

Active Pharmaceutical Ingredients (APIs)

Caldic is a global, full-service solution provider to the Life Sciences industry. The manufacturing of high-purity chemicals and the distribution of raw materials are our core strengths, but we go beyond to find the exact solution for your requirements. Our full range of services and product portfolio enable us to support customers across a wide range of pharmaceutical solutions.

Caldic is committed to providing superior quality intermediates and APIs, cost effective solutions, and innovative technologies to enable our customers' long term market success. Facilities are operated in accordance with cGMP (ICH Q7) and are regularly inspected by regulatory authorities and pharmaceutical manufacturers. Capabilities include regulatory support, process optimization and validation, analytical testing, method development, and technology transfer. We support early-stage process development to pilot plant and commercial supply. At Caldic, we apply our technical expertise and global resources to accelerate your speed to market to bring small molecule therapeutics to people to increase and significantly improve their quality of life.
