Regulatory

Benefit from Nat’Kaps Laboratoire’s equipment and ingredient/formula characterization know-how.

**Regulatory is key.
It is the starting point to any new development**

Formulation, Mixing, Manufacturing and Packaging/Labelling can be handled separately

Marketing & Communication

Nat'Kaps Teams support you in this key step, essential to the commercialization of any new food supplement.

Designing a new product requires special attention ▶

1

Marketing positioning

2

Product design / File execution

3

Proofreading & Validation

4

Technical follow-up / Printing

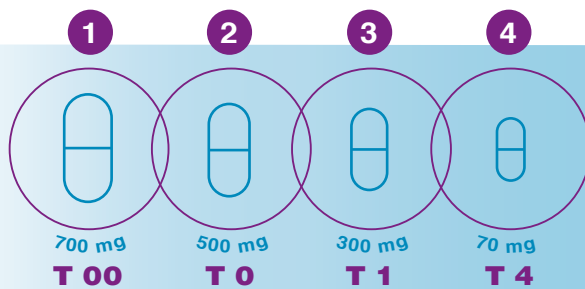

Thanks to a thorough experience and dedicated resources, Nat'Kaps supports you throughout your projects

Manufacturing

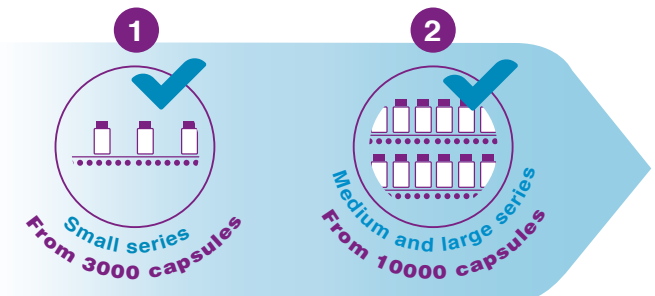

Our site consists in 3 storage areas (Ingredients, Semi-finished products, & Packagings, Finished products) as well as a refrigerated room dedicated to probiotics and 8 Manufacturing rooms at controlled temperature and hygrometry for the best semi-finished product quality.

The diversity of our equipment allows us to manufacture different types of capsules in small, medium and large production series

We hold numerous references: animal origin capsules (bovine, porc, fish gelatin), vegetable origin (HPMC, pullulan), organic, gastro-resistant, ... transparent or colored.

Formulation and Mixing can be handled seperately

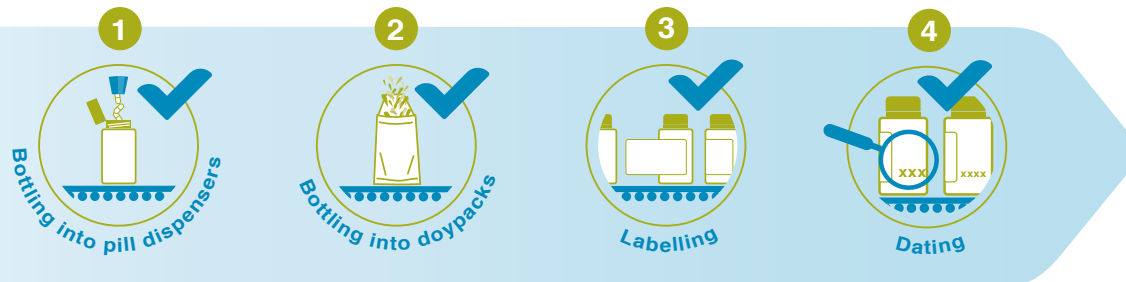

Packaging & Labelling

Our site benefits from 4 Packaging & Labelling rooms allowing the bottling of capsules, tablets and powders into pill dispensers and doypacks.

Your product takes shape here, thanks to a complete and diverse equipment

Packaging & Labelling *can be handled separately*

Quality

Nat’Kaps Laboratoire is committed to delivering a high-quality product that complies with French and European regulations.

Monitoring is meticulously adhered to throughout the manufacturing process

Our capsules undergo a rigorous quality control during and after production, before being stored in an intermediate area for packaging & labelling or before being directly shipped in bulk to our customers.

Nat’Kaps **Quality policy** can be found on natkaps.com

Services

Nat’Kaps Laboratoire, through its facilities and equipment, provides you with a range of services.

Our site benefits from 4 distinct storage areas:

- Raw material
- Packaging & Semi-finished products
- Finished products
- Refrigerated room for probiotics

Our services revolve around the needs that our clients may express
