

THE PURSUIT OF
EXCELLENCE HUAREN

华仁药业产品手册

COMPANY PROFILE

Founded in May 1998, Huaren Pharmaceutical is a modern pharmaceutical and health industry group integrating R&D, production and sales, focusing on medicine, APIs, medical devices and medical services. Shandong Provincial emergency reserve designated infusion manufacturing enterprise.

The registered capital of the company is RMB1.182 billion and the total assets of the company is RMB5.317 billion. The company's business focuses on nephrology, respiratory, Psychotropic, Narcotic and large-volume preparations and other fields, and has successively built five production bases in Qingdao, Rizhao, Xiaogan(HuBei), Pubei(GuangXi) and Hefei(AnHui). It covers a total area of 332,000 square meters with a total production capacity of 950 million bags (bottles). The company's main products include small-volume injections, peritoneal dialysate, therapeutic infusions, basic infusions, medical devices, tablets, capsules, powders, granules, supporting drug packaging, health products and APIs, etc., with a total of 104 varieties and 217 specifications of existing drugs, realizing the integrated development of "raw materials + infusion and injection + pharmaceutical packaging materials". The products have successfully entered more than 30 provinces and cities in China, it ranks in the forefront in the Non-PVC soft bag infusion market.

About HuaRen

Undertake the heavy responsibility of health and life to serve human health.

R & D strength of continuous innovation

The company adheres to the research and development concept of "draw lessons from the past and borrow social power and independent innovation", and benchmarks first-class enterprises at home and abroad. It has cultivated and set up a scientific research team with the chief scientist as the core, united with clinical medicine, pharmacy experts, academician expert teams, and relied on the blood purification engineering technology research center to continuously improve scientific research capabilities and innovation capabilities, break the monopoly pattern of imported products, reduce the burden on society and families, and lead a happy life.

Expert team

The company adheres to customer-oriented marketing management and implements professional value marketing strategy, providing full service to customers in the pre-sale, sale, after-sales course. The independent establishment of product sales and service network covers more than 30 provinces and autonomous regions across the country. With well-deserved market reputation and firm market foundation, the company has become the common choice of Chinese People's Liberation Army General Hospital, Union Hospital and other more than 1,800 nationwide military hospitals, Tier 3 hospitals and commercial customers.

Smart Manufacture and Good Quality

The company practices the "quality · life" quality management concept, introduces Europe's international leading core equipment and test equipment, implements total quality management and accords to national GMP standards and SFDA requires strictly. The products fully meet the United States FDA and European Pharmacopoeia standards, achieving the whole process of quality control from product R&D to customer using, responsible for life and health form details. The digital production shop integrates SAP system (planning), MES system and SCADA System (production process), automatic three-dimensional warehouse WMS system (storage process) and the electronic regulatory code system (transportation and use process) required by the state, establishing information system covering the whole life cycle of drugs, realizing the quality management from to registration process, production materials and warehousing and delivery to the customer using.

Kind and caring service

The company has professional clinical medicine and clinical pharmacy consultants, professional customer service team, hot line 400-064-8885 covering the whole country, which dedicated to provide our customers with the most perfect and best quality service.

DEVELOPMENT HISTORY

Introduced the world's most advanced non-PVC soft bag of infusion production concept and equipment, leading China's safe infusion.

1998

Introduced the world's most advanced non-PVC soft bag of infusion production concept and equipment, leading China's safe infusion.

2010

Became the first batch of GEM listed enterprises in China (Stock abbreviation "Huaren pharmaceutical" Stock code "300110")

2011

Launching Peritoneal Dialysis Fluid, it was the first listed non-PVC packaging peritoneal dialysis product in China, being successfully selected in National Ministry of Health peritoneal dialysis demonstration and promotion project and "Twelfth Five-Year" national science and technology support plan subject.

2019

On July 29, the company changed its equity. The management committee of Qjiang New District in Xi'an became the actual controller, and the company became state owned listed enterprise.

2020

Acquired Guangxi Yuyuan Pharmaceutical, forming the product structure covering high and low grade of infusion products.

2021

Acquired Anhui Stellar Pharmaceutical, the company's business has expanded to the field of respiratory department and fine hemp department, and further improved the drug dosage form, realizing the integrated development of "raw materials + infusions".

Future

Striving to grow into a pharmaceutical and health industry group integrating APIs, infusions, medical devices, pharmaceutical packaging materials and other sectors with comprehensive and coordinated development.

CORPORATE HONOR

The company implements the requirements of national laws and regulations and GMP, and establishes a quality management system based on risk management. The company has a sound organizational structure, clear quality policy and quality objectives. The quality management department is directly led by the quality person in charge of the enterprise, is responsible for the legal representative, implements the quality authorized person system, and strictly controls the product quality. In terms of production management, the company uses the concept of risk management to carry out multi-variety collinear risk assessment and process risk assessment, and establishes process control points according to the identified risk points, implements the quality supervision of the whole process, and ensures the controllable production process. In terms of production management, the company uses the concept of risk management to carry out multi-variety collinear risk assessment and process risk assessment, and establishes process control points according to the identified risk points, implements the quality supervision of the whole process, and ensures the controllable production process.

NON-PVC DOUBLE TUBE AND DOUBLE VALVE SOFT BAG INFUSION

HUMANIZATION DESIGN, MORE SAFE, MORE CONVENIENT

UPRIGHT POLYPROPYLENE INFUSION BAG

- 1 No need to import air
- 2 Cost effective
- 3 safe, healthy and environmental
- 4 Low leakage, Can be upright

Compared with Polypropylene plastic bottle, the characteristics of Upright Polypropylene Infusion Bag are as follows

- ① With the function of discharging liquid automatically, it can eliminate the the potential pollution of the air to the medicine completely.
- ② The shape is an empty bag with two sides close together after the liquid is drained.
- ③ It has the similar flexibility with the muti-layer co-extruded infusion film.

It solves the semi-open problem of plastic bottles and also solves the problem of non-standing and micro-seepage of flexible packaging

Infusion

Infusion Series

- ① Kidney blood purification product series, respiratory preparation product series, Psychotropic ,Narcotic preparation product series, large volume preparation (basic infusion) product series, therapeutic (new drug) product series, solid preparation product series.
- ② Non-PVC double tube double valve soft bag infusion, Huaren Pharmaceutical's double pipe double valve infusion products in insoluble particles, bacterial endotoxin control are significantly higher than the national standard.
- ③ Non-PVC film which is produced under 100 level purification conditions with con-extrusion technology.
Inner layer: non-toxic, inert, good biocompatibility, stable physical and chemical properties, good sealing strength.
Middle layer: non-toxic, inert, strong sealing, effectively prevent water vapor penetration, good film elasticity
Outer layer: high mechanical strength, making the film resistant to pressure and smooth surface.
- ④ Spike port、Injection port,Special customization,solve the problem of repeated disinfection of bottle port effectively,reduce workload of the nurse.

Application

Widely used in all pharmaceutical related packaging materials

API

API Series

The company's API products include pentazocine, dequalinium chloride, terbutaline hemisulfate, hydroxyethyl starch, dipotassium hydrogenphosphate, potassium dihydrogen phosphate, doxofylline and lercanidipine hydrochloride, among which its wholly-owned subsidiary Star Pharmaceutical is one of the 50 designated manufacturers of Class II psychoactive drug apis.

Application

Small molecule chemical synthesis API, large molecule biochemical AP

Pharmaceutical Packaging

Film and Bag

Three-layer co-extrusion film for infusion film and bag, Medical LDPE film and bag, HDPE film and bag, Outer wrapping film, PE outer wrapping film and etc.

Rubber Stoppers

Halogenated butyl rubber stopper for sterile powder for injection, halogenated butyl rubber stopper for injection, freeze-dried brominated butyl rubber stopper for injection, brominated butyl rubber piston for pre-potting syringes, polyisoprene rubber needle cap for pre-potting syringes, Brominated butyl rubber cap for pre-potting syringes, synthetic polyisoprene rubber stopper for injection, etc.

Application

Widely used in all pharmaceutical related packaging materials

Medical Instruments

Peritoneal dialysis consumables: iodine protective cap, Extended transfer set of PD, single-use Peritoneal Dialysis Bags, etc.
Single-use surgical consumables: single-use incision retractor fixator (device), single-use Trocar device, single-use specimen collection bag, etc.
Single-use nursing consumables: single-use slip pads, medical pads, etc.

There are more than 40 varieties and more than 400 specifications in six series of instruments, mainly involving minimally invasive laparoscopic surgery and disposable medical consumables for postoperative care in many departments such as general surgery, hepatobiliary surgery, gynecology, obstetrics, urology and so on.

Application

Widely used in all pharmaceutical related packaging materials

Blood System Drugs

Hemofiltration Basic Solution

The safe choice of bicarbonate based basic replacement fluid CRRT

- Function** Continuous blood purification special drugs, used to replace water and electrolytes in the body during hemofiltration treatment, to replace part of the kidney function
- Specification** 4000ML
- Packing material** non-PVC soft bag
- National medical insurance** Category B of national medical insurance

Hemofiltration Replacement Fluid

Time saving, labor saving, peace of mind finished product replacement fluid

- Function** Function: Special drugs for hemofiltration, used to replace water and electrolysis in the body during hemofiltration treatment, and replace some functions of the kidney
- Specification** 2000ML
- Packing material** non-PVC soft bag
- National medical insurance** Category B of national medical insurance

Low Calcium Peritoneal Dialysate (lactate-G1.76%)

Double compartment bag design, better stability after immediate use

- Function** Role: For patients requiring peritoneal dialysis and chronic renal failure (for patients with inadequate improvement of metabolic acidosis and at risk of hypercalcemia due to the use of calcium carbonate preparations and active vitamin D preparations)
- Specification** 2000ML (G liquid 720ML/E liquid 1280ML, glucose 1.76%)
- Packing material** non-PVC soft bag
- National medical insurance** National medical insurance class A

Blood System Drugs

Hydroxyethyl Starch 130/0.4 Sodium Chloride Injection

The drug of choice for safe and lasting expansion such as infinite volume replacement

- Function** For the treatment and prevention of hypovolemic, acute isovolemic hemodilution (ANH)
- Specification** 250ML / 500ML
- Packing material** Packing material: Glass bottle/Plastic bottle/non-PVC soft bag single pipe (single valve/single pipe double valve)
- National medical insurance** Category B of national medical insurance

Psychotropic and narcotic drugs

Pentazocine Injection

The safest "second class mental" analgesics

- Function** Function: Suitable for all kinds of pain. Such as cancer pain, traumatic pain, post-operative pain, can also be used before surgery or anesthesia administration, as an adjunct to surgical anesthesia
- Specification** 1ML: 30MG
- Packing material** Packing material: medium borosilicate glass ampoule

Nutrition Adjustment Drugs

Carbohydrate and Electrolyte Injection

Replenish energy safely and efficiently, improve blood energy and stabilize blood sugar

- Function** Function: Replenish and maintain water and electrolytes, and replenish energy when oral administration is not possible or cannot be adequately ingested
- Specification** 500ML
- Packing material** non-PVC soft bag

Nutrition Adjustment Drugs

Carbohydrate and Electrolyte Injection(V)

The only double buffer crystal solution, effectively maintain water, electrolyte and acid-base balance

- Function** Suitable for adults, can be used as water, electrolyte supplement source and alkalinizing agent.
- Specification** 500ML
- Packing material** non-PVC soft bag

Xylitol Injection

Add calories, improve sugar metabolism. It can inhibit the production of ketone bodies and reduce the production of fatty acids in plasma

- Function** Action: Sugar substitute for diabetic patients
- Specification** 500ML
- Packing material** glass bottle

Sodium Bicarbonate Ringer Injection

National Class 3.1 new drugs, a new generation of physiological, safe weak alkaline crystal solution.

- Function** It is used to supplement extracellular fluid when circulating blood volume and interstitial fluid decrease, and to correct metabolic acidosis.
- Specification** 500ML
- Packing material** non-PVC soft bag
- National medical insurance** Category B of national medical insurance

Antimicrobial Drugs

Foscarnet Sodium and Sodium Chloride Injection

Safe and effective non-nucleoside broad-spectrum antiviral drugs

- Function** Effects: Cytomegalovirus retinitis in AIDS patients; Immune function impairment patients with acyclovir resistant herpes simplex virus skin mucosal infection
- Specification** 100ML: foscarnet 2.4G and sodium chloride 0.3G
- Packing material** non-PVC soft bag/glass bottle
- National medical insurance** Category B of national medical insurance

Levofloxacin Hydrochloride Injection

Suitable for sensitive bacteria caused by the following moderate and severe infections

- Function** Suitable for sensitive bacteria caused by the following moderate and severe infections
- Specification** 5ML: 0.25G / 5ML: 0.5G / 10ML: 0.75G 2ML: 0.1G / 2ML: 0.2G
- Packing material** glass ampoule
- National medical insurance** National Medical insurance Class A, national essential drugs (5ML: 0.5G, 2ML: 0.2G)

Levofloxacin Injection

lassic treatment for all types of sensitive bacterial infections

- Function** To treat or prevent infections that have been proven or are highly suspected to be caused by sensitive bacteria
- Specification** 20ML: 0.5G
- Packing material** glass ampoule
- National medical insurance** National medical insurance class A

Antimicrobial Drugs

Degualinium Chloride Buccal Tablets

- Function** For acute and chronic pharyngitis, oral mucosa ulcer, gingivitis
- Specification** 0.25MG
- Packing material** PVC board

Pazufloxacin Sodium Chloride Injection

It has the characteristics of wide antibacterial spectrum and strong antibacterial action

- Function** It is suitable for the following infections caused by sensitive bacteria: ① chronic respiratory disease secondary infection ② pyelonephritis, complex cystitis, prostatitis
- Specification** Minxing 0.5G/0.9G_ Glass 100ML_
- Packing material** Plastic bottle/glass bottle

Regulating water, electrolyte and acid-base balance

Sodium Lactate Ringer's Injection

Adjust acid-base balance to restore effective circulation

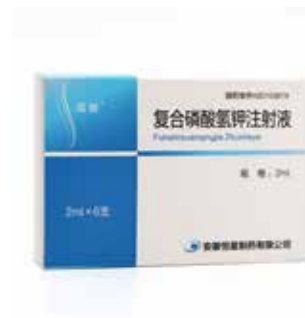

- Function** regulating body fluids, electrolytes and acid-base balance drugs. For metabolic acidosis or dehydration cases with metabolic acid toxicity
- Specification** 500ML / 1000ML
- Packing material** glass bottle/plastic bottle/non-PVC soft bag (Single valve: pull ring type; Double valve: collapsible/double valve double plug)
- National medical insurance** National medical insurance class A national essential drugs

Regulating water, electrolyte and acid-base balance

Compound Sodium Chloride Injection

- Function** Used for water loss due to various reasons, including hypotonic, isotonic and hypertonic water loss
- Specification** 500ML
- Packing material** glass bottle/plastic bottle/non-PVC soft bag (Single valve: pull ring type; Double valve: collapsible/double valve double plug)
- National medical insurance** National medical insurance class A national essential drugs

Composite Potassium Hydrogen Phosphate Injection

Phosphorus-potassium synergy, activation of sodium potassium pump, less stimulation, faster absorption, higher efficiency

- Function** It is mainly used as a phosphorus supplement in complete parenteral nutrition therapy, such as phosphorus supplement for patients who need to fast for more than 5 days after medium or above surgery or other trauma. It can also be used for hypophosphatemia caused by certain diseases
- Specification** 2ML
- Packing material** glass ampoule
- National medical insurance** National basic drugs of Class B of national medical insurance

Nervous System Drugs

Potassium magnesium aspartate and glucose injection

- Function** Electrolyte supplement, can be used for hypokalemia, digitalis poisoning caused by arrhythmia (mainly ventricular arrhythmia) and myocarditis sequelae, congestive heart failure, myocardial infarction adjuvant treatment.
- Specification** 250ML: L-aspartate 0.85G with potassium 0.114G with magnesium 0.042G and glucose 12.5G
- Packing material** non-PVC soft bag
- National medical insurance** Category B of national medical insurance

Nervous System Drugs

Glycerol Fructose and Sodium Chloride Injection

First-line drug to reduce intracranial pressure and eliminate brain edema

- Function** It is used for inner ear vertigo, arteriosclerosis, ischemic cerebrovascular disease and hypertension caused by postural vertigo, tinnitus
- Specification** 500ML
- Packing material** Glass bottle/plastic bottle
- National medical insurance** Category B of national medical insurance

Mannitol Injection

Dehydration reduces swelling and reduces cranial pressure

- Function** tissue dehydrating drugs, reducing intraocular pressure, osmotic diuretics, etc
- Specification** 100ML:20G / 250ML:50G
- Packing material** Glass bottle/Plastic bottle (easy folding)
- National medical insurance** National medical insurance class A national essential drugs

Pentoxifylline Injection

- Function** Suitable for cerebral blood circulation disorders such as transient ischemic attack, stroke sequelae, brain dysfunction caused by cerebral blood deficiency; Peripheral blood circulation
- Specification** 5ML: 0.1G
- Packing material** glass ampoule
- National medical insurance** National medical insurance class A national essential drugs

Cardiovascular Drugs

Isosorbide Mononitrate Sodium Chloride Injection

The most effective long-term treatment and prevention of angina pectoris

- Function** Suitable for the treatment of angina pectoris, combined with digitalis and (or) diuretics to treat chronic heart failure
- Specification** 100ML: isosorbide mononitrate 20MG and sodium chloride 0.9G
- Packing material** Soft bag
- National medical insurance** Category B of national medical insurance

Isosorbide dinitrate and sodium chloride injection

Phosphorus-potassium synergy, activation of sodium potassium pump, less stimulation, faster absorption, higher efficiency

- Function** Used in the treatment of angina pectoris and congestive heart failure
- Specification** 200ML: isosorbide nitrate 20MG and sodium chloride 1.8G
- Packing material** non-PVC soft bag
- National medical insurance** Category B of national medical insurance

Haemostatic Drugs

Carbazochrome Sodium Sulfonate and Sodium Chloride Injection

Strengthen the blood vessels, shrink the cracked end, quickly stop bleeding, no thrombosis

- Function** Used for bleeding diseases of urinary system, upper digestive tract, respiratory tract and obstetrics and gynecology. Effect on urinary system
- Specification** Glass bottle 100ML
- Packing material** glass bottle
- National medical insurance** Category B of national medical insurance

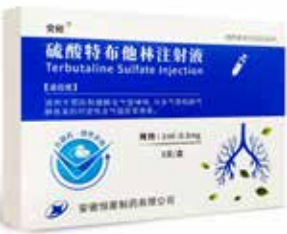

Respiratory Drugs

Doxofylline Injection

Quick onset, good tolerance, long half-life, strong antiasthmaticism, long-lasting efficacy, high safety

- Function** For bronchial asthma, chronic asthmatic bronchitis and other bronchospasticity caused by breathing difficulties
- Specification** 10ML: 0.1G, 10ML: 0.2G, 20ML: 0.2G, 20ML: 0.3G
- Packing material** glass bottle
- National medical insurance** Category B of national medical insurance

Terbutaline Sulfate Injection

Replenish energy safely and efficiently, improve blood energy and stabilize blood sugar

- Function** It is suitable for the prevention and relief of bronchial asthma, reversible bronchospasm associated with bronchial and emphysema patients.
- Specification** 1ML:0.5MG; 5ML:2.5MG
- Packing material** medium borosilicate glass ampoule

冲洗液

Sodium Chloride Physiological Solution

- Function** Used for operation, wound, eyes, mucous membranes and other irrigation; In the department of hemodialysis center, it is used for dialysis machine and blood filter flushing tube
- Specification** 500ML:4.5G / 3000ML:27G / 2000ML:18G
- Packing material** Plastic bottle non-PVC soft bag
- National medical insurance** Category B of national medical insurance

Solution

Mannitol Irrigation Solution

Urinary irrigation "First choice"

- Function** It can be used for transurethral cavity operation to rinse and make the field of vision clear
- Specification** 2000ML:100G / 3000ML:150G
- Packing material** non-PVC soft bag
- National medical insurance** Category B of national medical insurance

Hard Orthokeratology Len Irrigation Solution

simulates human tear environment, does not change eye osmotic pressure, naturally refreshing, improve wearing comfort;Sterile without preservatives, using GMP certified production line

- Function** It is used for rinsing rigid orthokeratology mirror
- Specification** 30ML/ bottle, 50ML/ bottle, 75ML/ bottle, 100ML bottle, 160ML/ bottle, 200ML/ bottle, 250ML/ bottle 300ML/ bottle, 500ML/ bottle, 750ML/ bottle 1000ML/ bottle
- Packing material** Plastic bottle

Sterile Water for Injection

It has anti-inflammatory, bactericidal, help sputum discharge and other functions and effects

- Function** solvent for sterilized powder for injection, diluent for injection, flushing agent for endoscopic surgery in urology, etc
- Specification** 500ML
- Packing material** non-PVC soft bag/glass bottle
- National medical insurance** National medical insurance class A

Three-layer co-extrusion film for infusion

Application

Making film and bag for basic infusion、therapeutic infusion and other infusion products

Specification and Model

135mm*600m*200 μ m、150mm*600m*200 μ m、160mm*600m*200 μ m、220mm*600m*200 μ m、320mm*600m*200 μ m

Polypropylene Composite Cover

Easy folding cover, European cover, wash liquid cover, single and double valve cover, pull ring cover

Specification and Model

φ 21mm--- φ 32mm

Outer wrapping film/PE Outer wrapping film

Application

For pharmaceutical, food and general industry coating.

Specification and Model

500*600*0.08mm、500*600*0.08mm、500*650*0.09mm

Aluminum-Plastic Composite Cover/Interface

Dosing plug, delivery plug, collapsible plug, sealing cap, etc.

Specification and Model

/

HDPE Bag
Medical LDPE Bag
Heat-Resistant Bag

Application

It can be used for the finished product packaging of sterile raw materials, the transfer of sterile raw materials and sterile preparations in the production process, and medical treatment Packaging of instruments, finished product packaging of biological products, packaging of sterile pharmaceutical packaging materials and auxiliary materials, etc.

Specification and Model

50-6000ml

Medical Rubber Stopper

Synthetic polyisoprene rubber stopper for injection, pharmaceutical synthetic polyisoprene gasket, sterile for injection Halogenated butyl rubber plug products for powder, brominated butyl rubber plug products for injection freeze-drying, injection Halogenated butyl rubber plug products, brominated butyl rubber piston products for pre-potting syringes piston, pre-potting injection Polyisoprene rubber needle for emitter

Specification and Model

20-A、20-B2

Single-use Incision Retraction Fixator(Device)
Single-use Incision retraction Fixator Protector

Application

It is suitable for thoracoscopic, laparoscopic surgery and small incision surgery to expand the incision, reveal the surgical field, protect the incision from injury and reduce the incision infection

Specification and Model

15mm(H): $\Phi 50 \times 100$ 、 $\Phi 100 \times \Phi 120$ 、 $\Phi 70 \times \Phi 150$
30mm(H): $\Phi 30 \times \Phi 40$ 、 $\Phi 40 \times \Phi 50$ 、 $\Phi 50 \times \Phi 60$ $\Phi 60 \times \Phi 70$ 、 $\Phi 70 \times \Phi 70$
 $\Phi 40 \times \Phi 50$ 、 $\Phi 60 \times \Phi 70$ 、 $\Phi 80 \times \Phi 90$ 、 $\Phi 120 \times \Phi 130$ 、 $\Phi 150 \times \Phi 160$ 、 $\Phi 180 \times \Phi 190$ 、
 $\Phi 220 \times \Phi 230$ 、 $\Phi 270 \times \Phi 280$

Single-use of multi-channel single-hole abdominal puncture device

Application

It is a sealed operation channel used for endoscopic, forceps, scissors and other instruments in single-hole laparoscopic surgery to enter and exit the incision

Specification and Model

$\Phi 5/5/10$ 、 $\Phi 5/5/12$ 、 $\Phi 5/10/10$ 、 $\Phi 5/10/12$ 、 $\Phi 5/12/12$ 、 $\Phi 5/5/10/10$ 、
 $\Phi 5/5/10/12$ 、 $\Phi 5/5/12/12$

Single-use Trocar Device
Single-use Trocar

Application

This product can be used for the establishment of pneumoperitoneum as an optional accessory for endoscope and surgical instruments to enter and exit the body after puncture during thoracic laparoscopic surgery.

Specification and Model

$\Phi 5$ 、 $\Phi 10$ 、 $\Phi 12$ 、 $\Phi 15$

Single-use Thoracentesis Trocar

Application

It is used in combination with endoscope to establish instrument access through puncture in thoracic endoscopic surgery

Specification and Model

$\Phi 6/\Phi 10/\Phi 13/\Phi 15 \times 110\text{mm}$

Single-use Specimens Retrieval Set

Application

It is suitable for collecting and removing specimens during clinical endoscopic biopsy or surgery.

Specification and Model

$\geq 90\text{mL}$ 、 $\geq 145\text{mL}$ 、 $\geq 250\text{mL}$
300/400mm

Single-use Suction and Irrigation Set

Application

Used for flushing body-tissue.

Specification and Model

HRCXI-A、HRCXI-B、HRCXI-C、HRCXII-A、HRCXII-B、HRCXII-C

Products with Trocar and Retrieval Bag for Endoscopy

Application

It is suitable for laparoscopy and operation process, to puncture the human abdominal wall tissue to establish the working channel of abdominal surgery to collect human tissue specimens and take out in vitro

Specification and Model

$\Phi 5$: 290/390mm、 $\Phi 6$: 290/390mm

Single-use Sliding Pad

Application

Mainly used for transferring and changing bed of the patients.

Specification and Model

76 × 200cm

Mini cap with Iodine

Application

In peritoneal dialysis, It is used for plugging and disinfection of external transfer set interface. Only used once.

Specification and Model

Φ 12.6*Φ 14.3

Single-use Peritoneal Dialysis Pipeline

Application

A piping system used to connect the peritoneal dialysis machine to the patient for the delivery of dialysate and the removal of waste fluid.

Specification and Model

/

Single-use Locking Titanium Adapter for Peritoneal Dialysis Catheter

Application

It is used for connecting peritoneal dialysis catheter with Extended Transfer Set of PD.

Specification and Model

HRTJT-01

Single-use Peritoneal Dialysis Drainage Bag

Application

It is used together with the liquid bag for peritoneal dialysis to load the waste liquid during peritoneal dialysis.

Specification and Model

1000/1500/2000/2500/3000/3500/4000/4500/5000mL

Single-use Peritoneal Dialysis Tube

Application

It is used to establish therapeutic pathways in patients with renal failure by peritoneal profiling

Specification and Model

HRTD1-430、HRTD1-500、HRTD1-580
HRTD2 430、HRTD2 500、HRTD2 580

Clamp for outlet port of PD Bag

Application

It is used to clamp various medical plastic catheters and control the flow of liquid in the catheters during peritoneal dialysis

Specification and Model

HRGLJ-1

Extended Transfer Set of PD

Application

It is used to connect the peritoneal dialysis tube and peritoneal dialysis bag implanted in the body during peritoneal dialysis in patients with renal failure

Specification and Model

HRDG-01

Peritoneal Dialysis Belt

Application

Used for protection and fixation of Peritoneal Dialysis

Specification and Model

common-use sizes

Medical Mask

Products Name

- Medical skin dressing
- Skin repairing dressing

Medical Skin Repair Gel

Specification and Model

7g/tube、15g/tube etc

Medical Face Mask Series

Products Name

- Disposal medical face mask
- Medical surgical face mask
- Medical protective mask

Single-use Medical Protective Clothing

Specification and Model

Single-use Sterile Drainage Bag

Specification and Model

500 / 1000 / 1500 / 2000 / 2500 / 3000mL

Pure Water

Family daily drinking water is the best choice

With the increasingly serious environmental problems, many surface and underground water sources are polluted, and there are many risks in household drinking water. Huaren Pharmaceutical follows the production technology of infusion water, and launches large buckets of water and bottled water, so that family daily cooking, medicine for the elderly, and infant milk powder can be safely drunk directly.

Specification and Model

450ml/bottle 248ml/bottle

II / III Electrolyte Hydration Solution

Maintain the presence of the wine house, the social instrument

Continue the development of Huaren infusion professional formula, high concentration, to provide energy for the body to make metabolism more efficient; At the same time, replenish electrolytes, prevent the imbalance of body fluids caused by heavy drinking, and reduce hangover discomfort

Specification

100ml/bottle、248ml/bottle

Grapefruit Electrolyte Drink Glucose Hydrate Liquid

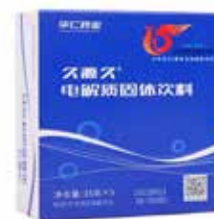

Body fluids = water + electrolytes

It is similar to human body fluid and can quickly replenish the water and electrolytes lost by the human body (Note: human body fluid = water + electrolyte). You can drink it when you get up in the morning, bathe and work. Since there is a lot of sweat during exercise, Kuyuan Kuo Grapefruit electrolyte drink is often used after exercise to supplement the water and electrolytes lost with sweat.

Specification

450ml*15 bottle

Electrolyte Solid Drink

Small and portable, instant drink

Provides energy to the body, replenishes electrolytes lost with body fluids, and helps eliminate undesirable states. Especially suitable for use in the office, home, business trips and other scenes, compact and portable, but also according to their own taste to make cold drinks, hot drinks and flavored drinks.

Specification and Model

15g*5 bags/box

6		Fleroxacin and Glucose Injection 氟康唑氯化钠注射液	100mL: 0.2g / 5.0g
			200mL: 0.4g / 10.0g
7		Tobramycin Sulfate and Sodium Chloride Injection 硫酸妥布霉素氯化钠注射液	100mL: 80mg / 0.9g
8		Ciprofloxacin Lactate and Sodium Chloride Injection 乳酸环丙沙星氯化钠注射液	Calculate 100mL based on ciprofloxacin: 0.2g
9		Ofloxacin and Sodium Chloride Injection 氧氟沙星氯化钠注射液	100mL: 0.2g / 0.9g
10		Levofloxacin Lactate and Sodium Chloride Injection 乳酸左氧氟沙星氯化钠注射液	100mL: 0.1g / 0.9g
			100mL: 0.2g / 0.9g
11		Levofloxacin Hydrochloride and Sodium Chloride Injection 盐酸左氧氟沙星氯化钠注射液	100mL: 0.1g / 0.9g
			100mL: 0.2g / 0.9g
			100mL: 0.3g / 0.9g
12		Pazufloxacin Mesilate and Sodium Chloride Injection 甲磺酸帕珠沙星氯化钠注射液	100mL: 0.3g / 0.9g
	100mL: 0.5g / 0.9g		
13	Ofloxacin and Sodium Chloride Injection 氧氟沙星氯化钠注射液	100mL: 0.2g / 0.9g	
14	Foscarnet Sodium and Sodium Chloride Injection 膦酸钠氯化钠注射液	100mL: 2.4g / 0.3g	
15	Ribavirin Glucose Injection 利巴韦林葡萄糖注射液	100mL: 0.2g / 5g	
		100mL: 0.5g / 5g	
		250mL: 0.5g / 12.5g	
16	Levofloxacin Hydrochloride Injection 盐酸左氧氟沙星注射液	2mL: 0.1g	
		2mL: 0.2g	
		5mL: 0.25g	
		5mL: 0.5g	
17	Levofloxacin Injection 左氧氟沙星注射液	10mL: 0.75g	
		20mL: 0.5g	
18	Dequalinium Chloride Lozenges 地喹氯铵含片	0.25mg	
19	Potassium Magnesium Aspartate and Glucose Injection 门冬氨酸钾镁葡萄糖注射液	250mL: L-Aspartate 0.85g Potassium 0.114g Magnesium 0.042g Glucose 12.5g	

PHARMACEUTICAL MANUAL

No	Category	Drug name	Specificaton	
20	Nervous System 神经系统类	Levofloxacin Hydrochloride Injection 盐酸左氧氟沙星注射液	250mL: Glycerol 25g	
			Fructose 12.5g	
			Sodium chloride 2.25g	
21		Citicoline Sodium and Sodium Chloride Injection 胞磷胆碱钠氯化钠注射液	100mL: 0.5g / 0.9g	
22		Bethahistine Hydrochloride and Sodium Chloride Injection 盐酸倍他司汀氯化钠注射液	500mL: 0.02g / 4.5g	
23		Mannitol Injection 甘露醇注射液	100mL: 20g	
			250mL: 50g	
24		Glycerol and Sodium Chloride Injection 甘油氯化钠注射液	250mL: 25g / 2.25g	
25		Pentoxifylline Injection 己酮可可碱注射液	5mL: 0.1g	
26		Circulatory System 循环系统类	Aminobutyric Acid Sodium Chloride Injection 氨基酪氨酸氯化钠注射液	250mL: 1g / 2.25g
Piracetam Glucose Injection 吡拉西坦葡萄糖注射液			250mL: 8g / 12.5g	
Ligustrazine Hydrochloride and Sodium Chloride Injection 盐酸川芎嗪氯化钠注射液			100mL: 80mg / 0.9g	
29		Circulatory System 循环系统类	Xantinol Nicotinate and Sodium Chloride Injection 烟酸占替诺氯化钠注射液	100mL: 0.3g / 0.9g
30			Isosorbide Mononitrate Sodium Chloride Injection 单硝酸异山梨酯氯化钠注射液	100mL: 20mg / 0.9g
31	Vinpocetine and Glucose Injection 长春西汀葡萄糖注射液		100mL: 10mg / 5g	
			100mL: 20mg / 5g	
32	Isosorbide Nitrate and Sodium Chloride Injection 硝酸异山梨酯氯化钠注射液	250mL: 10mg / 12.5g		
32	Nutritional Therapy 营养治疗用药	Isosorbide Nitrate and Sodium Chloride Injection 硝酸异山梨酯氯化钠注射液	200mL: 20mg / 1.8g	
33		Compound Amino Acid Injection (3AA) 复方氨基酸注射液 (3AA)	250mL: 10.65g (Total amino acids)	
34		Compound Amino Acid Injection (18AA) 复方氨基酸注射液 (18AA)	250mL: 12.5g (Total amino acids)	
35		Compound Amino Acid Injection (15AA) 复方氨基酸注射液 (15AA)	250mL: 20g (Total amino acids)	
36		Xylitol Injection 木糖醇注射液	250mL: 12.5g	
			250mL: 25g	
			500mL: 25g	
37		Mixed Sugar Electrolyte Injection 混合糖电解质注射液	500mL	
38		Multiple Electrolytes Injection 复方电解质注射液	500mL	
39		Multiple Electrolytes Injection (V) 复方电解质注射液 (V)	500mL	
40	Sodium Bicarbonate Ringer Injection 碳酸氢钠林格注射液	500mL		

PHARMACEUTICAL MANUAL

No	Category	Drug name	Specificaton	
41	Deigestive Tract and Metabolism 消化道和新陈代谢用药	Sodium Bicarbonate Injection 碳酸氢钠注射液	100mL: 5g	
			250mL: 12.5g	
42		Inosine and Sodium Chloride Injection 肌苷氯化钠注射液	100mL: 0.2g / 0.9g	
			100mL: 0.5g / 0.9g	
43		Ranitidine Hydrochloride in Sodium Chloride Injection 盐酸雷尼替丁氯化钠注射液	250mL: 0.1g / 2.25g	
44		Ethylenehane sulfonate Glucose Injection 乙烷磺酸葡萄糖注射液	100mL: 0.5g / 5g	
45		Lysine Hydrochloride and Calcium Hydrogen Phosphate Granules 赖氨酸磷酸氢钙颗粒	2.0g: Lysine hydrochloride 0.5g	
			Calcium hydrogen phosphate 0.5g	
46		Anesthesia and Analgesia 麻醉及止痛类	Ropivacaine Hydrochloride and Sodium Chloride Injection 盐酸罗哌卡因氯化钠注射液	100mL: 0.2g / 0.86g
47			Tramadol hydrochloride and Sodium Chloride Injection 盐酸曲马多氯化钠注射液	100mL: 0.05g / 0.9g
48	Psychiatric Narcotics 精神用药	Pentazosin injection 喷他佐辛注射液	1mL: 30mg	
49	Anti-hepatitis and Auxiliary System 抗肝炎及肝炎辅助用药	Matrine and Glucose Injection 苦参碱葡萄糖注射液	250mL: 0.15g / 12.5g	
50		Matrine and Sodium Chloride Injection 苦参碱氯化钠注射液	100mL: 0.6g / 0.9g	
51	Antitumor and Auxiliary System 抗肿瘤及辅助用药	Fluorouracil sodium chloride injection 氟尿嘧啶氯化钠注射液	100mL: 0.25g / 0.9g	
52		Granisertron Hydrochloride and Sodium Chloride Injection 盐酸格拉司琼氯化钠注射液	50mL: 3mg / 0.45g	
53		Ondansetron Hydrochloride Injection 盐酸昂丹司琼注射液	2mL: 4mg	
54	Hemostatsis 止血类	Sodium Carbamate Sulfonate and Sodium Chloride Injection 卡络磺钠氯化钠注射液	100mL: 80mg / 0.9g	
55	X-ray Contrast Agent X线造影剂	Iohexol Injection 碘海醇注射液	100mL: 30g (I)	
			50mL: 17.5g (I)	
56	Respiratory System 呼吸系统用药	Doxofylline Injection 多索茶碱注射液	10mL: 0.1g	
			10mL: 0.2g	
			20mL: 0.3g	
			20mL: 0.2g	
57		Caffeine Citrate Injection 枸橼酸咖啡因注射液	3mL: 60mg	
			1mL: 20mg	
58		Terbutaline Sulfate Injection 硫酸特布他林注射液	1mL: 0.5mg	
			5mL: 2.5mg	
59		Rinse Solution 冲洗液	Physiological Sodium Chloride Solution 生理氯化钠溶液	2000mL: 18g
				3000mL: 27g
	500mL: 4.5g			
60	Mannitol Rinse Solution 甘露醇冲洗液	2000mL: 100g		

PHARMACEUTICAL MANUAL

No	Category	Drug name	Specificaton
61	Rinse Solution 冲洗液	Mannitol Injection 甘露醇注射液	3000mL: 150g
62		Glycine Rinse Solution 甘氨酸冲洗液	2000mL: 30g
63		Sterilized Water for Injection 灭菌注射用水	500mL
64		Sodium Chloride Injection 氯化钠注射液	1000mL: 9g
65	Hematological System 血液净化类	Hydroxyethyl Starch 130/0.4 Sodium Chloride Injection 羟乙基淀粉 130/0.4 氯化钠注射液	250mL: 15g / 4.5g
			500mL: 30g / 4.5g
66		Troxeutin Glucose Injection 曲可芦丁葡萄糖注射液	200mL: 0.4g / 10.0g
67		Fasudil Hydrochloride 盐酸法舒地尔	2mL: 30mg
68		Hemofiltration Replacement Basic Solution 血液滤过置换基础液	4000mL
69		Hemofiltration Replacement Solution 血液滤过置换液	2000mL
70		Peritoneal dialysate (lactate-G1.5%) 腹膜透析液 (乳酸盐 -G1.5%)	1.5%G: 2000mL
71		Peritoneal dialysate (lactate-G1.5%) 腹膜透析液 (乳酸盐 -G1.5%)	1.5%G: 2500mL
72		Peritoneal dialysate (lactate-G2.5%) 腹膜透析液 (乳酸盐 -G1.5%)	2.5%G: 2000mL
73		Peritoneal dialysate (lactate-G2.5%) 腹膜透析液 (乳酸盐 -G1.5%)	2.5%G: 2500mL
74		Peritoneal Dialysate (lactate G4.25%) 腹膜透析液 (乳酸盐 -G4.25%)	4.25%G: 2000mL
75		Peritoneal Dialysate (lactate G4.25%) 腹膜透析液 (乳酸盐 -G4.25%)	4.25%G: 2500mL
76		Low Calcium Peritoneal Dialysis Solution (lactate-G1.5%) 低钙腹膜透析液 (乳酸盐 -G1.5%)	1.5%G: 2000mL
77		Low calcium Peritoneal Dialysis Solution (lactate-G2.5%) 低钙腹膜透析液 (乳酸盐 -G2.5%)	2.5%G: 2000mL
78		Low Calcium Peritoneal Dialysis Solution (lactate G4.25%) 低钙腹膜透析液 (乳酸盐 -G4.25%)	4.25%G: 2000mL
79		Low Calcium Peritoneal Dialysis Solution (lactate-G1.76%) 低钙腹膜透析液 (乳酸盐 -G1.76%)	2000mL: (G liquid 720mL /E liquid 1280mL Glucose1.76%)
80	Hematological System 血液净化类	Low Calcium Peritoneal Dialysis Solution (lactate-G2.55%) 低钙腹膜透析液 (乳酸盐 -G2.55%)	2000mL: (G liquid 720mL /E liquid 1280mL Glucose2.55%)
81		Sodium Chloride Injection 氯化钠注射液	50mL: 0.45g
			100mL: 0.9g
			150mL: 1.35g
			200mL: 1.8g
			250mL: 2.25g
