**Medical applications**

# Deep drawn MDI canisters

[pressteckspa.com](http://pressteckspa.com)

# Precision meets efficiency.

## **Sizes**

14 | 17 | 19 ml\*

## **Surface**

Plain | Coated

## **Materials**

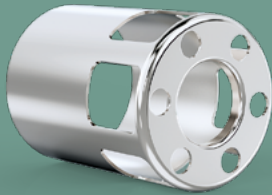

Aluminium | Stainless steel

Combining our long-standing experience and technical know-how with a profound philosophy of customer service, we are a strategic partner to some of the world's leading pharmaceutical companies. Our MDI canisters are produced in cGMP and ISO 15378 certified state-of-the-art production facilities.

# Our expertise for your success.

MDI canisters are only one of many applications of the deep-drawing technology in the medical sector. We have a broad range of deep drawing presses as well as secondary operations allowing us to custom manufacture to all of your needs.

**Deep drawing**

Through innovation and commitment, we optimize the deep drawing technique beyond what is currently possible. Additionally, the transfer technology allows us to integrate further forming techniques into the press allowing us to produce complex metal components cost efficiently and with the highest precision.

We are able to manufacture complex assemblies by combining our parts with other components. According to your requirements, we develop semi or fully automatic assembly processes using high-performance systems and innovative solutions.

**Assemblies**

# Let's talk about your project.
