

Microkhim

Microkhim — is an innovative Ukrainian pharmaceutical company that develops, conducts research, manufactures, and sells high-quality medicines while implementing innovative solutions in pharmacy

**33 years of experience in the
development and manufacture of
medicines**

In 33 years of operation:

- became the No. 1 producer of nitrates
- created the most balanced and versatile portfolio of cardio products on the Ukrainian market
- launched the first domestic medicines of isosorbide dinitrate and nitroglycerin in spray form
- became the leader in the field of bioequivalence studies in Ukraine (2020)
- we registered the first domestic medicine for the treatment of pulmonary arterial hypertension
- we registered the first generic drug for COVID-19 in Ukraine
- we have established reliable partnerships in 26 countries (export of medicines, import of raw materials)
- we launched our own programme to provide free treatment for patients with an uncommon disease - pulmonary arterial hypertension

Our latest news

Until February 2022, the Company's production facilities operated in the Luhansk region in the town of Rubizhne. However, Russia's full-scale invasion of Ukraine forced production to be suspended.

In May 2022, the company will adopt a new business model and refocus on contract manufacturing in collaboration with Ukraine's leading pharmaceutical companies.

As a result, Microkhim's products are manufactured in facilities that meet the highest international quality standards, making it one of the company's key priorities when choosing partners, developing strategy and building the company's portfolio.
