Company Profile

About Alyors Group

Alyors Group offers products that have been developed with a high-quality understanding and production technologies. We embarked on this journey in 2004, backed by 30 years of experience in pharmacy and medicine. Since the beginning, we have been committed to serving with the mindset of 'Care More, Innovate More, Inspire More!'. Product quality assurance and continuity are guaranteed within the framework of ISO, GMP, WHO and FDA standards and certifications including IFOS and GOED.

As a leading provider in the Over-the-Counter (OTC) market, Alyors Group exports to 50+ countries worldwide, offering an extensive product range comprising 10 distinct brands and over 750+ products tailored to diverse needs. Our offerings include a comprehensive selection of more than 300 food supplements, dermo-cosmetic skincare products, hair care solutions designed to promote growth, medical devices and consumables. Additionally, we provide private-label alternatives to meet specific client requirements.

Created by **Nature**, Perfected by **Science**

We believe in working in harmony with nature when creating products and taking care of the environment. Our commitment is in our actions that not only support your health but also contribute to a sustainable planet. At Alyors, our expertise is rooted in our dedication to nature, your well-being, and innovative product development.

We are market leader in the field of OTC in the domestic market for the last 5 years, and the main goal is, to transfer our pharmaceutical knowledge and experience, as well as our success in the local market, to the global market and to become a global pioneer.

Vision

As Alyors Group, we bring together 50 years combined experience in the fields of healthcare and manufacturing technologies and dedicated to serving human health and well-being through innovative products. Since the beginning, our focus has remained the same: to follow evolving trends in the industry while harnessing the potential of nature and technology to be pioneers in bringing out desirable and innovative products. Our commitment extends to maintaining our market leadership in the domestic market as an employer and manufacturer, while becoming a global player on an international level.

Mission

At Alyors Group, while fulfilling our commitment to serving the community in the field of healthcare; we “care more” by prioritizing serving human health as well as adding value to the environment through sustainability principles, we “innovate more” by working with acknowledged experts and utilizing cutting-edge technological equipment, we “inspire more” by producing, starting from raw materials to delivering finished goods; and we encourage young professionals as a leading company. All companies within the Alyors Group serve in alignment with shared goals and principles, working together with a common mission of trust, innovation, and sustainability.

MANUFACTURING PLANTS

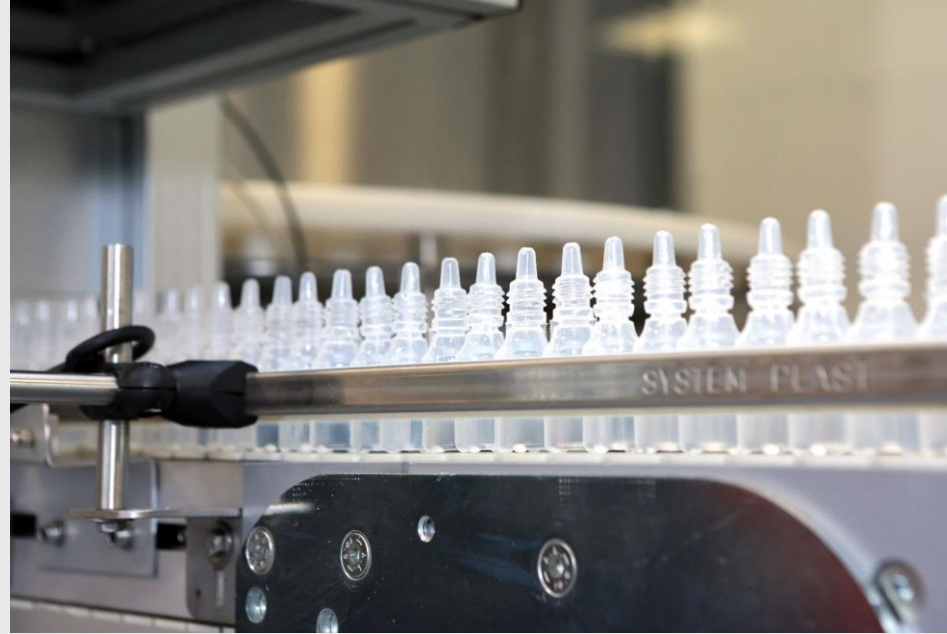

BIOCELL 
Created by Nature,
Perfect by Science

Biocell

Founded in 2020, Biocell is a herbal raw material company established to meet the market's need for high quality raw materials, engaged in product development and marketing activities for the medicinal plants, pharmaceutical, and food supplements. Currently, work on the production of **20 herbal extracts** continues at full speed with a focused initiative to widen and enrich the selection of herbal extracts. Biocell is strongly nurturing its production targets with state-of-the-art facilities, R&D innovations , university and related industry components and most importantly, a focus on science. The supply of product inputs and the export of these supplies will also constitute Biocell's near-term business model development branches.

iyon

İyon Medical

Established in 2008, İyon Medical produces private-label medical products that meet the **standards of ISO** and **CE** and has **registered trademarks** and **quality certificates**. Thanks to our successful R&D innovations, we became the first pen needle and sea water producer in Türkiye. İyon Medical was established to import "**Pen Needle**", and as a result of successful R&D initiatives, we established our own production facility. We are of being the first manufacturer of "**Pen Needle**" and the first "**Sea Water**" producer in Türkiye. Both products received Project Success Appreciation with the support of TUBITAK (The Scientific and Technological Research Council of Türkiye).

Gummy Worlds

Established in 2022, Gummy Worlds (GW) stands as a nutraceutical gummy manufacturer dedicated to crafting high-quality, innovative gummy supplements tailored for individuals of all ages. The extensive product range, endorsed by relevant ministries and accredited by internationally recognized organizations, encompasses vitamins, minerals, and essential nutrients. With a yearly **production capacity of 1000 tonnes**, GW serves both private label clients and its own product lines, consistently delivering solutions that prioritize quality, safety, and effectiveness. The company's commitment to excellence is underscored by its array of quality certifications, including **GMP, HACCP, ISO 22000, ISO 9001, and Halal**. At GW, the focus remains steadfast on shaping a healthier world through the creation of delicious, convenient gummy formulations.

NUVITA
from science to life

Nuvita

Established in 2004, NUVITA Pharmaceutical is a 100% Turkish food supplement manufacturing company with a high-grade facility that conforms to the international standards with the mission of focusing on human health. Nuvita is **FDA registered manufacturing plant** and designed in accordance with **GMP and ISO Food Safety standards** in an effort to achieve the highest quality production, and has a validated ventilation system, a pure water system, and is equipped with modern production technologies that meet the needs of our customers. Our products are developed to meet international standards with an innovative approach in formulation design, raw material and packaging materials selection at the R&D stage, and are **monitored and analyzed at every stage of production.**

Production Line of Nuvita*

*Estimated period for the doubling of capacity by the end of 2024.

R&D and Quality Assurance

The products are developed to meet international standards with an innovative approach in formulation design, raw material, and packaging materials selection at the R&D stage and are monitored and analyzed at every stage of production. All of the formulations are designed with a scientific approach by our expert staff including doctors and pharmacists in

the R&D laboratories equipped with superior technology. Ensuring customer satisfaction by producing **on-time, accurate, high quality and reliable products are the main goals of Nuvita.**

Production quality assurance and continuity are guaranteed within the framework of **IFOS, GMP, WHO, GOED and HALAL standards.**
