# Dadachanji Group

Kaisha Packaging is a part of The Dadachanji Group.

The Dadachanji Group of Companies headquartered in Mumbai, India is a diversified group with business interests that include Pharmaceuticals and Biotechnology, Primary and Secondary Packaging, Medical Devices, Machine Building, Automation and Robotics.

In 1990, Mr. Kairus Dadachanji founded Kaisha Manufacturers as a premium manufacturer of pharmaceutical containers made of neutral glass tubing. Post a Joint Venture in 2008, the company then known as Schott Kaisha, is the largest manufacturer of Ampoules, Vials, Syringes and Cartridges in India. (Divested in 2021)

Mr. Rishad Dadachanji who joined the group in 2013, is expanding the Group's global footprint by starting several new ventures and introducing new products to the overall portfolio.

# Company Overview

The Company's predecessor was originally established under the name "Capseal" in 2003 as a premium manufacturer of pharmaceutical closure systems for vials and specialty plastics for pharmaceutical use by Mr. Kairus Dadachanji and Mr. Shapoor Mistry. In 2007, Shakai Packaging Private Limited was incorporated, followed by a site change and capacity expansion.

After achieving several milestones and a very positive market acceptance, SHAKAI, not shy of investing, once again moved to a brand new highly automated facility in 2016, which we believe, and what our customers believe, has revolutionized the way that aluminium seals are manufactured in INDIA.

In 2020 the name was changed to KAISHA PACKAGING PVT. LTD. with a vision to align with our global brand presence, as the KAISHA group.

Coming from a background in injectable manufacturing and Type 1 glass primary packaging, we were the first company in INDIA, to manufacture aluminium seals in controlled environments under positive pressure, while adopting several other pharma practices, such as GDP, PU flooring, HVAC systems, segregated man and material entry, linear material flow and EHS polices amongst other positives. 100% compliance enables our customers to work closely with us.

With all our tooling made in-house, we are flexible and capable to supply any customized solutions and keep up with the ever-evolving needs/requirements, of the pharmaceutical industry.

# Expansion Plans

Kaisha has recently procured the building (indicated in red) connected to our existing unit. Building 2 started with production from January 2023.

This gives Kaisha immense scope for future expansion.

# Thank You.
