

Pharmaceutical Manufacturing Excellence

From our deep rooted history to
the future of healthcare

We are a vertically
integrated
manufacturer,
ambitious in
sterile production.

About us

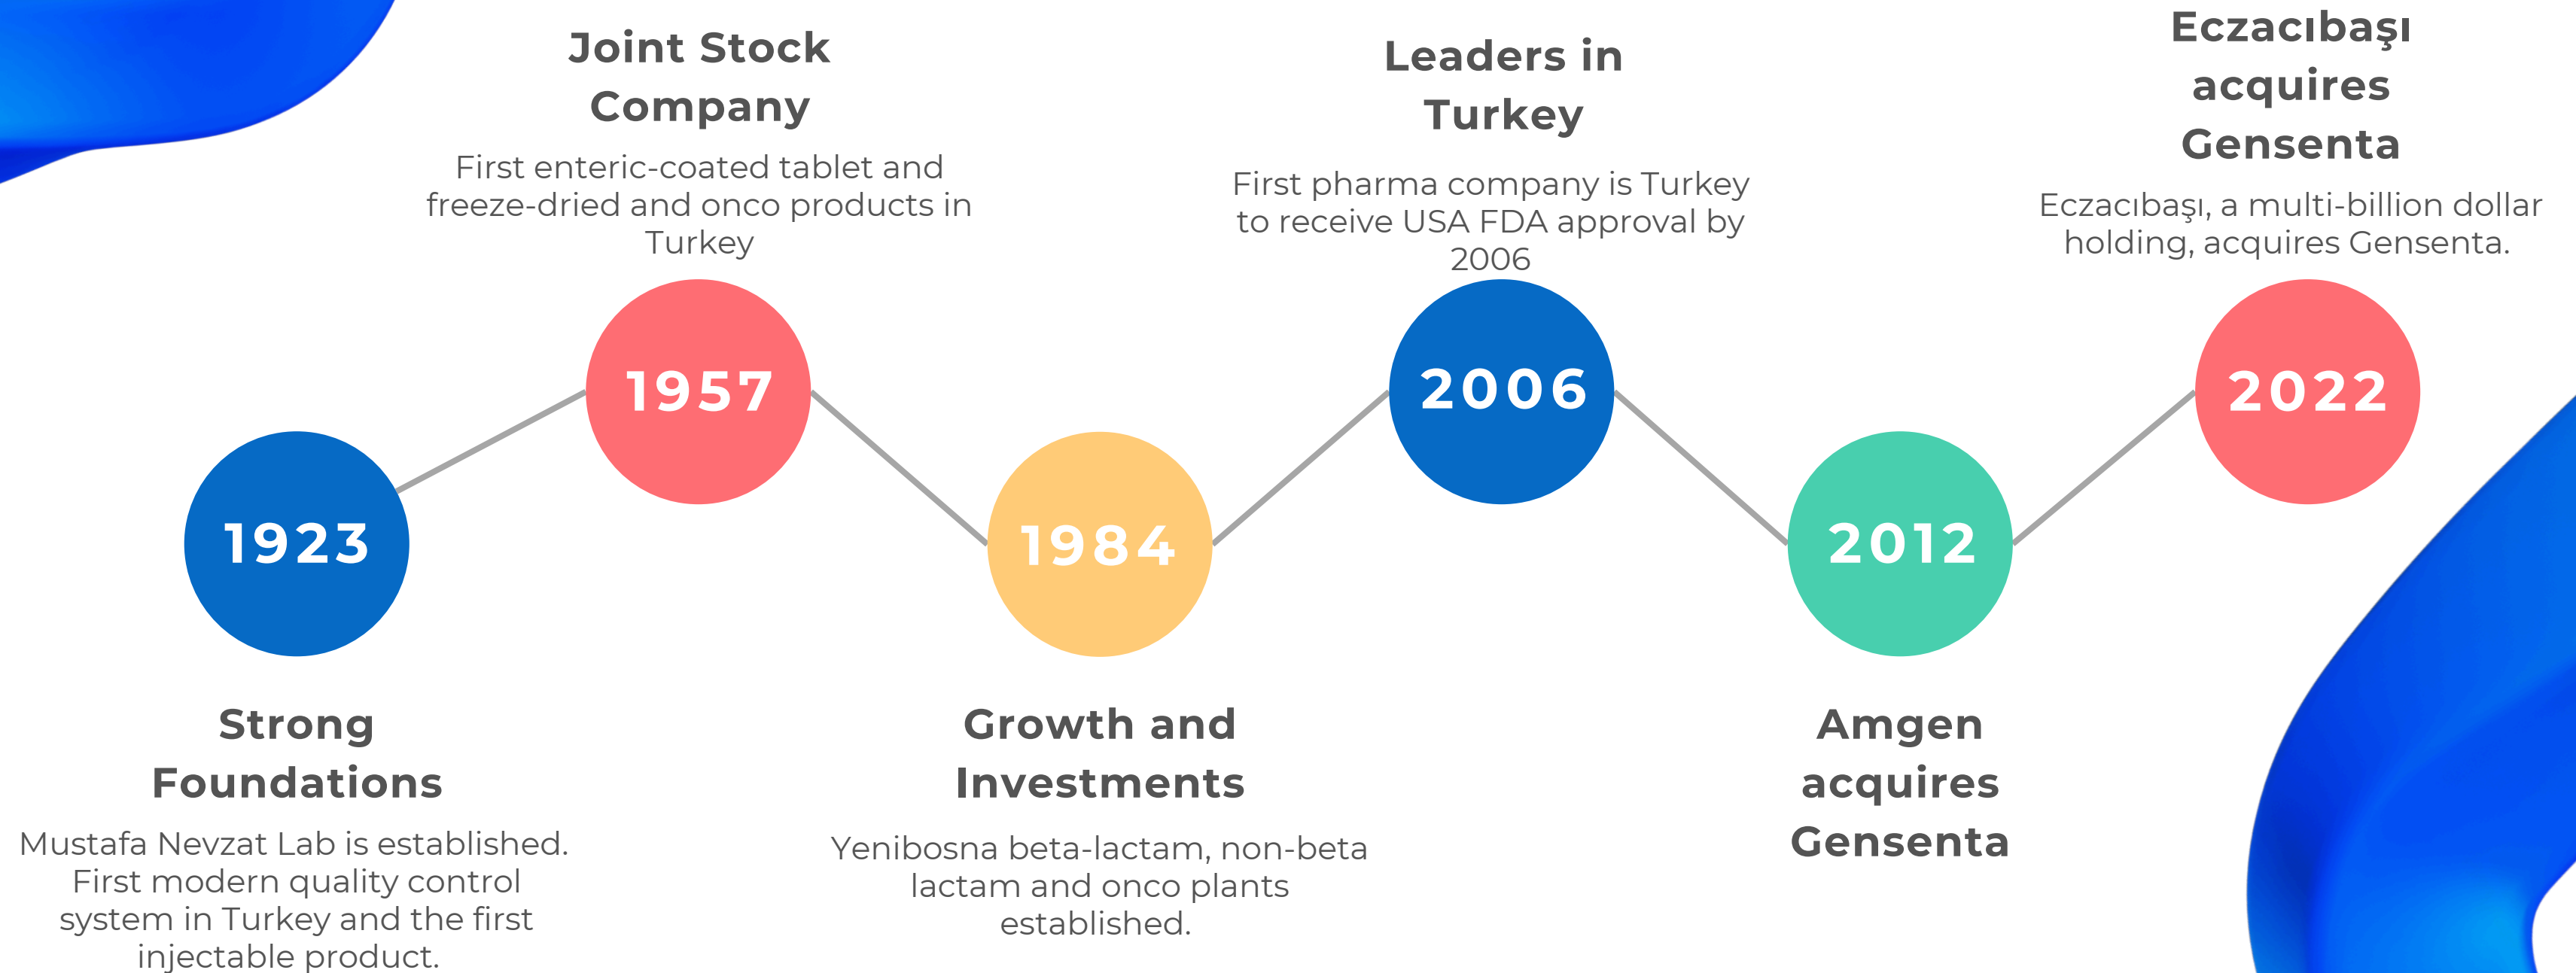

A Leader Since 1923

Gensenta Pharmaceuticals, established in 1923 in Istanbul with its 8 employees, was one of the first manufacturers of injectable products in Turkey.

Prioritizing Excellence in Quality

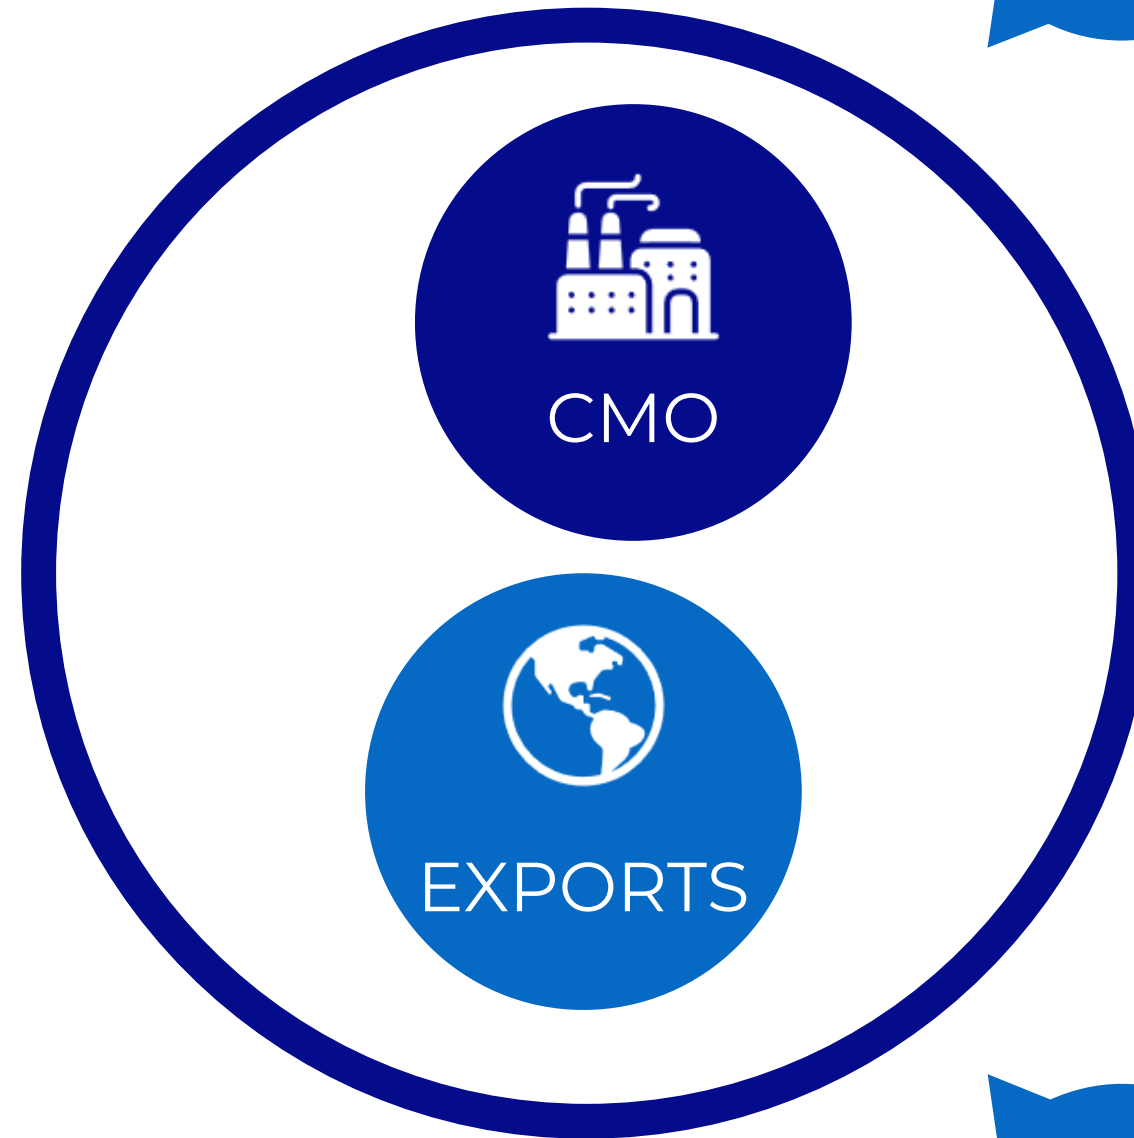

Currently, with its well-trained personnel and modern facilities, Gensenta Pharmaceuticals is one of the leading manufacturers of active pharmaceutical ingredients and finished dosage forms in Turkey.

With a rich history, we've been acquired by prestigious companies.

Our purpose:

Deliver customer-focused pharmaceutical products with full adherence to quality standards.

Development

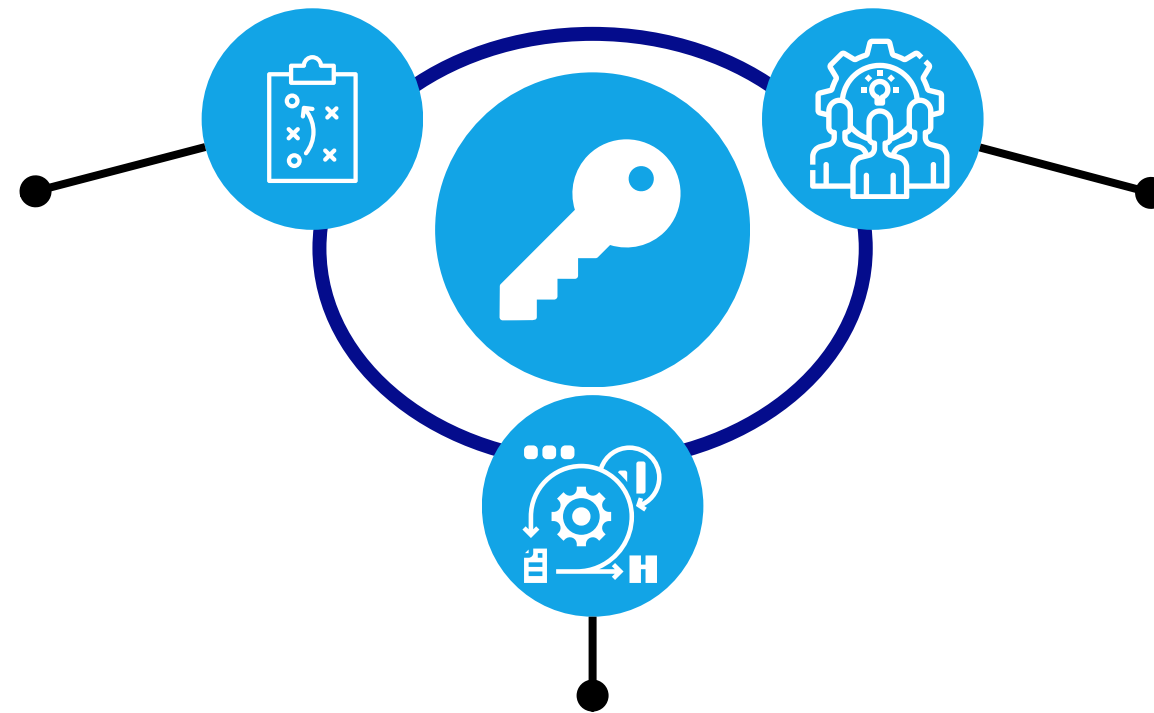

04

Sustainability

Being data-driven is key to our success.

Enhanced Decision Making

Data analysis, predictive analytics, and decision automation

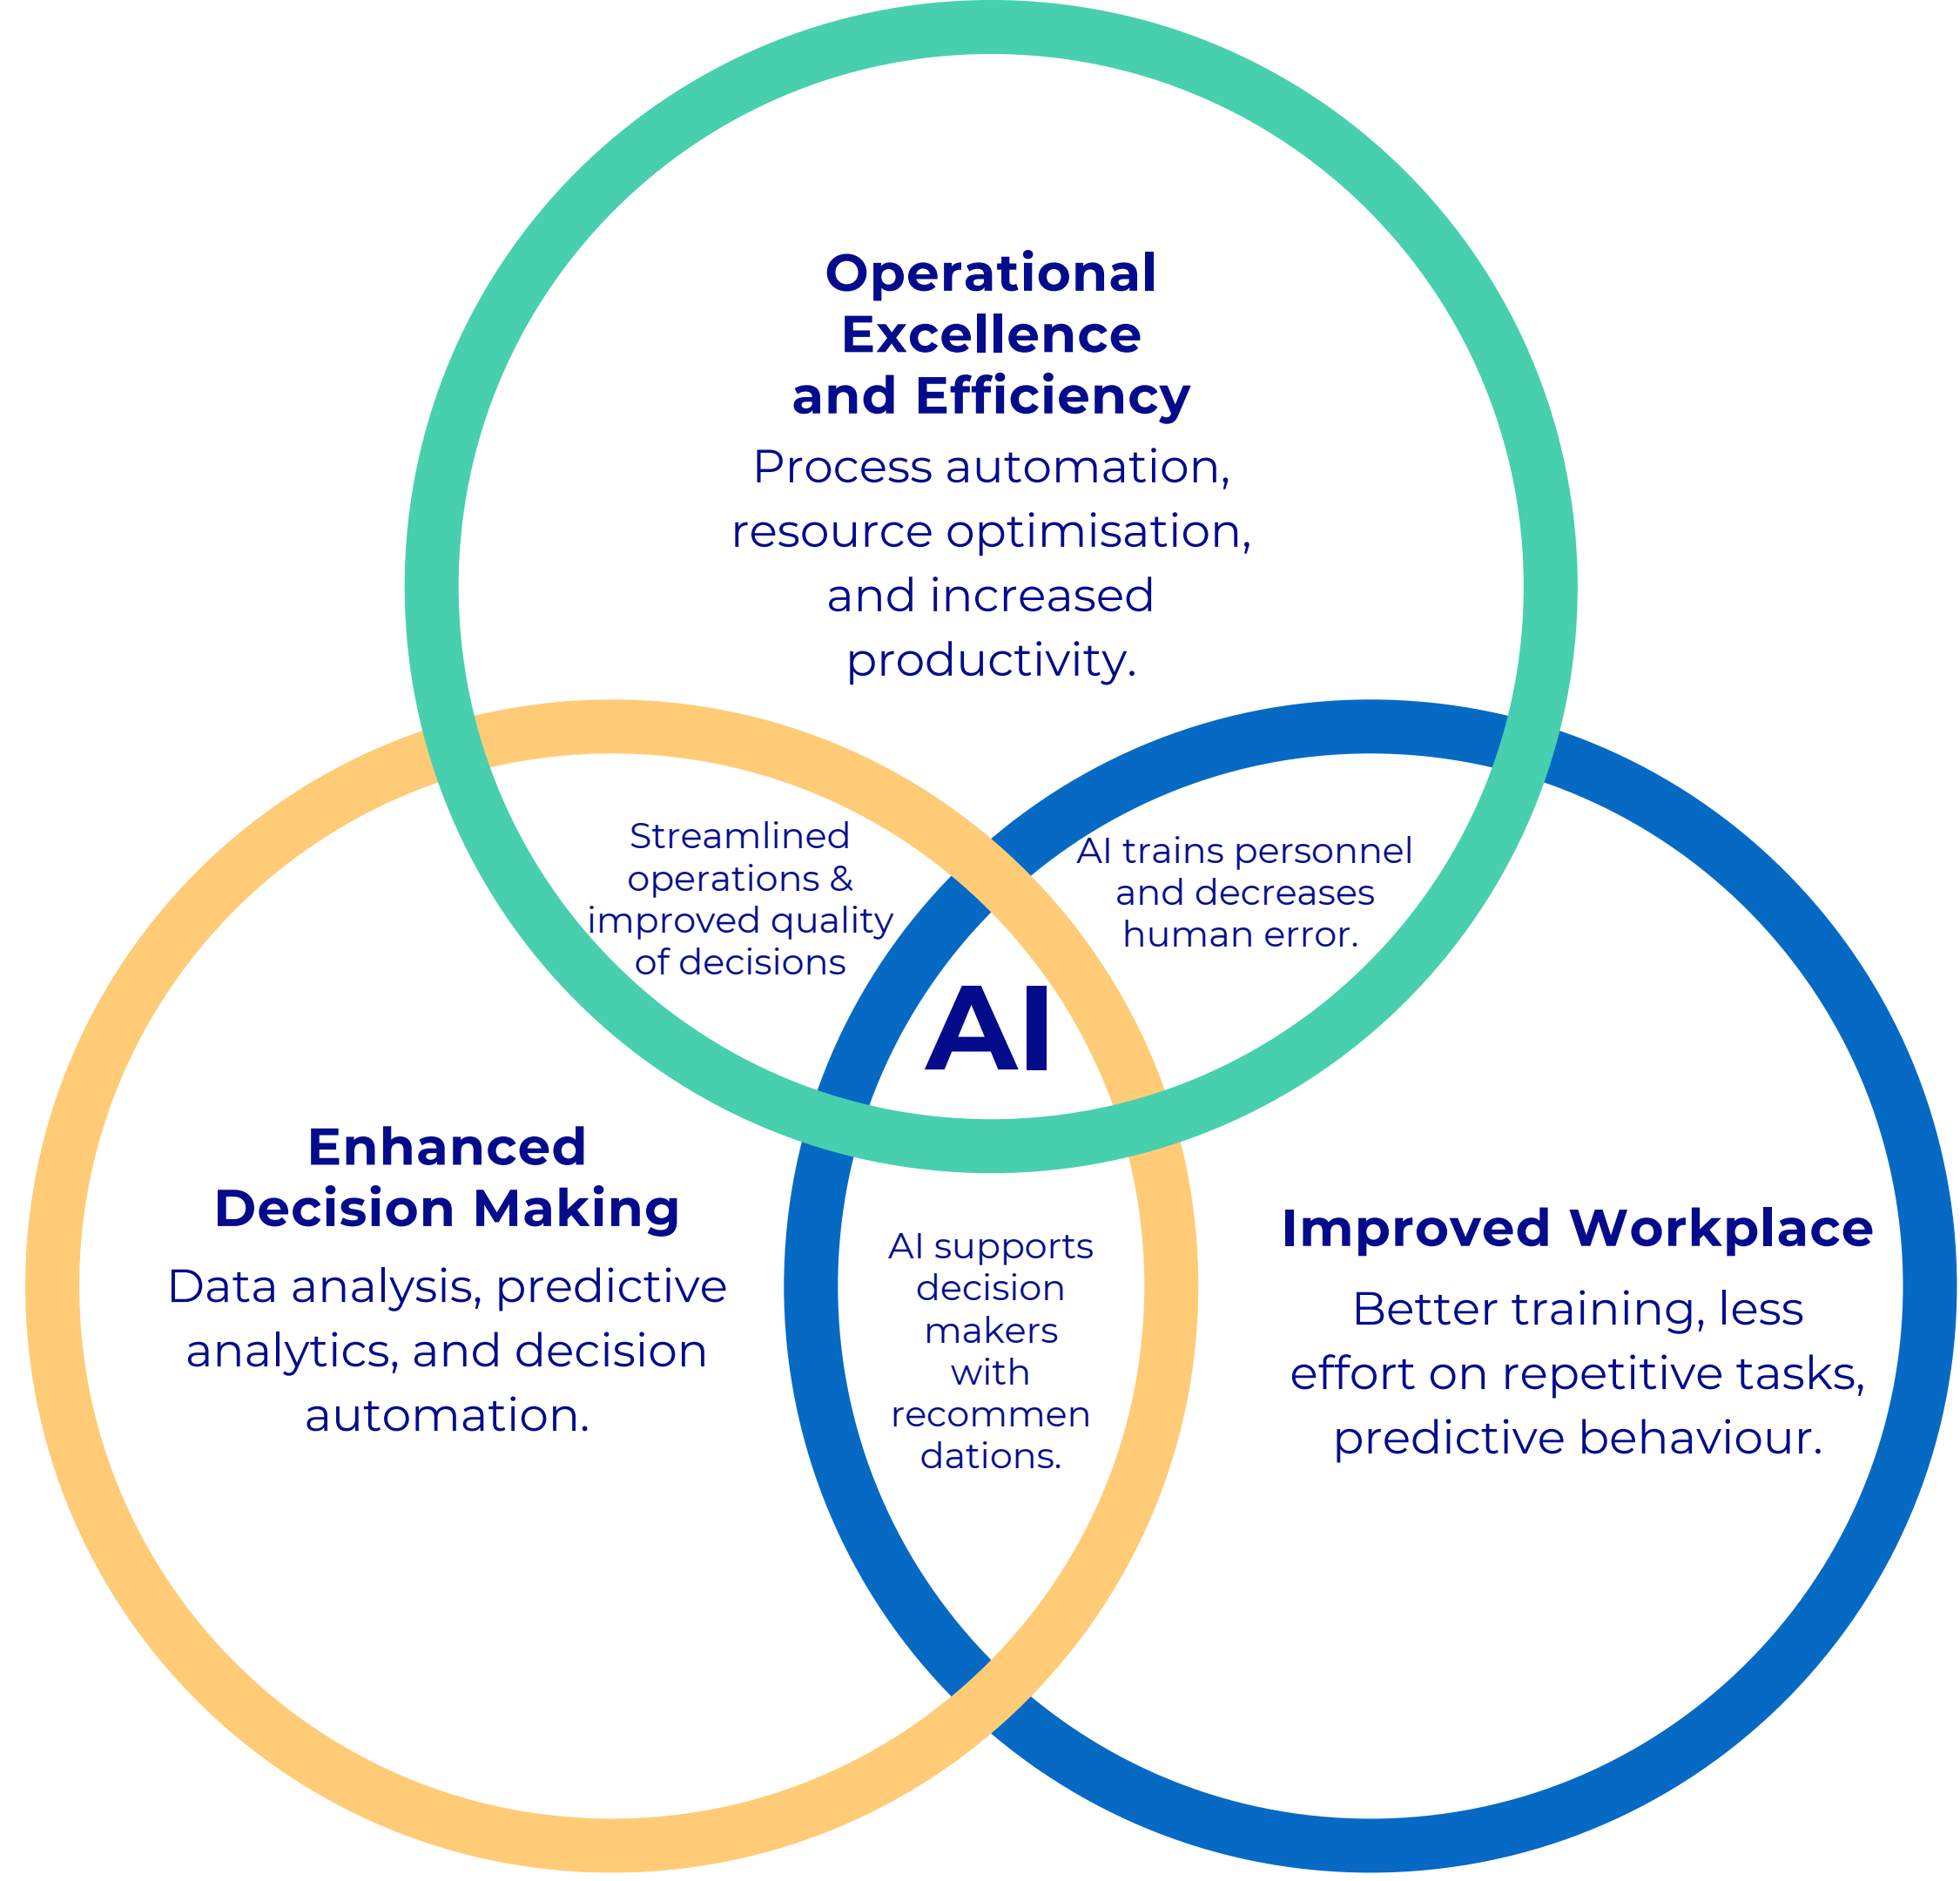

Regulatory Compliance and Quality Control

Adherence to standards, high-quality control, quality assurance systems

Innovation and Competitive Advantage

Trend identification, optimizations opportunities for manufacturing processes, driving innovation

**We are
preparing to
centralize AI to
go beyond
excellence.**

Capacity Overview

1 partner

**SOLID
PRODUCTION**

Tablet Forms

750 million tablets
/year

Capsule Forms

1 60 million capsules
/year

**STERILE
PRODUCTION**

3 Bosch (Syntegon)
Filling Lines
up to 15k vials/hr

6 Freeze Dryer

1 68 m2 Capacity

10 M Vial

Free Capacity

Yenibosna Plant ,Istanbul

50+ Years of Excellence in High-Capacity Lyophilization

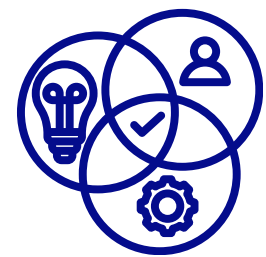

We are leading experts in sterile production.

Among the **highest volume** vial lyophilization capacities.

Automated lyophilizers for high-quality, safe production of sensitive drugs.

Flexible single-use technologies reduce contamination risk and costs.

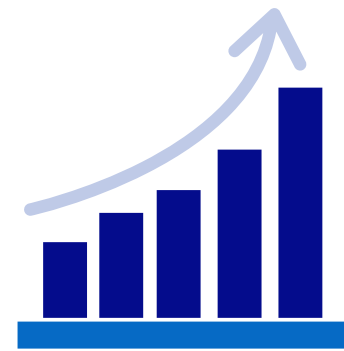

Sterile vial lines with RABS technology meet **international standards** (AIFA, EMA, etc.).

Empowering Future Growth:

New investment in high speed isolator-based vial filling line for liquid and lyophilization fills

**State of the
Art Isolator
Technology**

Capacity

5 M units/year - Lyo Vial

25 M units/year - Liquid Vial

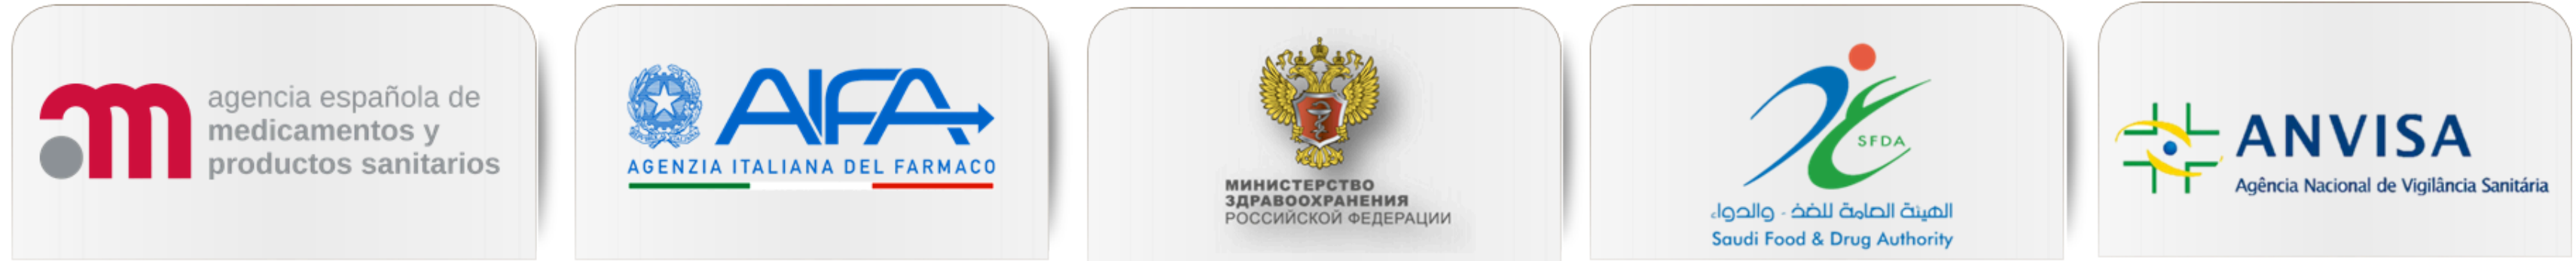

Capability

**Lyophilizator & liquid filling
Packaging**

We are trusted by many.

Our site has advanced capabilities.

01

SAP PM &MM systems for Planned and Unplanned system as well as Predictive Maintenance Monitoring.

02

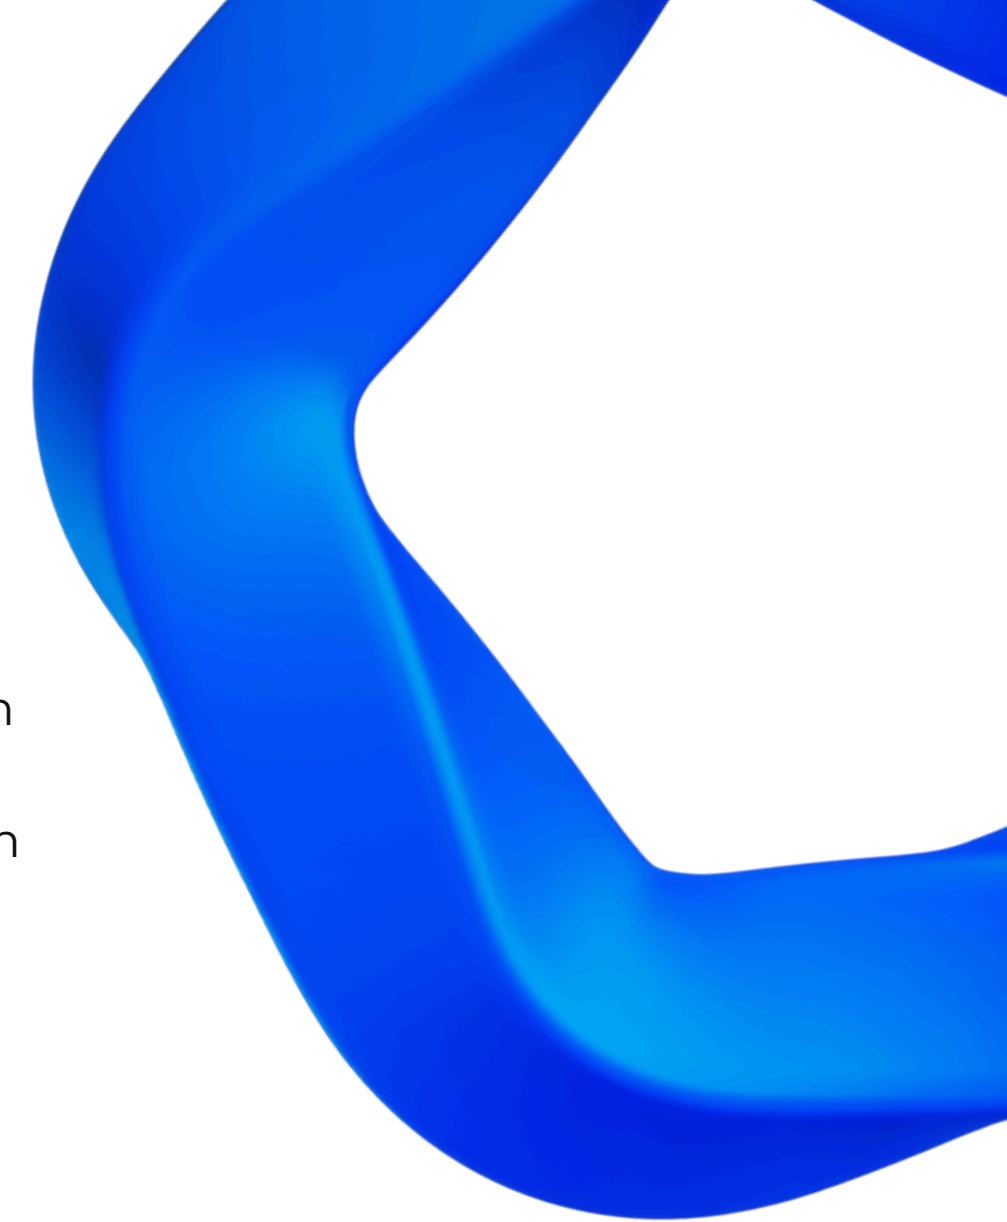

PC and PLC system equipped production equipment pool (compliant with CFR 21 Part 11) with IoT data being able to stream through some PLC systems.

03

ALUS and Frame loader systems for SVP Vial filling and Lyo Operations and WPU & WFI and PS systems for high grade fluids.

04

Building Management System (BMS), UPS Systems, fire alarms and fire sprinklers for any kind of emergency.

The environment and our employees are of utmost value.
