Bizzmine eQMS, a very intuitive tool for H.Essers

Bizzmine Digital Quality Management

About H.Essers

Logistics service provider H.Essers offers personalized and integrated transport and logistics solutions throughout Europe. The H.Essers company was founded in 1928 by Henri Essers and has since become one of the leading companies in Europe for logistics services for sectors such as chemicals, pharma, infra and parts.

bizzmine

CHALLENGES ⌄

With Bizzmine we manage the quality of our business much more efficiently than before when everything had to be done on paper. It used to take weeks to complete a workflow, but now that it's much faster, we can begin official training right away. **Bizzmine is of great importance to us, especially because we work on different sites.**

SOLUTIONS ⌄

Bizzmine was successfully implemented for the digital management of documents and CAPAs. With our digital document control, it is much easier to have all work instructions approved. We can now simply click and sign off on managers' instructions and approvals. Through email reminders, we are alerted of tasks that are expiring, approvals that need to be done, and new versions that have been put live... **In this way, we are always aware of the latest documents that we can use and we can inform our team about them.**

Document Control

CAPA Management

BENEFITS ⌄

1 **Compliance ensured**

Since we also work with medical goods, we are strictly bound by GDP regulations and must follow strict rules for documentation. With Bizzmine, we can be sure that we meet these requirements.

2 **User-friendly application**

The software clearly warns us of errors or missing steps. This way we can quickly correct our own mistakes. Also, the fact that we can work with different groups of approvers or editors per warehouse or per customer saves us a lot of time and thinking.

3 **Audit proof**

Since the launch of Bizzmine, we have achieved excellent results in every audit we had. The ability to present documents in one single format makes it much easier and clearer. We can show all the requested work instructions and open and view the document with a simple click.
