About Beaulieu International Group

As an international family business, we develop and co-create - in an innovative, entrepreneurial and sustainable way - flooring and material solutions to improve the quality of life and work for every generation. Beaulieu International Group is headquartered in Belgium, employs more than 4,900 people worldwide in 19 countries in Eurasia, North and South America and Oceania, and serves customers in 150 countries.

”

As a company with multiple sites in different countries, we needed 1 central platform. With Bizzmine we can seamlessly manage and align our certifications for ISO 9001, ISO 14001 and ISO 45001 across all our sites.

CHALLENGES

As a company with multiple sites in different countries, we needed 1 central platform. With Bizzmine we can seamlessly manage and align our certifications for ISO 9001, ISO 14001 and ISO 45001 across all our sites. Our users in Belgium, France, Italy and China can use the software in their preferred language, which is a big plus.

SOLUTIONS

In Bizzmine, we keep all our Quality, Environment, Safety and Sustainability (QHSE) documents. Our processes for managing external and internal audits, Management of Change (MoC), internal non-conformances, customer and supplier complaints, risks and opportunities, meetings, actions, and a number of product developments have been automated with the software.

The initial processes were configured by the Bizzmine team working with us. Currently, we continue to customize the workflows and in the next phase we will work on new workflows ourselves. **Even without great IT knowledge, you can easily model your own processes in the software.**

Bizzmine is the backbone where all our QHSE and sustainability data is centralized. Having this evidence in one place allows us to prepare for audits more efficiently. Continuity when moving one site to another is also ensured as everything is reconciled across sites. In addition, leverage plays an important role: once a workflow is in place, we can implement the same process at multiple sites. **Indirectly, Bizzmine wins back easily.**

Audit Management

BENEFITS

1

Scalable

We can transfer the process flows we create to our other sites and roll them out immediately. The multilingual nature of the software is a big plus.

2

Open platform

We can easily connect to our other platforms like SAP, Sharepoint and Power BI through APIs.

3

Simple and user-friendly

Thanks to the new technology, Bizzmine is easy to learn and use on laptop, tablet or smartphone.

4

Flexible and adaptable

Not only are we the day-to-day process owners of the system, but we can also model our processes ourselves without much IT knowledge or the help of outside consultants.
