

Dr.Reddy's

AURIGENE
PHARMACEUTICAL SERVICES

CDMO Services

Built on the legacy of accelerating innovation and a vast track record in drug discovery, development, and manufacturing services, we collaborate with our customers to accelerate the journey of a molecule from the laboratory to the market.

- Process Development
- Analytical Method Development and Validation
- Process and Powder Safety Assessment
- Crystallization & Polymorphism
- Intermediates and API Contract Manufacturing
- Non-GMP Pilot Facility

Aurigene Pharmaceutical Services

is your CRO/CDMO partner for end-to-end capabilities across drug discovery, development and manufacturing of APIs and formulations. With more than two decades of experience, we offer integrated and standalone services for discovery chemistry, biotherapeutics discovery, discovery biology, development, and manufacturing services for clinical phase I-III programs, regulatory submission batches, and commercial manufacturing.

Why Aurigene CDMO Services?

20+

Years of Expertise

- 400+ projects from more than 100 global customers
- 15+ products in commercial phase
- 700+ dedicated scientists

8

USFDA inspected GMP sites

- 4100+ KL capacity
- Reactor volume from 60L to 10KL
- Cryogenic reaction, High Potent and High-pressure reaction capabilities
- Unit operations like: SD, Hydrogenation, ATFD
- Dedicated production blocks for peptides, steroids, and PEG alcohol & PEG derivatives

2

R&D Centres

- 10-acre dedicated R&D campus
- 210,000 sq. ft lab space
- 15+ dedicated labs for chemistry, biology and formulation along with analytical center of excellence

Development and Manufacturing Services

Chemical Development Services

- Route Scouting
- Polymorph Screening
- Process Design & Development (CMC)
- Process Optimization
- Scale-up Studies
- cGMP Contract Manufacturing

Commercial contract manufacturing of Registered Starting Material (RSM)/Key Starting Material (KSM) and API from India, UK and Mexico with scale from few grams to multi tons.

Specialized Chemistry

- Peptides
- High-Potent
- mPEGs
- Carbohydrates
- Steroids

Formulation Services

- Pre-formulation
- Formulation Development
- cGMP Manufacturing

Dosage forms

- Immediate Release Tablets
- Modified Release Tablets
- Capsules
- Pellets
- Mini Tablets
- Liquid Injections
- Lyo Injections
- Prefilled Syringes
- Nasal Sprays
- Ophthalmic

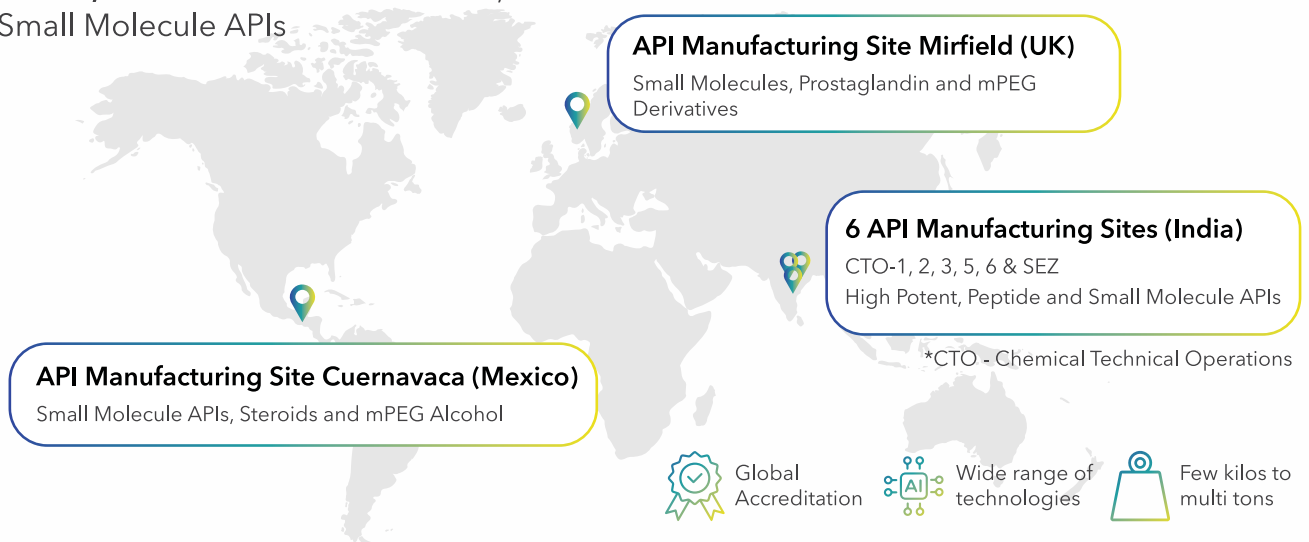

Accelerating Drug Innovation!

Discovery | Development | Manufacturing

Our Global Manufacturing Footprint

- **CTO-Mexico:** Small Molecule APIs, Steroids and mPEG Alcohol.
- **CTO-Mirfield:** Small Molecules, Prostaglandin and mPEG Derivatives
- **CTO-1, India:** High Potent & Small Molecule APIs
- **CTO-2, India:** Small Molecule APIs
- **CTO-3, India:** Low & Medium-scale, Small Molecule APIs
- **CTO-5, India:** Large-scale, Small Molecule APIs
- **CTO-6, India:** Small Molecule, Peptide and High Potent
- **CTO-SEZ, India:** Small Molecule, Peptide and High Potent

ESG/Sustainability

Aurigene as a wholly owned subsidiary of Dr. Reddy's Laboratories adopts the ESG goals of our parent company. Dr. Reddy's has been committed to sustainability for over two decades and has been honored with numerous accreditations and awards.

Retained the position on the DJSI (Dow Jones Sustainability Index)

Environment Excellence Award from CII

First Indian company featured in the Bloomberg Gender-Equality Index (GEI).

Achieved a score band of B for climate change, A for supply chain and B for water security in Carbon Disclosure Project (CDP) 2018
