ORAL DISPERSIBLE FILM (ODF)

For The First Time

NERHADOU is introducing to the Egyptian, Middle Eastern & African markets a breakthrough dosage

form: Oral dispersible film

"An innovative drug delivery system"

■ What is ORAL DISPERSIBLE FILM (ODF)?

An Innovative Drug Delivery System: ODF Is a very thin oral film, taken orally or on the buccal mucosa. In contact with saliva, it is absorbed within seconds, which gives the drug the advantage to start its effect within few minutes.

Oral dispersible films have several advantages over other dosage forms "It's a Takeaway medicine"

More Beyond Instant Absorption Criteria

- Bypassing First-Pass Effect.
- More predictable pharmacokinetics with excellent safety profile.

A Unique Form in The Right Place.

- Rapid wetting with saliva.
- Instant disintegration & dissolution leads to swift absorption & instant bioavailability.

More Beyond A Dosage Form

- · Rapid onset of action.
- Instant full therapeutic effect.
- Ensure full dose delivery.

As Patient centric

- Suitable for almost all age groups.
- Ease of administration & better compliance.
- Accuracy in dosing & Instant action.
