

COMPANY PROFILE

THE LEADING PEPTIDE MANUFACTURER IN ASIA

Hainan Zhonghe Pharmaceutical Co., Ltd. is the first pharmaceutical manufacturer specializing in researching and manufacturing peptide drugs and cosmetics in China.

We have a peptide drug R&D center that leverages our power to independently develop new peptide and nucleoside drugs. As of now, our pipeline has covered many therapeutic areas, including immunology, tumor, liver diseases, first aid, digestion, urinary, gynecology and perinatology.

There are two manufacturing sites - one API manufacturing site and one formulation site, which spans across 68,000 square meters, with the plants covering a total area of 16,000 square meters. The premises comprise peptide and chemical API workshops and several formulation production lines.

In-House Manufactured API on Sale

No.	INN in English	Clinical Usage
1	Thymalfasin	Cancer, hepatitis.
2	Desmopressin acetate	Surgical bleeding and Anti-diuresis.
3	Octreotide acetate	Gastrointestinal hemorrhage.
4	Atosiban acetate	Premature labor.
5	Cetrorelix acetate	Infertility Treatment.
6	Carbetocin	Prevention of uterine atony and postpartum hemorrhage.
7	Bivalirudin	Anticoagulant in patients undergoing percutaneous coronary intervention.

API Under Development

No.	INN in English	Clinical Usage
1	Semaglutide	Treatment of type 2 diabetes.
2	Thymopentin	Immunomodulator.
3	Ganirelix Acetate	Prevent premature ovulation.
4	Terlipressin	Treatment of bleeding caused by esophageal varices.
5	Oxodotreotide	Treatment of gastroenteropancreatic neuroendocrine tumours (GEP-NETs).
6	Oxytocin	Stimulates contractions during labor and reduce bleeding after childbirth.
7	Scorpion venom heat resistant peptide	Antiepileptic drug.
8	Acetyl-Octapeptide-3	Removes face wrinkles by reducing muscle movement.
9	Nonapeptide-1	Brightens the skin tone, inhibits and reduces excessive production of melanin.
10	Palmitoyl Tetrapeptide-7	Reduces inflammation and skin damage.
11	Pentapeptide-3	Reduces signs of aging, including minimizing the appearance of expression lines and wrinkle depth.
12	Acetyl tetrapeptide-5	Reduces dark circles under the eyes by improving the elasticity of the eye skin.
