.

Packaging: Plastic tube 30 ml.

LIP BALM

- honey flavour
- banana flavour

Index: OM04

Status: Pharmaceutical cosmetic

**Indications:**

- Moisturising, softening and nourishing of damaged and dry lips.
- Reduces the tendency for mouth cracks to occur.
- Oils the lips and improves their elasticity.
- Prevention of drying and keeping lips in good condition.

**Main ingredients:**

- Omega Plus oils prevent peeling, drying and thickening of the epidermis.
- Canola oil is a source of GLA (Gamma-linolenic acid), prevents excessive evaporation of water from the epidermis.
- Vitamin E has a moisturising effect on the skin and prevents drying.

Usage: Adults – cancer patients.

Packaging: Plastic tube 15 ml.

WATERPROOF SUNSCREEN CREAM SPF 50+

Index: OM05

100%

prevents irritations
during exposure
to sunlight
very well

Status: Pharmaceutical cosmetic

Indications:

- Protection of dry and sensitive body and face skin from the harmful effects of the sun.
- Moisturising and softening of the skin, easing felling of itching, burning and tightness.
- Hight protection without leaving white layer on skin.

Main ingredients:

- SyriCalm™ CLR is an antipruritic substance, soothes and protects the skin.
- Laminaria ochroleuca extract is rich in plant sterols, improves the lipid barrier and prevents irritation of skin during exposure to sunlight. It protects keratinocytes from damage caused by UV radiation. Thanks to water binding properties, it increases skin hydration and reduces the feeling of burning and itching.
- Titanium dioxide and chemical filters provide very high sun protection.

Usage: Children from 3 years of age, adults, after radio and chemotherapy.

Packaging: Plastic tube 50/75 ml.

LASH & BROW SERUM WITH WIDELASH™

Index: OM06/7

EYELASH SERUM WITH BIMATOPROST

Index: OM07/3

NEW
PRODUCTS

Status: Pharmaceutical cosmetic

Indications:

- Strengthens lashes and brows and prevents hair loss, accelerates lash & brow growth.
- Helps to restore health and shine.

Main ingredients:

- Keratin is a fibrous structural protein making up hairs, responsible for their proper structure and appearance.
- Widelash™ promotes hair bulb keratinocyte proliferation and supports hair anchorage.

Indications:

- Enhances eyelash growth, strengthens and prevents eyelash loss.

Main ingredients:

- Bimatoprost is a derivative of prostaglandin. It acts by prolonging the active growth phase of the hairs surrounding the eye, making eyelashes and brows noticeably denser and stronger.

 **Usage:** Adults.

 **Packaging:** Plastic bottle 7 ml.

 **Usage:** Adults.

 **Packaging:** Plastic bottle 3 ml.

DIABETIHELP®

DIABETIHELP®

DIABETIC FOOT CARE GEL

Index: DM01

90%

is suitable
for care of diabetics' feet,
prevents excessive
drying of the skin

Status: Pharmaceutical cosmetic

**Indications:**

- Care of dry, irritated, rough and calloused skin.
- Leaves protective film on the skin, which prevents excessive drying of the skin.
- Soothes irritations and moisturises.
- Reduces skin flaking, itching and feeling of tension.

**Main ingredients:**

- ChitoClear® chitosan is a natural source of the most cleaned form of chitosan, which is a glucosamine polymer, derived from armor shellfish. It helps to maintain skin moisture, tones the skin.
- Urea and glycerin are water-binding components (humectants) which strongly moisturise the skin, leaving the feeling of softness and smoothness.
- Lactic acid helps to maintain proper skin pH.

Usage: Adults, diabetics.

Packaging: 75 ml tube.

DIABETIC FOOT WASH GEL

Index: DM02

FACE & BODY WASH GEL

Index: DM04

100%

gently cleanses delicate skin of diabetics

90%

moisturizes and softens the skin, is suitable for care of diabetics' skin

Status: Pharmaceutical cosmetic

Indications – FOOT GEL:

- Gel for daily washing of diabetics' feet or people with sensitive and delicate skin.
- In particular, to wash feet before using Diabetic Foot Gel.
- Maintaining of proper hygiene of diabetic feet.
- Refreshing and smoothing the skin.

Indications – FACE AND BODY GEL:

- Daily protection and support for the treatment of dry and irritated skin.
- Moisturising and keeping skin clean and dry.
- Particularly recommended for diabetics.

Main ingredients:

- ChitoClear® chitosan helps to maintain skin moisture, tones the skin.
- Lactic acid helps to maintain proper skin pH.
- Gentle cleaning substances cleanse the skin from all impurities, without irritating and without causing dryness.

Usage: Adults, diabetics.

Packaging: 175 ml bottle with dosing pump.

FACE & BODY LOTION

Index: DM03

Status: Pharmaceutical cosmetic

Indications:

- For daily care of dry and irritated skin of the body and face.
- Barrier function – it creates a protective film.
- Particularly recommended for diabetics.
- Soothes irritations and decreases itching and tension feeling.
- Ensures proper hydration of the skin.

Main ingredients:

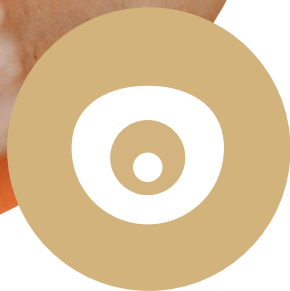

- ChitoClear® chitosan is a natural source of the most cleaned form of chitosan, which is a glucosamine polymer, derived from armor shellfish. It helps to maintain skin moisture, tones the skin.
- Allantoin moisturises, smooths, softens.
- Panthenol smooths the skin.
- Vitamin E supports maintaining the skin in good condition.

Usage: Adults, diabetics.

Packaging: 75 ml tube.

OSTOMY

OSTOMY – ADHESIVE REMOVER SPRAY

Index: SC10

Status: Medical device, class I

Indications:

- Faster and painless removal of ostomy pouches.
- Removal of adhesive residues after ostomy pouches.
- Alleviating the feeling of skin irritation after removal of ostomy pouches.
- Can be used for removal of all sticking plasters, bandages or tapes.

Main ingredients:

- Hexamethydisiloxane is a substance that facilitates the spreading of the product on the skin; helps to create a protective film on the skin.

Usage: Patients with ostomy.

Packaging: Aluminium spray can 50 ml.

OSTOMY PROTECTIVE FOAM

Index: SM04

Status: Medical device, class I

Indications:

- Protecting the skin around any type of stoma.
- Prevention of negative changes resulting from stoma treatment and the use of adhesives.
- Reducing dryness and soothing irritation.
- Cleanses the skin and removes adhesive residue.

Main ingredients:

- Sodium hyaluronate has a moisturizing effect and creates a protective barrier on the skin.
- Aloe vera has a moisturizing effect.
- Ceramide 1 forms a coating barrier preventing water loss and influence positively on integrity of the epidermis.
- Glycerin (humectant) has a coating and moisturizing effect.

Usage: Children from 1 year of age, adults with ostomy.

Packaging: Bottle 200 ml with foaming pump.

OSTOMY PROTECTIVE GEL

Index: SM03

Status: Medical device, class IIa

Indications:

- Support of natural regenerative processes of skin irritated by frequent changes of the ostomy appliances or bandages and by the action of intestinal contents.
- Improves skin integrity.
- Ensures adequate environment for physiological bacterial flora development.

Main ingredients:

- SyriCalm™ CLR moisturises, protects against excessive loss of water, strengthens the epidermis barrier that alleviates the feeling of itching.
- Prebiotic Biolin P provides appropriate microenvironment for the growth of physiological bacterial flora that prevents the growth of pathogenic microorganisms.
- Sodium Hyaluronate creates a protective barrier against penetration of chemicals and bacteria.
- Omega Plus Complex prevents peeling, drying and thickening of the epidermis, moisturises and oils.
- Arginine is a natural amino acid, increases skin hydration and strengthens the lipid barrier.

Usage: Patients with ostomy.

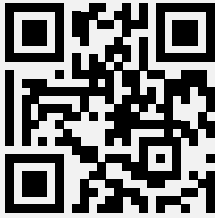

Packaging: Airless 50 ml.
