

MG Electric
industrial automation

ABOUT US

MG Electric Automation is a Romanian company founded in 2006, specialized in industrial automation, as well as in the design and execution of electrical installations for industrial purposes. We are an ISO 9001:2015 certified company, which demonstrates our commitment to quality and customer satisfaction. We offer a wide range of products and integrated services, providing our customers with comprehensive products and service offerings for their specific needs.

VALUES

We offer
**CUSTOMIZED
SOLUTIONS**
to our
partners.

Combining
technology
with
business
solutions.

Planning
and
controlling
production
processes.

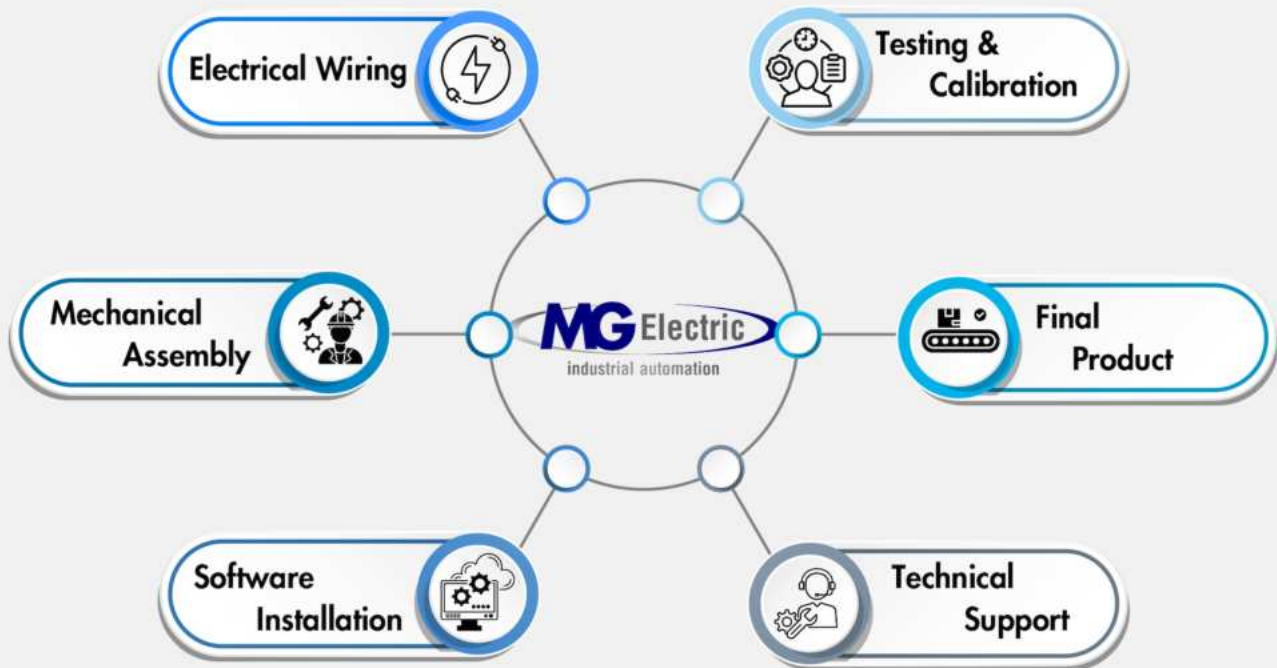

Promptness in
interventions
everywhere in
the world.

MISSION

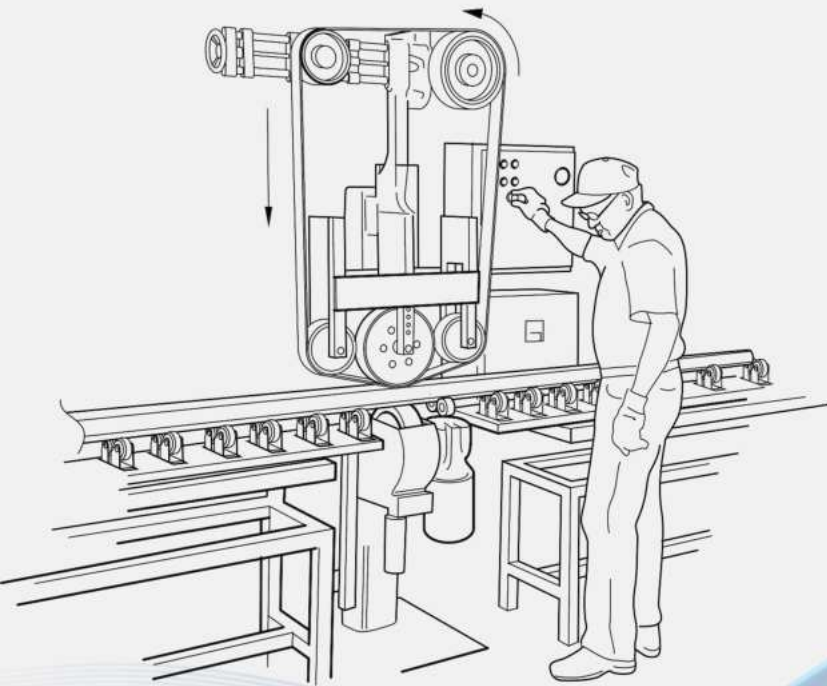

Leveraging expertise, we deliver end to end automation: custom solutions & seamless integration. We collaborate with partners to optimize operations, fostering long-term partnerships that drive success in manufacturing.

➤ Full-Service Solutions

-  The electrical wiring of automatic machines and groups involves the design and installation of electrical systems that power and control the machinery.
-  The mechanical assembly involves the precise and systematic construction of complex machinery designed to automate production and packaging processes.
-  The software installation for automatic machines and groups involves setting up the software systems that control and monitor the machinery.
-  Testing involves systematically checking the machine to ensure all components and systems function as intended and meets all required safety and quality standards.
-  Our company is able to manufacture a finished product, from design to complete execution.
-  Technical support involves providing assistance to ensure that systems operate efficiently and reliably. This support encompasses activities like maintenance, troubleshooting, and optimization.
