

# Serialization, aggregation and Track & Trace (“SATT”) platform for pharmaceutical companies

[www.satt.net](http://www.satt.net)

## WHAT WE OFFER

**SATT PLATFORM®** is an end-to-end, cloud-based solution that enables serialization, aggregation, and track & trace capabilities for pharmaceutical companies. It is fully adapted to the needs of:

- Marketing authorization holders (“MAHs”)
- Single-site manufacturers (“SSM”)
- Multinational pharmaceutical organizations (“MPOs”)
- Parallel importers (“PIs”)
- Contract manufacturing organizations (“CMOs”)
- Third-party logistics wholesalers (“3PLs”)

### The solution offers:

- Easy generation of serial and aggregation numbers
- Seamless data exchange
- Efficient management of production processes
- Secure connection to various external partners (e.g., MAHs, CMOs, 3PLs, etc.)
- Bidirectional communication between internal production sites as well as with national and international authorities
- Generation of all relevant external and internal reports

## FEEDBACK FROM OUR CUSTOMERS

*“The SATT PLATFORM® enables full traceability of individual packages, collective packages and pallets within the supply chain, thus ensuring a high level of reliability and business integrity.”*

## ABOUT SOFTGROUP

- 20+ years of experience in pharmaceutical manufacturing
- Partner of Bulgarian Medicine Verification Authority (BgMVO)
- Certified gateway provider and trusted partner of the European Medicine Verification Organization (EMVO)
- Certified Gateway Provider of Asl Belgisi (Uzbekistan), Tatmeen (UAE), IS MPT (Kazakhstan) and ИС ЭБД (Kyrgyzstan)
- Certified partner of GS1
- Healthcare Accredited solution provider and recertified integrator of CRPT and Russian systems (OMS & MDLP)
- Winner of the 4th CEE Pharmaceutical Excellence Award with a project focused on EU FMD Compliance
- Winner of the 6th CEE Pharmaceutical Excellence Award with a project focused on Russia Track and Trace Compliance

# END-TO-END TRACEABILITY THROUGH A FULLY AUTOMATED SERIALIZATION AND AGGREGATION SOLUTION

## Traceability Web Machine

The solution provides aggregation and verification, as well it allows label template design.

## Serialization data management

The SATT PLATFORM® provides efficient data management, starting from the planning to monitoring of serialization and aggregation processes on the plant level.

## Supply chain visibility

The solution provides full visibility of the supply chain, including coverage of MAHs, PDs, CMOs and 3PLs, going all the way to the distribution of final products.

## Regulatory compliance

The SATT PLATFORM® is an accredited software solution that addresses the complete compliance requirements. The solution provides secure connection and reporting to the respective National Systems.

## SATT PLATFORM: KEY BENEFITS

### Exceptional flexibility and customization capacity

- Guaranteed uniqueness of serial and aggregation numbers besides the number of production lines and plants
- User-friendly interface with multi-language setup
- Multi-market compliance management capabilities
- Flexible reporting with unlimited data volume
- Capacity for customization to any set of existing production processes
- Easy generation of highly customized reports in a variety of file formats
- Unlimited generation of serial & aggregation numbers
- Process design without production distortions

### Effortless integration with third-party systems

- Automatic, semi-automatic or manual, fully secured data exchange with any external partners' systems
- Smart, customized internal and external reporting
- Complete adaptation of services to existing production processes
- Automatic connections to critical existing IT systems (e.g., EPR, WMS, etc.)

### EMVO, DSCSA, Tatmeen, ASL BELGISI, IS MPT, ИС ЭБД, ANVISA & NMPA compliance

- Prompt reporting to respective National System, including support for all events and messages
- Capacity to establish a connection to any other regulatory system
- Stable and reliable connection with no downtimes through regulatory updates
- Authority Permit Management
- Product Master Data Management
- Target Markets Management
- Wholesaler Management
- Product Pack Data Management
- Alert Management
