MANUFACTURING
& CONTRACT
FILLING

We are an all-Italian pharmaceutical CDMO, founded around content, the constant focal point of everything we do: liquid (such as solutions, suspension and microemulsion), gel and lyophilized pharmaceuticals, medical devices and cosmetics, both for human and veterinary uses and especially for ophthalmic but also for nasal, oral, respiratory, dermatological, otological and diagnostic applications.

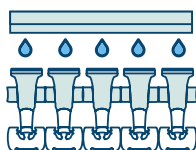

Our clients are multinationals and large groups but also small-medium sized pharmaceutical and cosmetics companies.

With decades of experience in the ophthalmic and respiratory sectors, we boast 3 production facilities -of which two authorised by AIFA and one of them also FDA approved-, 32 production lines and a workforce of more than 500 within 2 companies: C.O.C. Farmaceutici and Tubilux Pharma.

Our leading-edge technologies, widespread know-how and distinctive values make Content Group a sound pharmaceutical group specialising in contract development, production, filling and packaging.

We operate in compliance with European GMPs and in accordance with the ISO 13485:2016 and ISO 22716:2007 standards.

We are one of Europe's most acknowledged ophthalmic groups, with customers worldwide and significant growth prospects in Europe, the Middle East, North Africa and the USA.

& CONTRACT MANUFACTURING & CONTRACT FILLING

OUR SERVICES INCLUDE BULK PRODUCT PREPARATION, FILLING AND PACKAGING OF PHARMACEUTICAL PRODUCTS, MEDICAL DEVICES, COSMETICS, PRODUCTS FOR VETERINARY AND DIAGNOSTIC USE. IN OUR CAPACITY AS PRODUCTION EXPERTS, WE ASSIST CLIENTS AND MANUFACTURE THEIR PRODUCTS IN OUR THREE CURRENT PLANTS, OF WHICH TWO AUTHORISED BY AIFA AND ONE OF THEM ALSO FDA APPROVED.

01 CONTRACT MANUFACTURING IN FULL SERVICE

Preparation, filling and packaging of pharmaceutical products, medical devices, cosmetics, products for veterinary and diagnostic in liquid, gel, cream, lyophilisates or ointments form.

Medicinal products - We deal with development, technology transfer and industrialisation of medicinal products in liquid or gel form, and their production.

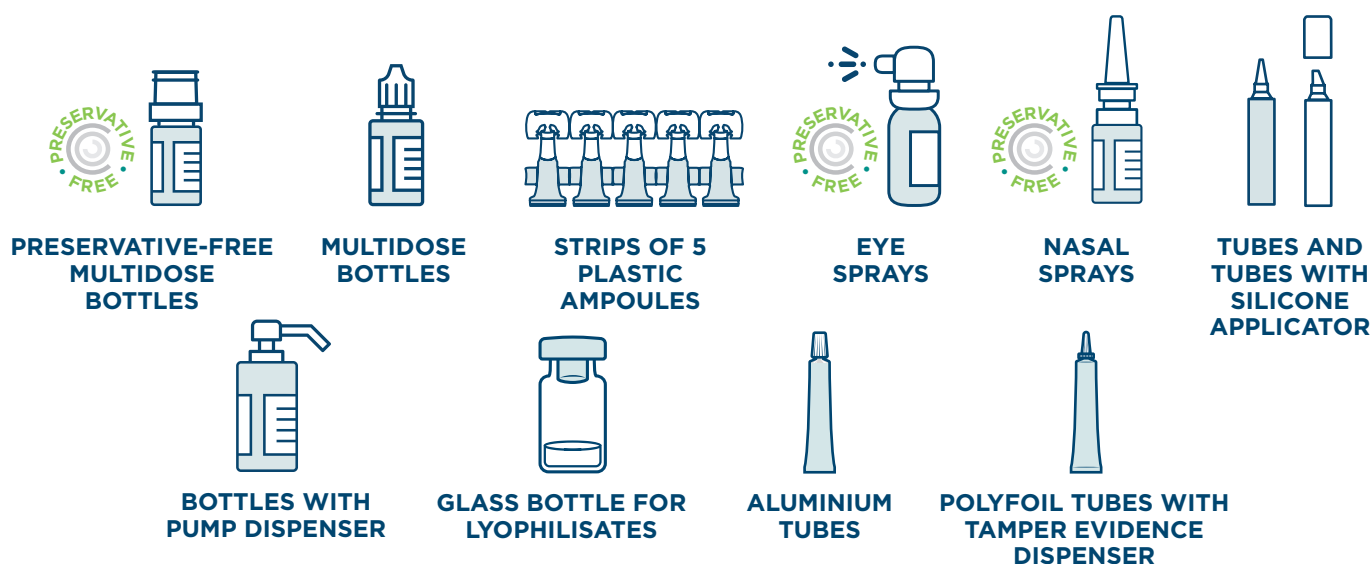

Medical devices - we deal with medical device development, evaluating every single product characteristic and adjust the formula as needed to ensure feasibility, replicability and efficacy. Pilot batches allow us to verify product stability and safety, which we also confirm through a number of specific tests and analyses, essential for the drafting of technical dossiers.

02 CONTRACT FILLING ONLY FOR MEDICAL DEVICES AND COSMETICS

Filling service alone in wide range of single-dose, multi-dose containers and tubes, with chemical and microbiological analyses pre- and post-filling.

We avail of lines for filling sterile products (medical devices for ophthalmic use and inhalation, nasal or ear washes) and non-sterile products (medical devices for oral use, solutions for external use, veterinary products, cosmetics and products for personal care and hygiene).

Primary packaging categories

Bespoke projects - if a project entails filling a **non-standard container**, we can rapidly make any necessary adjustments to our production lines to factor in this requirement.

FEATURES

Maximum dose **precision**
+ **constant** drops

It is packaged in
re-closeable vials allowing
up to **2 applications per**
day

User-friendly packaging,
even for elderly patients
or with limited use of the
hands

Neck is **perfectly smooth**
and therefore less likely to
cause damage or injury to
the eye during instillation

Reclosable cap with **seal**
ring that remains attached
to the vial neck, signaling
any **tampering of the**
container

Reclosability pin already
inserted in the orifice
and entering in contact
only with the product to
guarantee **greater hygiene**

Customizable with different
cap colours
