The Solutions you Need

## What we offer?

**PHARMA SOLUTIONS** offers high-quality bio-equivalence, bioanalytical and pharmaceutical research services to domestic and international pharmaceutical companies.

In Pharmasolutions, all studies are conducted as per the ethical committee approved protocol under strictly followed GCP, GLP standards as well the required applicable regulatory requirements.

- Maintain highest **quality** of our services.
- Deliver our services on **time**.
- Offer **competitive budgets** for our services.
- The **collaboration** with our sponsors.
- Maintain strict adherence to **confidentiality** and international **ethical principles**.
- The **responsibility** to reply promptly to any comments concerning study reports.

The Solutions you Need

## Our vision

Pharmasolutions is a reliable worldwide leader contract research organization in bioequivalence studies.

## Our mission

To be an added value in serving humanity by helping our clients in achieving their research that will contribute for a better life for patients.

we can conduct the following studies:

1. Full and partial replicate studies
2. Cross over and parallel studies
3. Fasting and fed studies

Bioanalytical methods are developed and validated in accordance with the GLP rules and guidelines of FDA and EMA. Each step of the study is audited and verified by Quality assurance (QA) unit.

Include  
a completely  
equipped  
in-vitro lab.

We can conduct comparative dissolution studies as per the latest international guidelines for biowaiver of bioequivalence studies based either on biopharmaceutical classification system (BCS) or dose proportionality.

## Stability Studies

We provide the service of carrying out accelerated and long term stability studies for different dosage forms which comply with the latest regulations of ICH and WHO.
